◇ K9 Optical Crystal is extremely hard and clear. This permits specialized polishing to produce a surface that transmits light with little or no distortion, which sparkles with diamond-like brilliance when cut into facets. Its precise optic effects, developed for the scientific requirements of lens makers, also make it the finest engravable surface for artistic impression. Optical crystal pieces also have the distinction of being lead free, and are available in a variety of solid forms.

Products in the Maitland-Smith line are handcrafted by skilled artisans and finished from the highest quality materials such as wood, stone, veneer, glass, brass and iron. We regularly use natural materials; therefore, small variations in shapes, surfaces and finishes can occur. These variations are inherent to their species and enhance the rich craftsmanship and beauty of each product.

Every effort has been made to accurately reflect the true hues of our finishes; however, due to the photographic and printing processes used in the creation of this catalog, actual finish and fabric color may vary slightly from the images shown. Therefore we recommend that you contact your authorized dealer to see actual product.

Note: Wattages listed for lighting are maximum wattages per bulb for an individual lighting piece. If no bulb type is indicated, a normal, incandescent light bulb is used.

Size of product is not always apparent from the images shown; therefore, please note dimensions.
