AN ORIGINAL POINT OF VIEW FROM DESIGNER LISA McDENNON

The Lisa McDennon collection offers an array of styles with a modern organic aesthetic. Drawing from Lisa's inspiration as an artist and designer, each fixture is thoughtfully planned with purposefully chosen materials and finished with impeccable construction. Natural elements, subtle textures and sculptural silhouettes are the unexpected details that elevate each design to a memorable level.

AN ARRAY OF MODERN ORGANIC FORMS

About Lisa McDennon

Lisa McDennon founded her Laguna Beach-based interiors firm, Lisa McDennon Design, in 2000. Inspired by the region's beauty, history, and culture, McDennon's distinctive style reinvigorates coastal California design. She works with natural materials, elegant forms, and varied textures to create modern interior that are sophisticated, unexpected, and timeless. With degrees in fine art and interior design, McDennon brings a deep knowledge of art and architecture to all her work, which has been recognised with multiple awards and coverage in USA national publications.

LUDLOW

Ludlow cleverly blends a penchant for industrial features with inspiration drawn from Palladian architecture. Designed around the light source, Ludlow plays with the simple geometry of circles and squares for an ultra-stylish composition. The single pendant incorporates rustic natural elements with the use of a genuine cow-hide strap.

NULA

Nula is a work of art. A juxtaposition of industrial elements and organic influences transmutes simplicity into decadence. Pairing a dense chalk-white exterior with a gleaming, luxe gold interior elicits a dramatic effect. Several designs offer flexibility to customise for unique installations.

LAGUNA

Imagine a net gently breaking the surface, then slowly emerging with a cascade of water droplets trickling through and shimmering with light. Laguna uses a hand-made open framework design in Brushed Gold as the foundation in this artistic interpretation. Clear glass droplets fall at varying lengths, casting the light. Minimal hanging wires ensure the net itself appears to float, as a candle cluster emits light from within.
