Flowers of light

White magnolias are the focus of this new lighting collection in which the petals, handmade one by one, are enhanced when the light filters through them, creating a warm, evocative atmosphere.

These compositions which might at first sight seem fragile, are highly resistant because each petal has been given the necessary thickness, ensuring a balance between translucency and resistance.

A collection in which flowers are transformed into light.

Re-Cyclos

by Bodo Sperlein

09

Nature is in a constant state of evolution and regeneration... This was the basic principle behind the Re-Cyclos project which saw Lladró invite celebrated international designers to give life to new collections using the brand's signature elements and themes.

German creative Bodo Sperlein turned his attention to Lladró's mix of nature and fantasy to create a collection of chandeliers inspired by fairies in the Niagara version, and leaves in the Magic Forest version.

The Clown Lamp

Like all the pieces in Jaime Hayon's Fantasy collection, this creation arises from the fusion of a classic Lladró theme such as the circus and the playful sense and fantasy that the Spanish creative Jaime Hayon brings to his designs. With elegance and a casual attitude, the magic of the circus inspires this innovative lamp in the form of a clown with a golden nose.

A perfect balance between expression and functionality in this piece that brings back childhood memories.

A Journey Through History

In Medieval Japan, the sandogasa, a large sun hat fashioned from straw, accompanied travelers on their long journeys across the country. It was these hats, and the traditional hairstyles that hid behind them, that inspired Japanese designer Hisakazu Shimizu to create this original collection of lamps.

Starting with their black satin wood bases and ending with shades made with layers of hand-blown Murano crystal, the sheer luster of these creations are sure to make an impression.

The Parrot Party, tabletop and wall lamps. Pure and functional design is coupled with the elegance of Lladró works. The refined forms of the supports, reminiscent of the abstraction of a tree, contrast with the minute plumage of the birds.

The decorative potential of lovebirds, cockatoos, parakeets and parrots, their bright coloring and the carefully studied proportion all add to the realism of a scene in which it seems as if the birds have just alighted on a brief rest during their flight.
