lotus and carp

standard design height 2250mm/90". Different design heights are available as required

Painted in the 'unconscious style', a softer, more traditionally Chinese painting method akin to calligraphy, this is a variant on the bird and flower motif. The carp and wisteria can be embroidered to add additional interest.

915mm/36" wide

Fashionably-attired monkeys engage in various human pursuits set against a fantastical landscape of mountains, rivers and pagodas. Hand-painted touches of hand-embroidery it evokes a frivolous yet sophisticated feel.

C056 china trade

A hand-painted scenic portraying aspects of 18th century Chinese life and industries. The story unfolds from left to right as the journey follows the working of land through to goods passing through the Hongs of Canton.

chinoiserie collection

We aspire to retain the elegance of this 18th Century aesthetic whilst bringing something new to the genre, offering both traditional and contemporary palettes. Our collection is based on designs of varying densities. Individually hand-painted, each of the design layouts are available in over 60 standard colourways, with optional embellishment of hand-embroidery and a variety of backgrounds including silk, frescoes and metallics.

What is shown here is a starting point. Any design or colour element can be customized or interchanged to achieve the client's desired affect.

design layouts

There are a variety of design layouts, colourways and background options of silk, frescoes, lacquering and metallics. Designs are hand-painted with the option of adding embroidery. What is shown here is a starting point. Any element can be customised or interchanged to achieve the exact desired effect. All Fromental wallpapers are redesigned to fit your exact elevations.

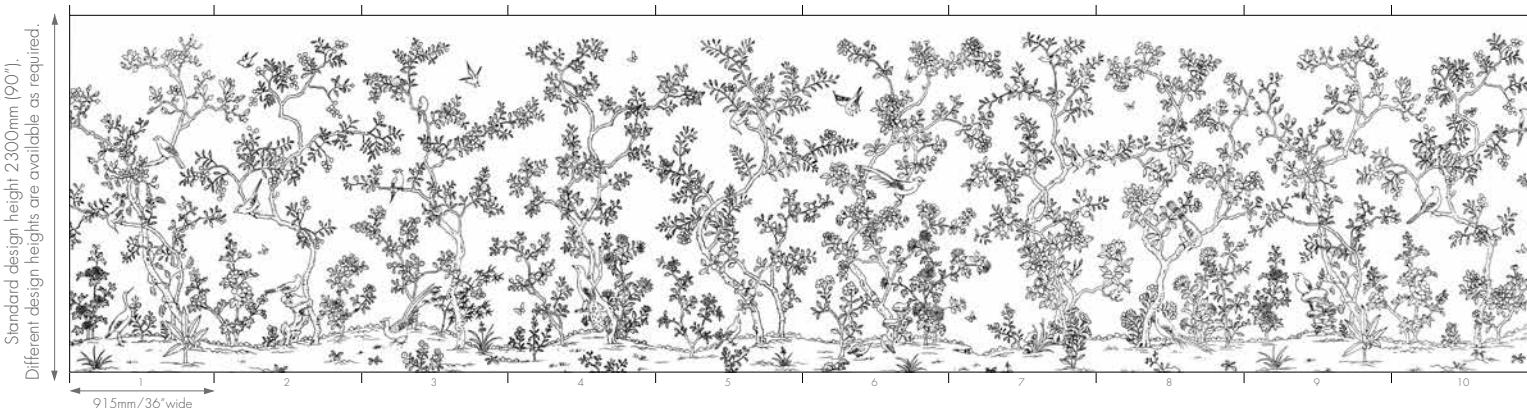

C051 cibar

Our newest addition to the chinoiserie collection. Cibar is a more open bamboo design.

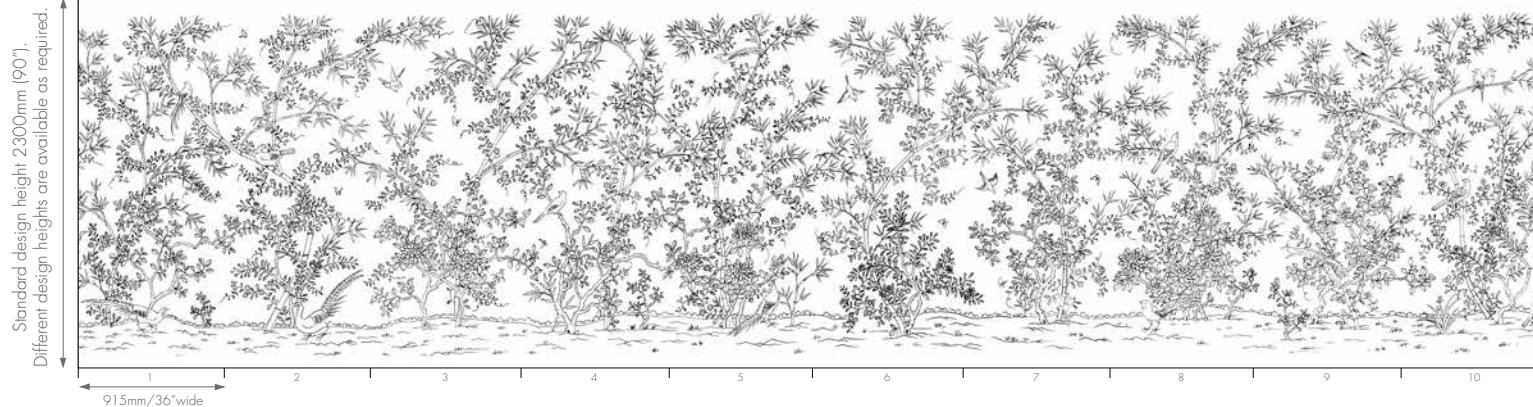

C008 sylvaner

The most pared down of our collection, elegant and understated. Most suitable as a backdrop in a room, rather than a dominant feature.

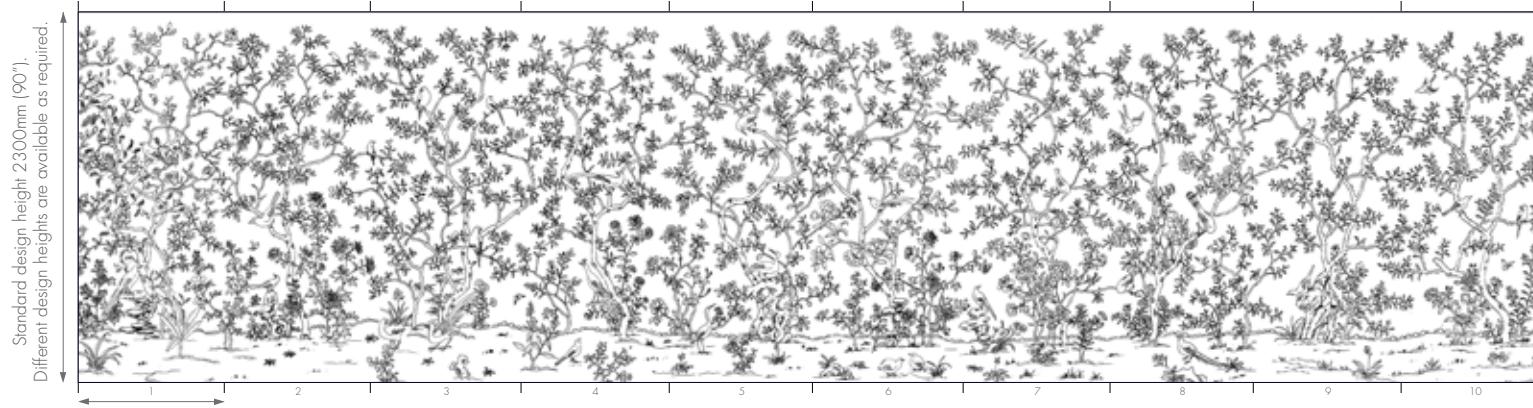

C001 nonsuch

This design has many elements drawn from historic papers. Highly decorated but with open spaces creating a winding composition across the walls.

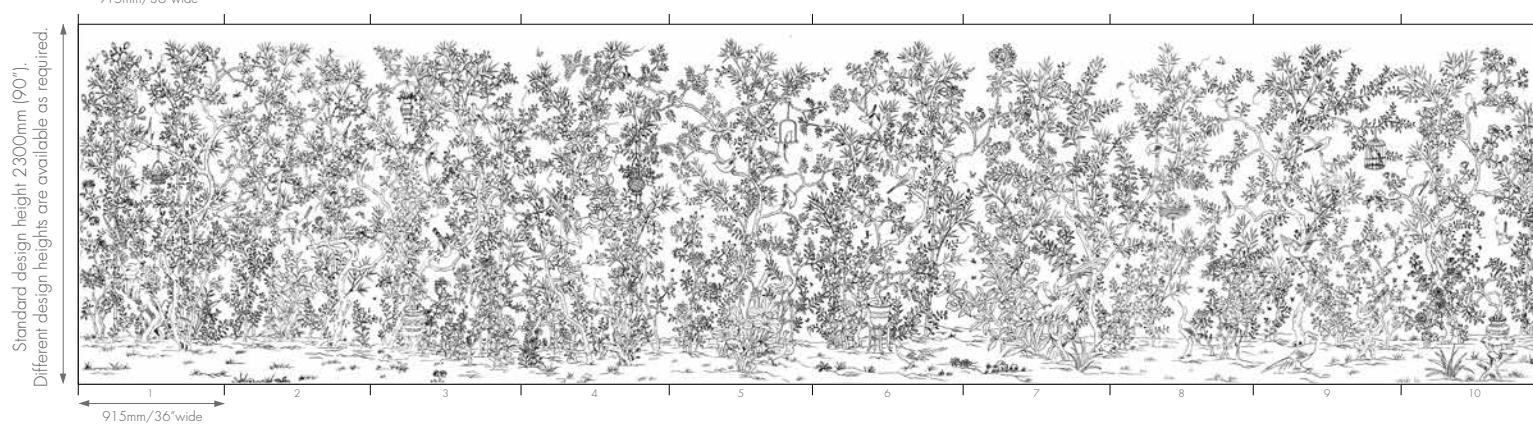

C026 paradiso

Incorporating bamboo amongst a variety of flora, this design works particularly well in bold colours. A modern take on originally 18th Century Chinoiserie.

C045 floribunda

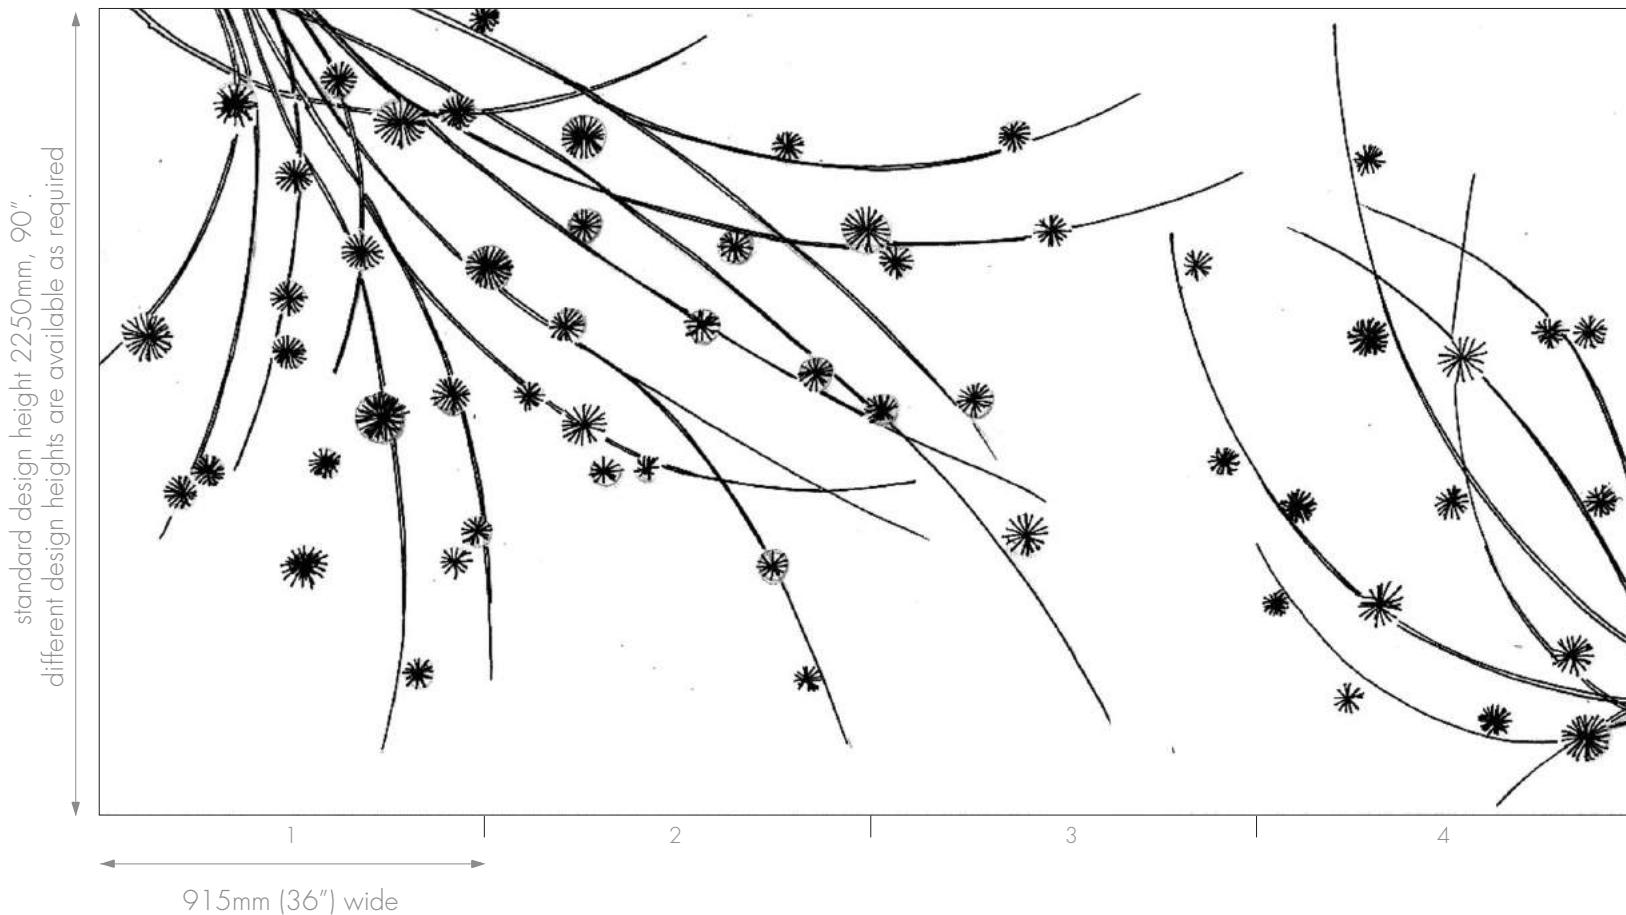

A very dense design which runs off the wall. Traditional and sophisticated, a visually arresting full composition which works best in a large room.

C017 millefleurs

'A thousand flowers', the delicacy and intensity is homage to the original spirit of chinoiserie. Perspective is created by a background of bamboo, overlaid with minutely detailed flora and fauna, hanging baskets and ornamental jar.

Handpainting and/or embroidery on fine paper backed Habotai silk.

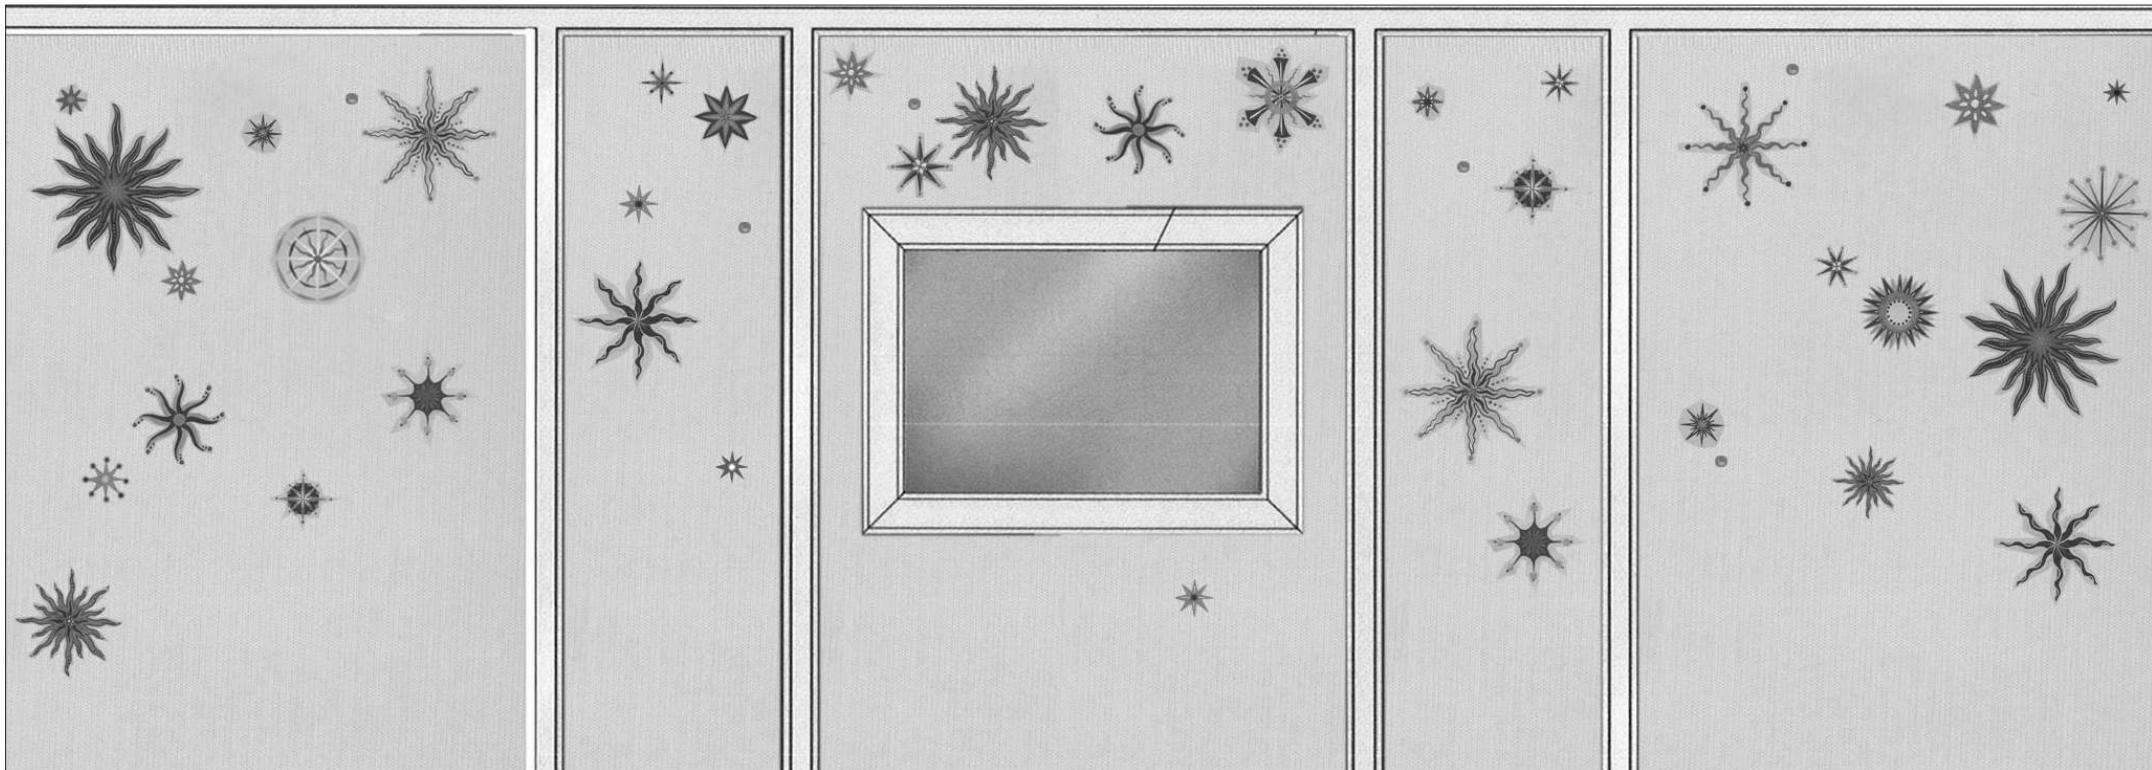

Each fromental wallpaper design is recomposed to fit the specific elevations of your room.

A standard panel is 36" / 915mm wide. The height varies according to the requirements of each room.

design - custom

etoiles

Etoiles is a Roger Thomas design in collaboration with fromental.

Each fromental wallpaper design is recomposed to fit the specific elevations of your room. The etoile layout can be created using your own choice of colourways, scale and composition.

Each fromental wallpaper design is recomposed to fit the specific elevations of your room.

A standard panel is 36"/915mm wide. All panels are supplied with extra trim at the bottom and at the top.

prunus

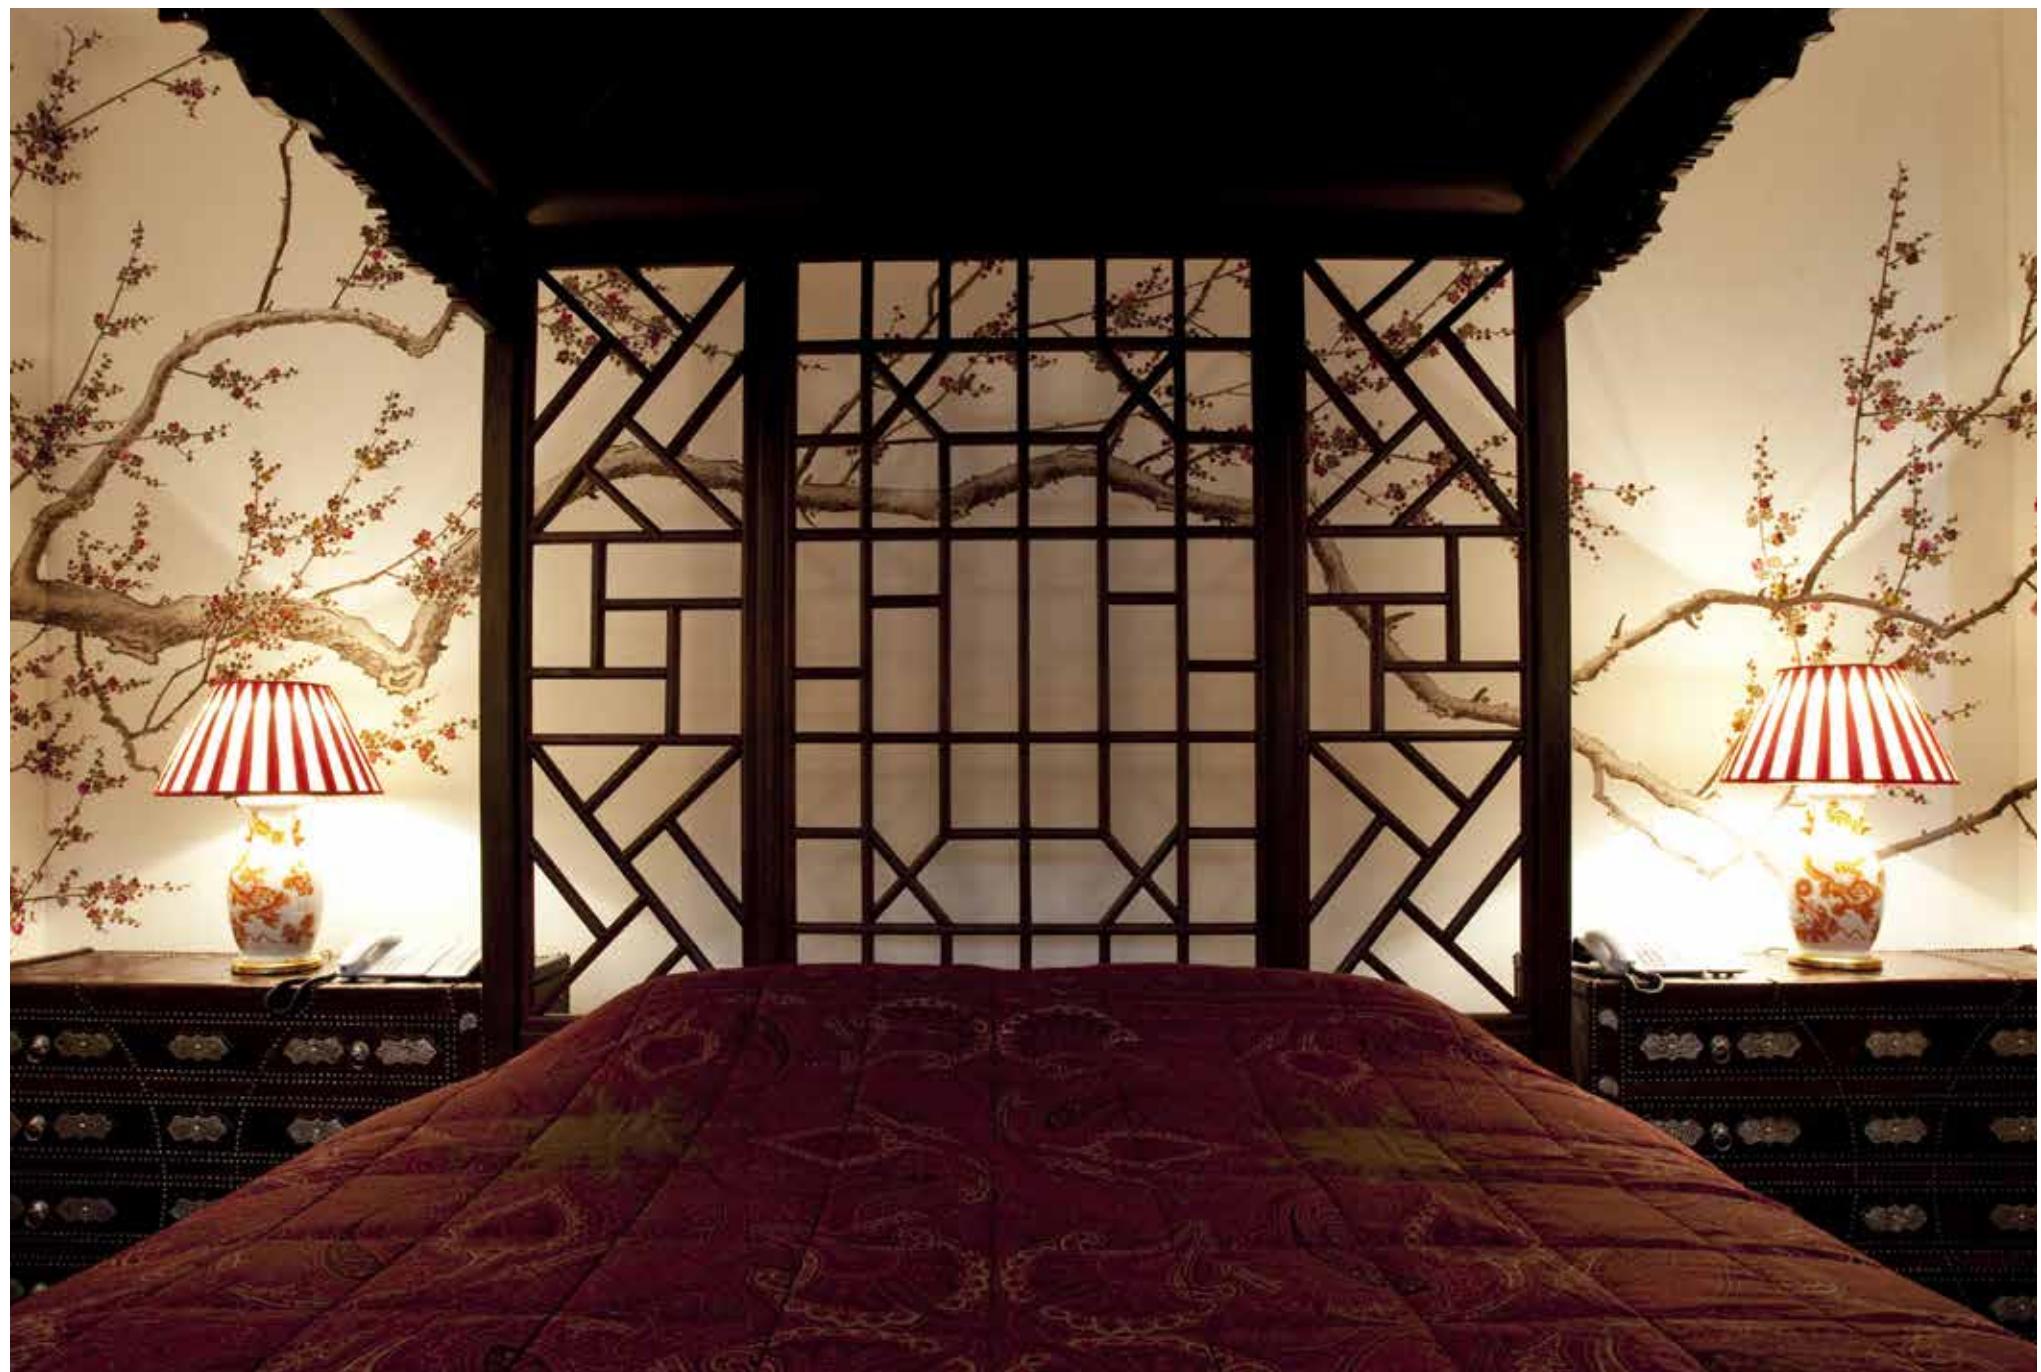

Inspired by the work of influential Chinese painter Qi Baishi, prunus depicts a rich blossom tree painted in an 'unconscious' style. The blossoms are painted and embroidered, the backgrounds a variety of plain and striated silks. Supremely elegant and beautiful, this design has quickly become a favourite for master bedrooms and dining rooms.

Inspired by the illustrative work of Christian Bérard, loose gestural brushstrokes are rendered on an architectural scale to create a sequence of decorative panels. Hand-painted onto silk, Bérard is available in a variety of styles including Classical, Art Deco, 18th Century, Tudor and Rococco. Within each style, a range of architectural and decorative elements are selected and the design is then recomposed to fit the specific elevations of your room.

Panel width is 915mm wide. The height varies according to the requirements of each room. We can also provide narrow width panels at 750mm.

R027 Boreas

HOW TO ORDER :

Panel length:

Boreas panels are supplied as cut length panels. The length of these panels is specified up to a standard length of 3.6 m. Longer lengths are available but may carry a surcharge.

Grain direction:

Boreas panels can be supplied only with parallel grain direction.
Parallel grain has the grain running along the length of the panel.

PARALLEL GRAIN

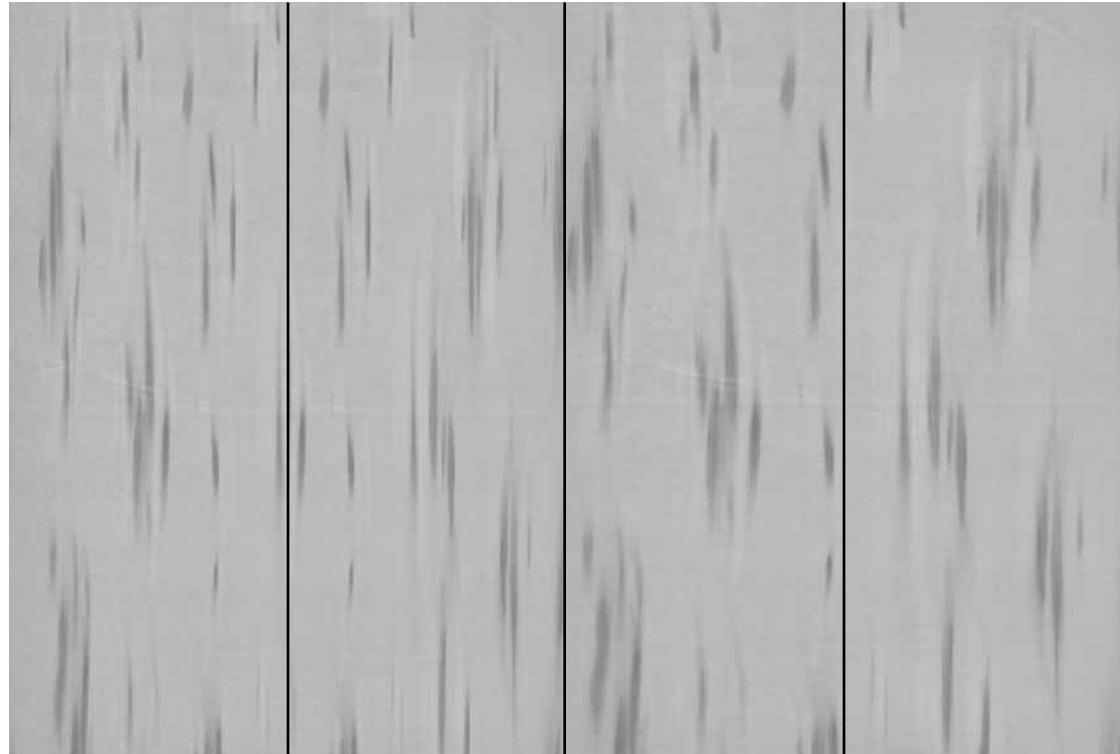

fromental

RO27 Boreas

Installation layouts:

Each grain type (parallel and perpendicular) can be installed various ways to create different effects.

PARELLEL GRAIN - PANELS HUNG VERTICALLY:

Panel length:

Cut panel length is based on specified as 100 mm higher than wall height.

Panel quantity:

Panels are supplied at 915 mm/36" wide. Required panel qty is wall width or room perimeter divided by 915 mm/36". We recommend purchasing at least one spare panel. Each order is hand-made and we cannot guarantee that an extra order produced later will be a good colour match.

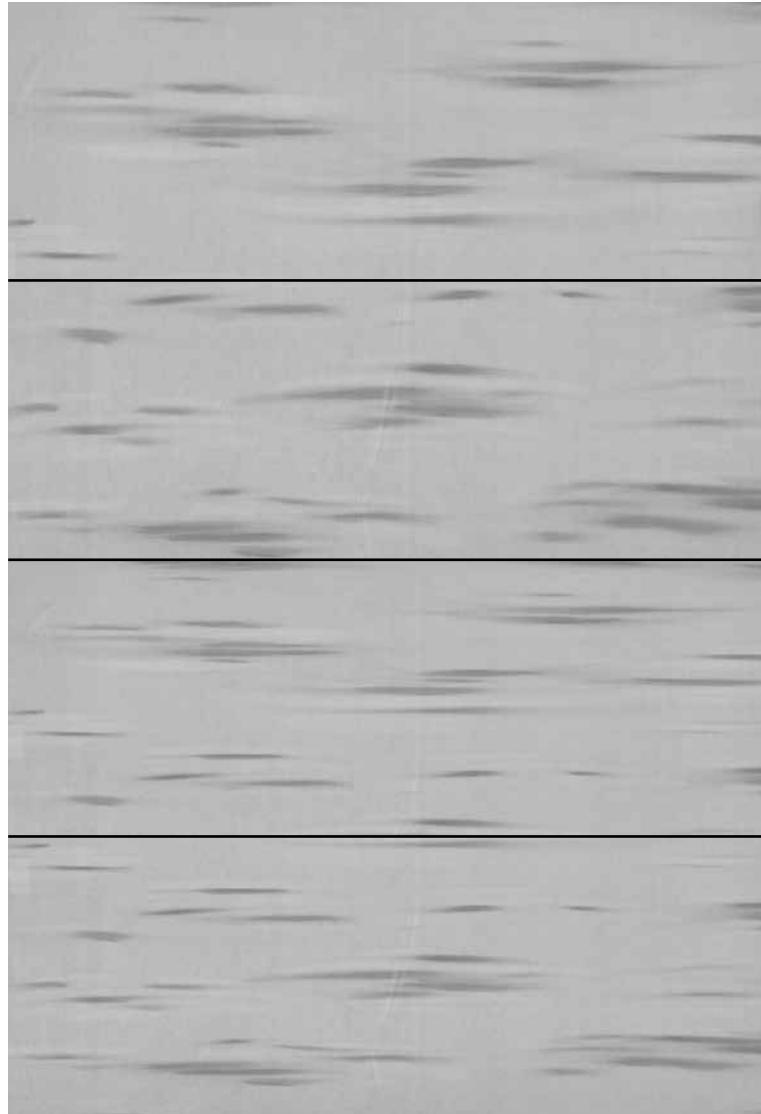

fromental

R027 Boreas

Installation layouts:

Each grain type (parallel and perpendicular) can be installed various ways to create different effects.

PARALLEL GRAIN - PANELS HUNG HORIZONTALLY:

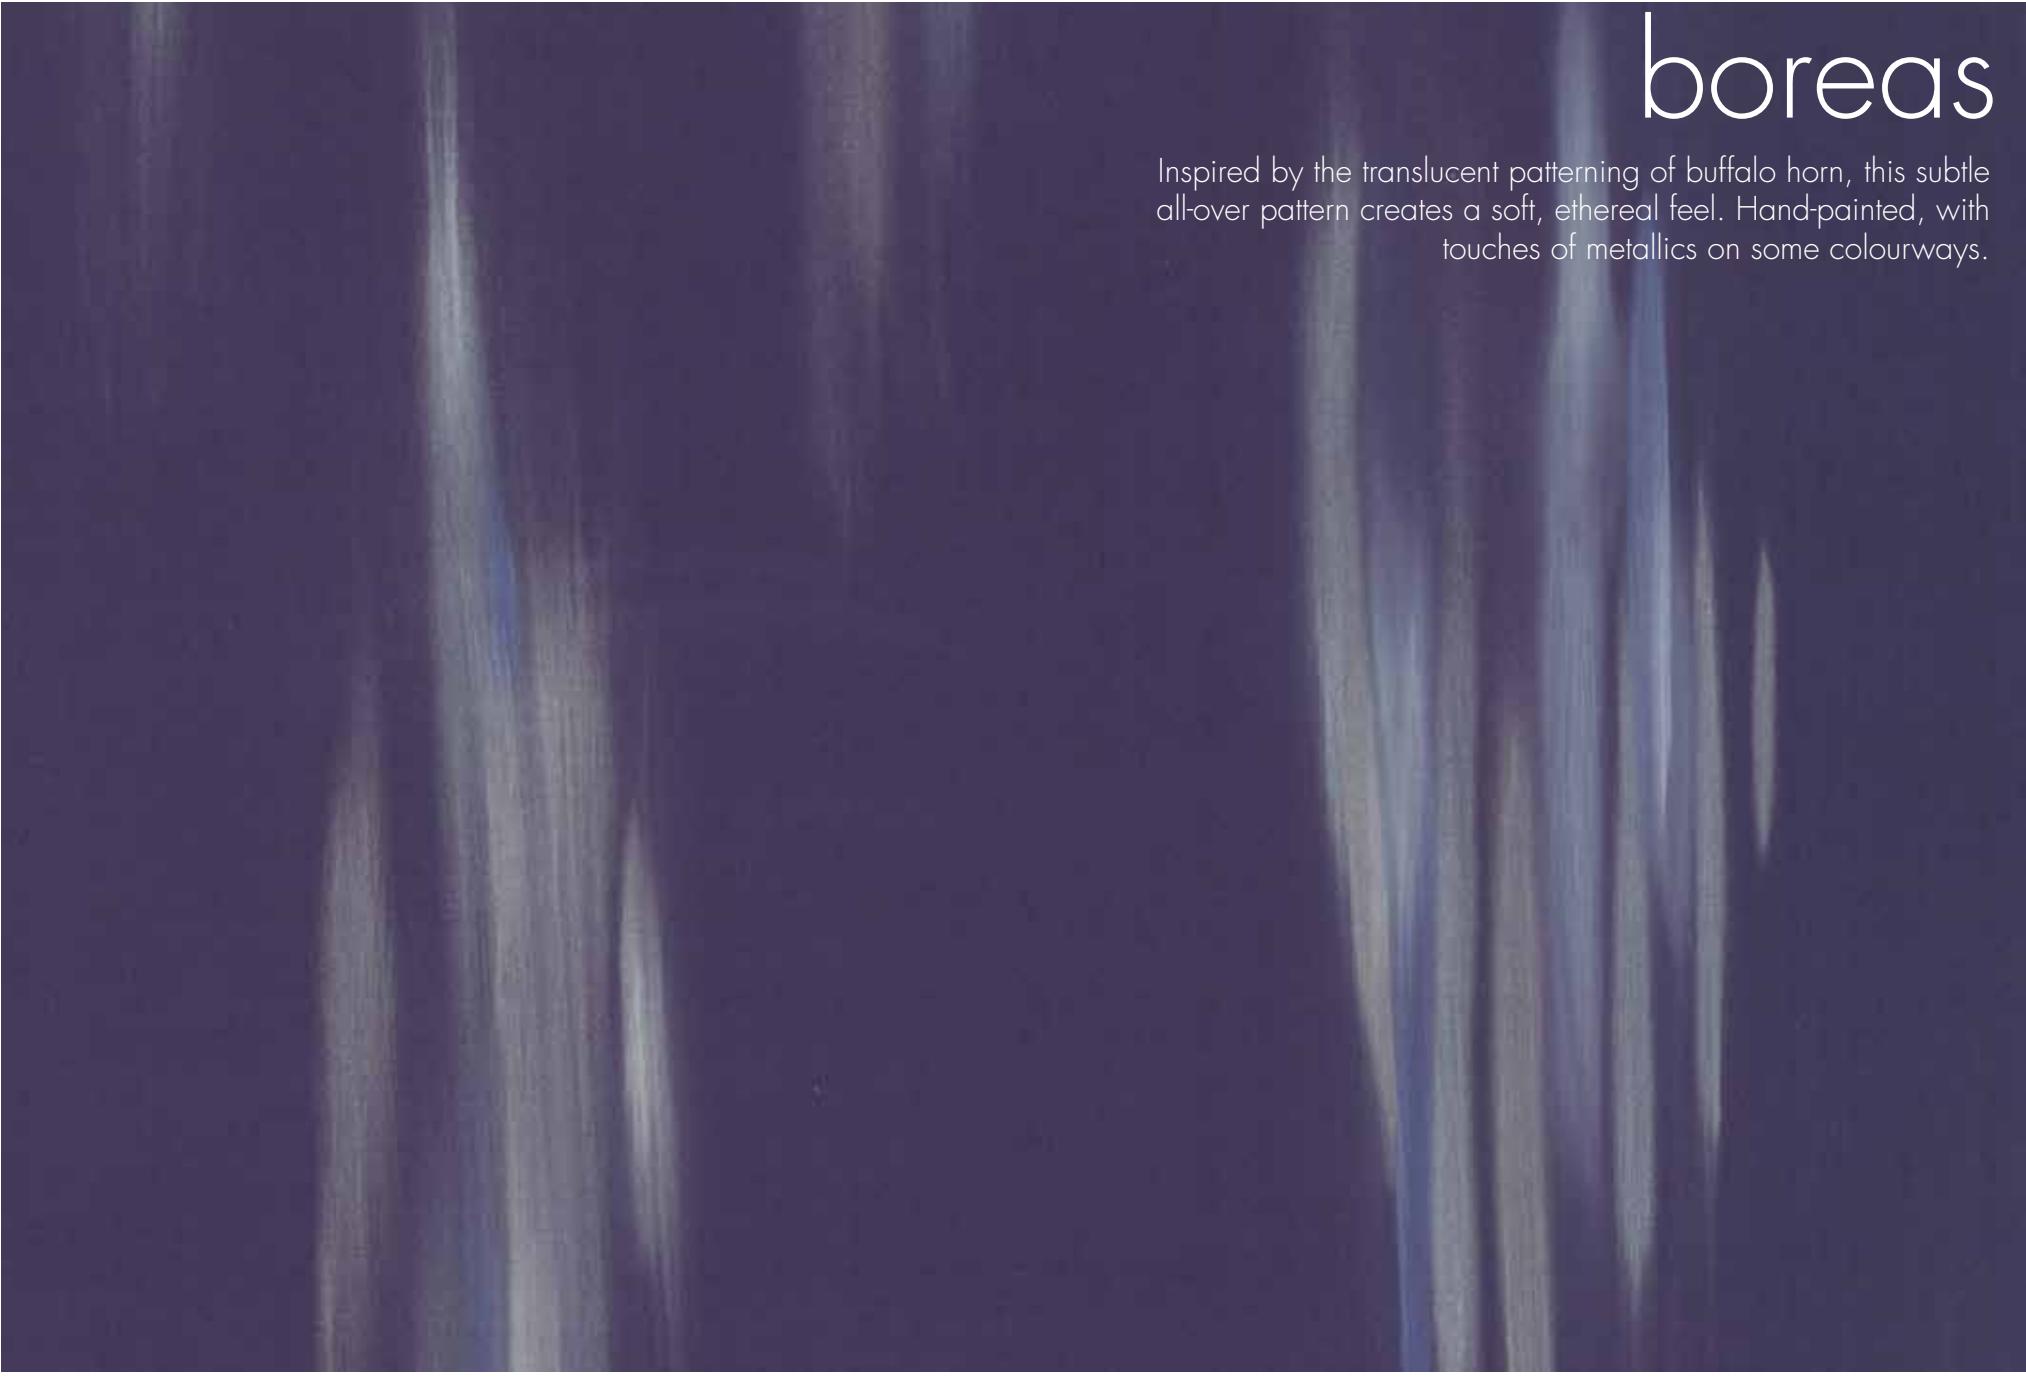

For an ideal installation panels should run across whole walls with no panel joins.

Panel joins will be visible as the grain on each panel will not line up and pattern match.

As such each wall should be calculated in turn and a variety of cut lengths and qty should be specified.
If drawings of the room are submitted fromental will happily work out the ideal qty and size.

boreas

Inspired by the translucent patterning of buffalo horn, this subtle all-over pattern creates a soft, ethereal feel. Hand-painted, with touches of metallics on some colourways.

RT004 roche météore

Fantasy grained gemsare set into a bold framework. The inspiration behind this pattern is a mid-century bronzework in St Germain des Pres. The design is presented in two arrangements with differing density of pattern . Custom colour and layouts can be created. The design is available in two different syandard layouts (A+B). Custom layouts are also available.

ukiyo-e block

Made famous by Hokusai and Hiroshige, the delicate colours and bold graphics of Japanese woodblock prints could not fail to inspire us.

"Block" the first design in our ukiyo-e fabric collection, is hand painted and gilded onto fine Italian velvet.
