«WOULD YOU LIKE TO TALK»

Interview to Piero Gandini by Fabrice Paineau

Would you like to talk about my background? (…) — I come from quite a funny, let's just say unusual, family. My mother, with her aristocratic background and an innate sense of elegance, shared nonetheless with my father quite a modern vision of life. She ran a furniture store, filled with ill-assorted objects, including objects by famous designers. As children, my twin sister and I would hide among Le Corbusier designs for instance. You can say I was literally immersed in design! My father, for his part, came from a far humbler background and was a self-made man, quite a charismatic individual, and what's more creative, naturally, full of an enthusiasm I seem to have inherited. Fortunately or unfortunately.

Would you like to talk about my adolescence (…) — As you would expect, like many others, my relationship with my father was sometimes strained. I was a bit of a lousy student coupled with an eternal adolescent, until I turned 25. I was a problem for some time: I would go pub-crawling; I would skive off school months on end, up to 7 months – my record! Of course, I would sign the notes explaining my absence instead of my father. And later, I don't know how I managed but I skipped the army to end up loafing in university, studying philosophy and history, classes I only very seldom attended. To put it briefly, let's just say I enjoyed myself, like some teenagers who are bent on enjoying life.

Would you like to talk about how I became responsible? (…) — I tried to sign a truce with my father to be able to go abroad for a while. Life elsewhere, to temper my spirits. At the time we had a subsidiary in New York and I could picture myself among the skyscrapers. My father had another nice surprise in store for me: I joined a firm we owned in Northeast Germany, in a remote village. I didn't speak a word of German. That may have marked the beginning of my redemption and the end of my wild nights! Every morning, I had an 8am meeting at the factory: obviously a certain sense of discipline took hold. I only returned in 1987 when my father suggested it, but I already had in mind to broach the brand differently. I therefore asked my father to give me the use of an empty warehouse next to our offices in Brescia.

Would you like to talk about my memories, Castiglioni, Scarpa, Starck? (…) — They would all show up in that warehouse, it was great. To me, they were like tennis champions: can you imagine having a meeting simultaneously with Federer, Nadal, Djokovic…! Castiglioni was a colourful character who would laugh and even shout sometimes. I remember one day he had found one of the mock-ups awful, he wouldn't stop screaming, gesticulating like a madman on the chair on wheels on which he was seated, practically slaloming in the large office. With Scarpa, things were different: he was strictness incarnate, even inflexible but he did give a lot in his own way. He was capable of focusing intensely. He taught me all the shades of colours. He was both a mentor and a poet. Starck, for his part showed up one day with a beautiful woman, announcing that he loved Flos: just like that, true to himself. A very energetic man who came to show us his Arà lamp, named after his daughter. He wanted an original packaging like always in his generous and democratic approach of design. The relationship Flos has with Philippe Starck is unique. In his own way he has found the link with the origins of the brand, when Achille Castiglioni and his brother created one of the most beautiful lamps in the world with a car headlight and a cable. In a sense, Starck's collaboration with Flos contributes to refuting the elitism in design which can smother ethics. His Miss Sissi lamp, simple, direct and affordable sums up this adventure. It's above all a human experience we share.

Would you like to talk about the strategy I have adopted (...) — I have always been someone who listened to his guts: a kind of aggressive and creative individual and my hobbyhorse has always been the avant-garde. It's a disease that runs in the family. I don't know if I'm creating for a niche of enthusiasts, but all the products have imposed themselves thanks to the heart of those who have designed them. Admittedly, they were some tough times. In 1996, when I became CEO, I wanted to give Flos an international scope. So I had to restructure, sit down every morning at my desk to try to grasp the chances of a new future. I had to make drastic choices I don't regret, and which today give the company financial reliability. At the time, we still owned Arteluce which my father had taken over in the 70s, a great adventure begun in the 30s when the collections by great designers such as Gino Sarfatti belonged in the catalogue. I then decided in 1998 to concentrate the two companies' activities under Flos, the innovative potential of Arteluce and Flos feeding and enriching one another. When I discussed this project with Starck and Castiglioni, I thought it might be touchy, but they assured me of their support. The next collaborations with new designers such as Jasper Morrison, Konstantin Grcic, Marc Newson, etc., unfolded naturally in this new state of affairs.

Would you like to talk about my convictions (…) — Each time a project is launched, we feel we are about to make the best lamp in the world, that's it. It's Flos's philosophy. With the competitive capacity to reach our goal because I want the idea to prevail, to find its own path. That's the power of design, the passion instilled in a product, the complete chain of logistical and artistic commitment, from the know-how of the prototypist to the finished object. Everything can be deceptive too when you are facing issues: there lies also the spice of the trade. A seemingly simple product can take up to two years to be conceived and a project that seems complicated may only take eight months! The point being to control the investment capacity.

Would you like to talk about the object itself (…) — There is a language of objects and what is fascinating is that its lexicon evolves. How can the play with lights interact today? We have gone straight into the digital era and our work will undergo the same revolutions as the one of computers, and I am not only referring to the arrival of LED. We have the same issues as a company shifting from the era of hardware to the one of software. Those last five years have been the stage of great changes. We have an obligation to contribute creatively. My greatest hope is for the relation between lamps and individuals to evolve yet again. A lamp today is a quiet object. Its limit is the electric cable. For logistical and aesthetical purposes it must always be more or less close to a wall, behind a bed… But its autonomy is bound to evolve, likewise the « cable » has become « fibre », a question of speed, of communication. The very basis of this digital revolution indicates infinite possibilities. An experience was led in a hospital in the United States on the technological equipment used to improve patient care in bedrooms. The problem of the cumbersomeness of this material seems to have been solved by an application which activates directly all this system, and without using cables. The future of objects must undergo the same evolution: the lamp of the future holds in a sense the same relation an iPad has to a computer, to put things in a nutshell.

Would you like to talk about the future and the past (…) — We have archives at our disposal in order not to forget. Originally, the idea came from my mother. Before that, we didn't bother with the past. One day she came and suggested that we should we restore order by setting up archives, an insane logistical project which I couldn't imagine facing because of the many expenses it would generate. As a result she took it on singlehandedly and undertook the huge enterprise, with over 50 years of existence examined from all angles, more than 30.000 pictures archived. The past uncovered. It enabled us for instance to showcase original pieces by Gino Sarfatti at the Milan Triennale for huge retrospective exhibition that we sponsored, and to re-edit a few of his models. They were replicated, in their original version, but fitted with a LED light to give them a new future.

Would you like to talk about light (…) — Which light? I recently travelled to Asia. There is always a mystical aspect to that area. I remember a dying fire I saw there in which the ashes were still glowing red. It's the most beautiful of lights.

Would you like to talk about light again! (…) — I know there are lights that remain to be tamed. I love for instance Ingo Maurer's work As an individual, he is incredible, pure, tough, uncompromising and so enchanting. I'd also love to work with artists in the league of Jenny Holzer. I remember this fantastic moment, on a beach: she was projecting words in light on the waves. Those sentences she is famous for that disappeared as soon as the waves broke and the foam formed. A true dream.

«In a dream you saw a way to survive and you were full of joy» — Jenny Holzer

« VOGLIAMO PARLARE DI »

Conversazione con Piero Gandini di Fabrice Paineau

Vogliamo parlare delle mie origini? (…) —Vengo da una famiglia piuttosto divertente. Fuori dagli schemi, diciamo. Mia madre, con le sue origini aristocratiche e un innato senso dell'eleganza, nonostante tutto condivideva con mio padre una visione del tutto moderna della vita. Gestiva un negozio di arredamento, pieno degli oggetti più disparati, tra cui pezzi di famosi designer. Da bambini, io e la mia sorella gemella giocavamo a nascondino tra i Le Corbusier, ad esempio. Si può dire che fossi letteralmente sommerso dal design! Mio padre, invece, veniva da una famiglia molto più umile e si era fatto da solo. Un uomo piuttosto carismatico e per di più creativo, in modo naturale, pieno di un entusiasmo che io sembro avere ereditato. Per fortuna o per sfortuna.

Vogliamo parlare della mia adolescenza? (…) —Come in molte altre famiglie, il rapporto con mio padre a volte era teso. Ero un pessimo studente e per di più ho mantenuto uno spirito da eterno adolescente fino ai 25 anni. Per un certo periodo sono stato problematico: andavo in giro per i pub, saltavo la scuola per mesi di seguito (ho raggiunto un record di 7 mesi!). Ovviamente falsificavo la firma di mio padre sulle giustificazioni. Più tardi, non so come, riuscii a evitare il servizio militare e finii a oziare all'università, alla facoltà di storia e filosofia, dove frequentavo i corsi molto di rado. In poche parole, diciamo che mi sono divertito come molti degli adolescenti che vogliono godersi la vita.

Vogliamo parlare di come sono diventato responsabile? (…) — Provai a raggiungere a una tregua con mio padre per poter andare all'estero per un po' di tempo. Volevo andarmene lontano per temprare lo spirito. All'epoca avevamo una filiale a New York e io già mi immaginavo tra i grattacieli. Ma mio padre aveva un'altra bella sorpresa in serbo per me: mi mandò a lavorare in un'azienda di nostra proprietà nel nordest della Germania, in un paesino sperduto. Non conoscevo una sola parola di tedesco. Questo probabilmente ha segnato l'inizio della mia redenzione e la fine delle mie notti brave! Alle 8 di ogni mattina avevo una riunione in stabilimento: per forza di cose dovetti maturare un certo senso della disciplina. Tornai solo nel 1987

quando lo suggerì mio padre. Ma avevo già in mente un approccio diverso al marchio, quindi gli chiesi di lasciarmi utilizzare un magazzino vuoto vicino ai nostri uffici di Brescia.

Vogliamo parlare dei miei ricordi, Castiglioni, Scarpa, Starck? (…) — Venivano tutti a trovarmi in quel magazzino, era grandioso. Per me erano come teste di serie del tennis: immaginate di incontrare contemporaneamente Federer, Nadal, Djokovic…! Castiglioni era un personaggio pittoresco che rideva sempre e a volte addirittura urlava. Ricordo che un giorno non smetteva di gridare perché uno dei modelli gli sembrava orrendo, gesticolava come un pazzo seduto su una sedia a rotelle, facendo praticamente lo slalom per tutto il grande ufficio. Con Scarpa le cose erano diverse: era la severità fatta persona, addirittura inflessibile, ma molto generoso a suo modo. Era in grado di concentrarsi al massimo. Mi ha insegnato tutte le sfumature del colore. Era allo stesso tempo un mentore e un poeta. Starck, dal canto suo, arrivò un giorno accompagnato da una donna bellissima, dichiarando di amare la Flos: così, semplicemente, fedele a se stesso. Un uomo pieno di energia, che era venuto a mostrarci la sua lampada Arà, che prendeva il nome da sua figlia. Voleva un packaging originale, come sempre nel suo approccio generoso e democratico al design. Il rapporto che Flos ha con Philippe Starck è unico. A modo suo, ha trovato un modo di legarsi alle origini del marchio, quando Achille Castiglioni e suo fratello creavano una delle più belle lampade al mondo con il fanale di un'automobile e un cavo. In un certo senso, la collaborazione di Starck con Flos concorre a confutare quell'elitarismo nel design che arriva a soffocare l'etica. La sua lampada Miss Sissi, semplice, diretta e accessibile, riassume questa avventura. Quella che condividiamo è soprattutto un'esperienza umana.

Vogliamo parlare della strategia che ho adottato? (…) — Sono sempre stato uno che segue l'istinto, una sorta di aggressivo e creativo. Il mio chiodo fisso è sempre stato l'avanguardia. È una sorta di tara genetica. Non so se i destinatari dei miei progetti siano una nicchia di grandi appassionati, fatto sta che tutti i prodotti si sono imposti grazie al cuore di chi li ha immaginati. Bisogna riconoscere che ci sono stati momenti duri. Nel 1996, quando sono diventato Amministratore Delegato, volevo dare a Flos un respiro internazionale. Quindi dovevo ristrutturare, sedermi ogni giorno alla mia scrivania e provare a cogliere le occasioni di un nuovo futuro. Ho dovuto prendere decisioni drastiche di cui non mi pento e che oggi hanno dato affidabilità finanziaria alla società. All'epoca eravamo ancora proprietari di Arteluce, rilevata da mio padre negli anni settanta, una grande avventura iniziata negli anni trenta, con un catalogo che conteneva collezioni di grandi designer come Gino Sarfatti. Nel 1998 decisi quindi di concentrare le attività delle due società sotto il nome di Flos: il potenziale innovativo di Arteluce e Flos le avrebbe alimentate e arricchite mutualmente. Quando discussi di questo progetto con Starck e Castiglioni pensavo che avrebbe potuto essere un argomento delicato, ma i due mi assicurarono il loro supporto. Le successive collaborazioni con nuovi designer come Jasper Morrison, Konstantin Grcic, Marc Newson, ecc. si svilupparono in modo naturale in questo nuovo stato di cose.

Vogliamo parlare delle mie convinzioni? (…) — Ogni volta che lanciamo un nuovo progetto, ci sentiamo come se stessimo per creare la migliore lampada al mondo, ecco. È la filosofia di Flos. Con la capacità competitiva necessaria per raggiungere il nostro obiettivo, perché voglio che l'idea abbia la meglio, trovi la sua strada. Questo è il potere del design, la passione che si trasmette a un prodotto, la catena che unisce impegno logistico e artistico, dal know-how dei prototipisti all'oggetto finito. Quando ci si trova dinnanzi a dei problemi tutto può diventare ingannevole: ma il bello è anche questo. Un prodotto apparentemente semplice può richiedere fino a due anni prima di essere elaborato e un progetto che sembra complicato può vedere la luce in soli otto mesi! Il punto è saper controllare la capacità di investimento.

Vogliamo parlare dell'oggetto in sé? (…) — Esiste un linguaggio degli oggetti e ciò che affascina è il fatto che il suo lessico si evolva. Come interagisce oggi il gioco di luci? Siamo approdati dritti dritti nell'era digitale e il nostro lavoro subirà una rivoluzione paragonabile a quella dei computer, e non mi riferisco solo all'arrivo del LED. Abbiamo gli stessi problemi di una società che passa dall'era dell'hardware a quella del software. Questi ultimi cinque anni sono stati teatro di grandi cambiamenti. Noi abbiamo l'obbligo di contribuire dal punto di vista creativo. La mia più grande speranza è che il rapporto tra lampade e individui si evolva di nuovo. Oggi la lampada è un oggetto semplice. Il suo limite è il cavo elettrico. Per scopi logistici ed estetici, deve essere sempre più o meno vicina a una parete, dietro un letto… Ma la sua autonomia è destinata a evolversi, così come il "cavo" è diventato "fibra": è una questione di velocità, di comunicazione. Le fondamenta stesse di questa rivoluzione digitale suggeriscono infinite possibilità. Lo si è visto in un ospedale degli Stati Uniti, con i dispositivi tecnologici utilizzati per migliorare l'assistenza ai pazienti nelle stanze. Il problema dell'ingombro dei materiali pare sia stato risolto grazie a un'applicazione che attiva direttamente tutto questo sistema, e senza uso di cavi. Il futuro degli oggetti deve evolversi nello stesso modo: la lampada del futuro, in un certo senso, sta alla lampada del presente come un iPad sta a un computer, per dirla in poche parole.

Vogliamo parlare del futuro e del passato? (…) — Abbiamo a disposizione degli archivi, per serbare memoria. In origine, l'idea è venuta a mia madre. Prima, non ci preoccupavamo del passato. Un giorno è arrivata e mi ha suggerito di rimettere tutto in ordine allestendo degli archivi: un progetto logistico folle che io non pensavo di poter affrontare date le molte spese che avrebbe comportato. Così si è presa carico lei, praticamente da sola, di un lavoro immenso, esaminando oltre 50 anni di storia da tutte le angolazioni, archiviando oltre 30.000 immagini. Abbiamo riscoperto il passato. Questo ci ha consentito, ad esempio, di esporre lampade originali di Gino Sarfatti alla Triennale di Milano per una grande mostra retrospettiva di cui siamo stati sponsor. E di rieditare alcuni di questi modelli, riproducendone la versione originale, ma dotandoli di una luce LED per dare loro un nuovo futuro.

Vogliamo parlare di luce? (…) — Quale luce? Di recente sono stato in Asia. Si tratta di un luogo che ha sempre un alone mistico. Ricordo di aver visto un fuoco che si stava spegnendo, le cui braci erano ancora di un colore rosso vivo. Quella è la luce più bella di tutte.

Vogliamo parlare di nuovo di…luce!? (…) — So che ci sono luci che ancora non sono state domate. Ad esempio, adoro il lavoro personale di Ingo Maurer: lui stesso è un personaggio incredibile, puro, forte, intransigente e così magico. Mi piacerebbe anche lavorare con artisti del calibro di Jenny Holzer. Ricordo un momento fantastico, su una spiaggia: stava proiettando delle parole luminose sulle onde. Erano frasi che l'hanno resa famosa, che scomparivano non appena le onde si infrangevano formando la schiuma. Un vero sogno.

« In un sogno hai visto un modo per sopravvivere e la gioia ti ha pervaso ».
— Jenny Holzer

Achille Castiglioni, 1972

In alto: K. Grcic con May Day.
La lampada riceve il prestigioso Compasso d'Oro nel 2001.
A sinistra: Lampada adatta a molteplici usi e collocazioni: può essere posizionata su un tavolo, collocata a terra o sospesa, grazie alla pratica maniglia che assolve anche la funzione di avvolgicavo.

Top: K. Grcic with May Day, the lamp that received the coveted Compasso d'Oro award in 2001.
Left: It is a lamp suited to multiple uses and settings. With its practical handle that also acts as a cable winder, it can be placed on a table, on the floor or suspended.

Nata dall'idea dei fratelli Castiglioni di capovolgere una lampada a soffitto, al modello tradizionale supportato da una lampadina a incandescenza, si affianca la versione con sorgente LED a fosforo remoto.

Based on the Castiglioni brothers' idea of overturning a ceiling lamp, the traditional model with an incandescent bulb is joined by the version with a remote phosphor LED light source.

“Pensavamo a una lampada che proiettasse la luce sul tavolo: ce ne erano già ma bisognava girarci dietro. Perché lasciasse spazio attorno al tavolo la base doveva essere lontana almeno due metri. Così nacque l’dea dell’arco.”
- A. Castiglioni, intervista per Ottagono, 1970

“We were thinking about a lamp that shines light onto a table. They already existed, but you had to walk round them. To leave enough space around the table, the base had to be at least two meters away. Which was how the idea for Arco came into being.”
- A. Castiglioni interviewed for Ottagono, 1970

Flos Soft Architecture

Grazie all'innovativo materiale composito Under Cover della versione Soft, la lampada Spun Light si integra perfettamente all'architettura degli spazi affiorando dalla parete.

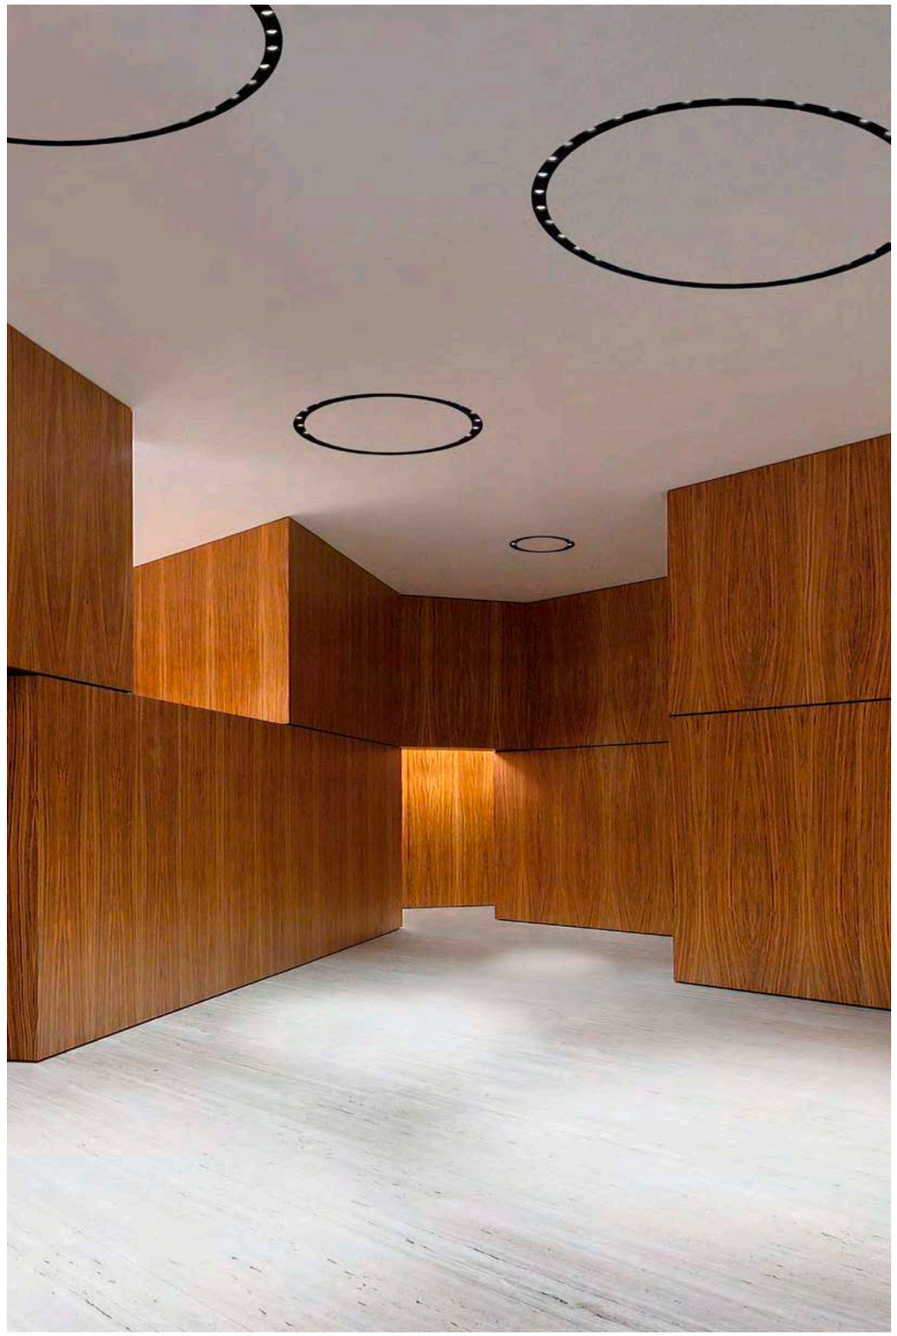

Making use of the Soft version of the innovative composite material Under Cover, the Spun Light integrates seamlessly with the architecture of spaces, rising out of the surface of the wall.

«A doctor can bury his mistakes,
but an architect can only advise his clients
to plant vines» — *Frank Lloyd Wright*

ARCHITECTURAL

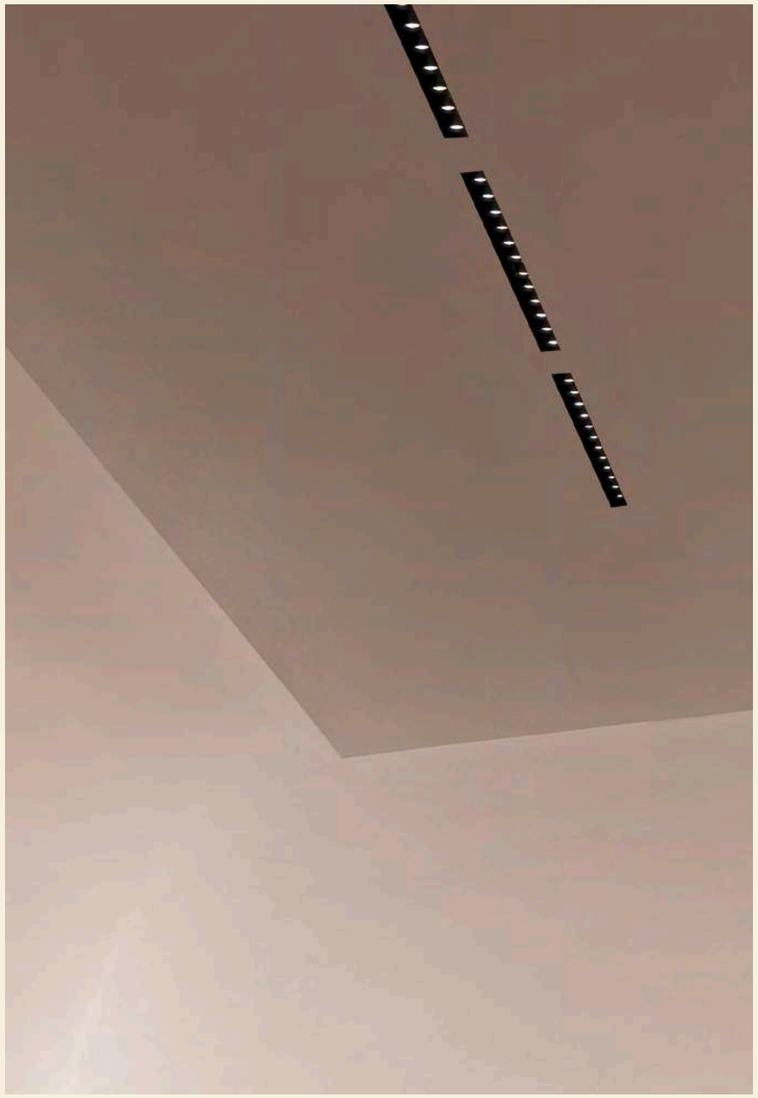

CIRCLE OF LIGHT

Flos Architectural

THE BLACK LINE

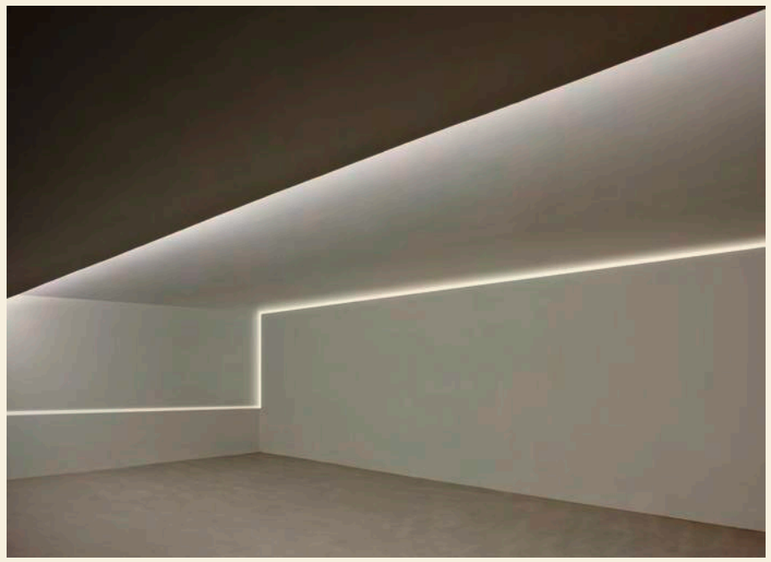

Flos Architectural

Moonline è una striscia sottile di luce che si integra perfettamente ed esalta l'architettura di uno spazio. Un ingegnoso sistema magnetico consente la facile sostituzione dei moduli LED.

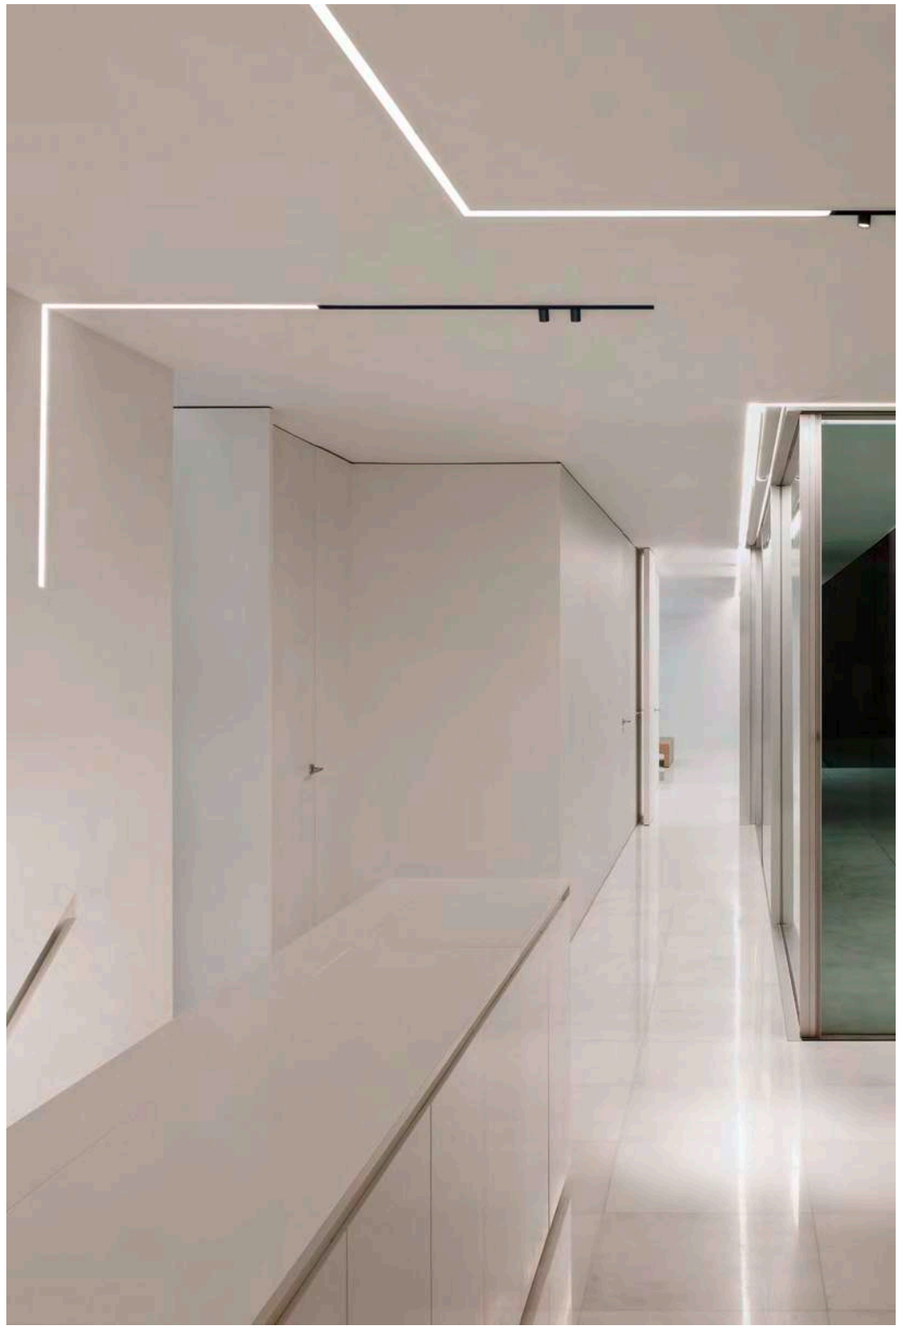

Moonline is a thin line of light that integrates seamlessly with spaces and enhances their architecture. An ingenious magnetic system makes for easy replacement of the LED modules.

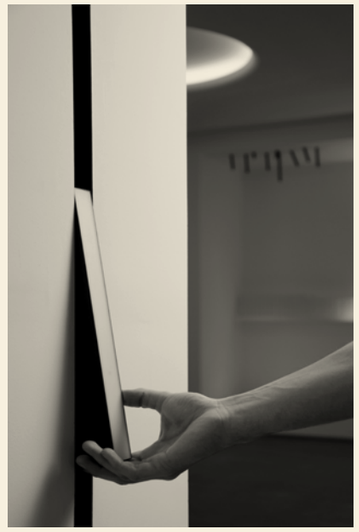

MOONLINE

F. Sinnaeve and S. Gunst

THE RUNNING MAGNET

Flos Architectural

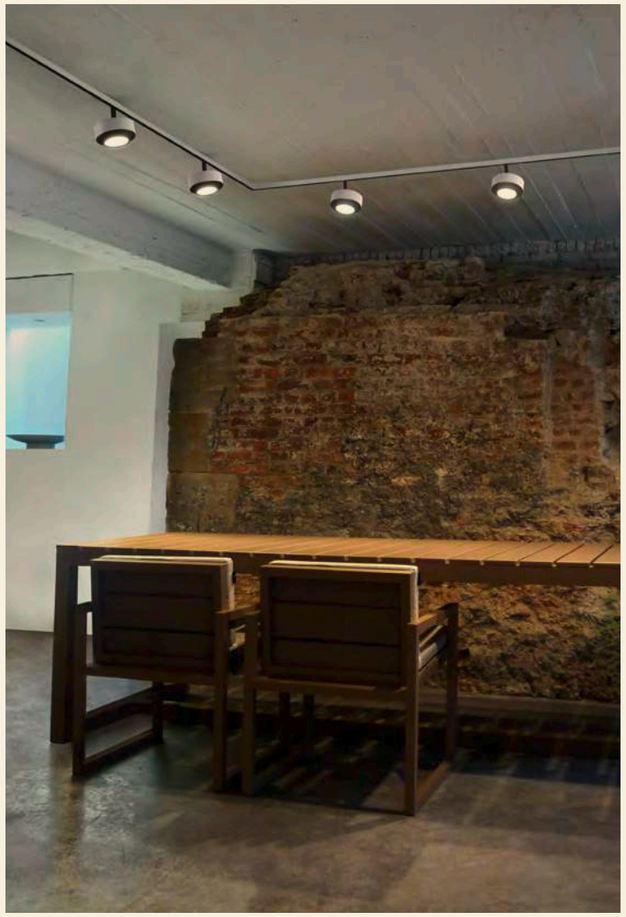

Per installazione da incasso, superficie o sospesa, The Running Magnet è formato da una serie di binari calamitati sui quali si posizionano moduli di illuminazione a LED, per luce di ambiente, di accento o decorativa. Il sistema di fissaggio magnetico ne permette la completa mobilità.

Integrated in plaster-board walls/ ceilings, installed on surfaces or suspended, The Running Magnet consists of a series of magnetic tracks on which LED lighting modules are installed, for ambient as well as accent or decorative light. The magnetic fixture system provides total mobility.

Il binario del futuro, con la tecnologia magnetica Flos applicata nelle dimensioni più ridotte possibili. Una sintesi perfetta di minimalismo, flessibilità, e luce di grandissima qualità.

The track lighting of the future, with Flos magnetic technology in the most compact dimensions possible. The perfect synthesis of minimalism, flexibility, and top quality lighting.

THE TRACKING MAGNET

POWER LED 9W 3000K CRI80 I head 200mm h 200/440/1000mm

Tim Derhaag, 2006

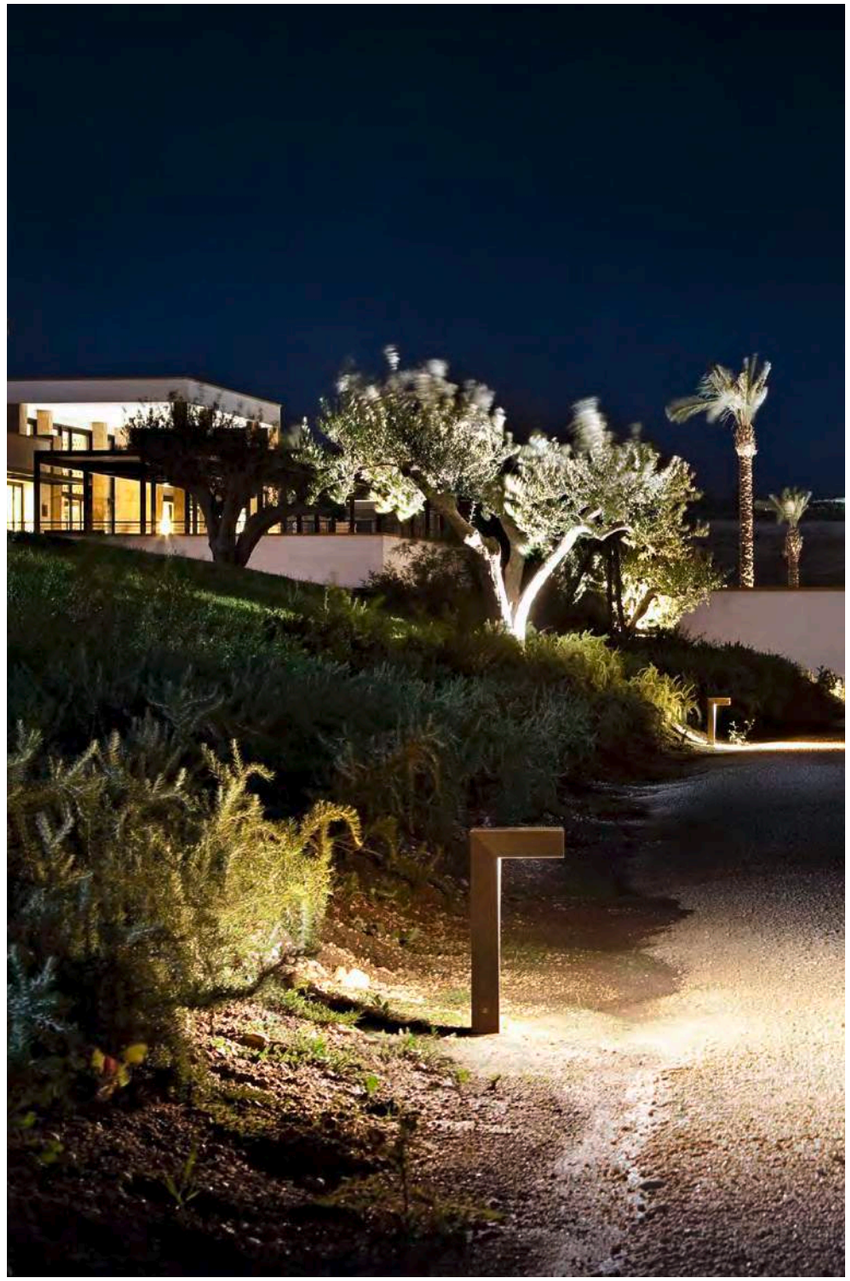

"La lampada 45 non è stata un progetto ma una scoperta. E' nata giocando con cubi e parallelepipedi. Come quando si scarabocchia parlando al telefono: riagganciando la cornetta ci si accorge del risultato e lo si guarda con un occhio diverso. E' qualcosa di molto semplice, eppure molto sorprendente." - T. Derhaag

"The 45 light was not designed. It was discovered while playing around with blocks and rectangles. Much like the way you would scribble drawings during a telephone call: you discover the result when you hang up the phone and look at them again. It's something very simple, yet very surprising."
- T. Derhaagag

CLASSIFICAZIONE E MARCHI DI CERTIFICAZIONE · CLASSIFICATION & HOMOLOGATIONS

Classi di isolamento delle lampade · *Luminaires classification*

Classe I: lampada la cui protezione contro la scarica elettrica non si basa solo sull'isolamento di base dell'apparecchio, ma su un ulteriore sistema di sicurezza che consiste nel collegamento dei componenti conduttivi accessibili a un conduttore di sicurezza (messa a terra) facente parte dellimpianto elettrico fisso · *Class I: Luminaire in which protection against electrical shocks is not just based on the basic insulation but also on an additional safety precautions consisting of connecting the accesible conductive parts to a safety conductor (earth)*

Classe II: Lampada la cui protezione contro la scarica elettrica non si basa solo sull'isolamento di base dell'apparecchio, ma su un ulteriore misura di sicurezza che consiste in un doppio isolamento rinforzato senza dispositivi per la messa a terra · *Class II: Luminaire in which protection against electrical shocks is not just based on the basic insulation but also on an additional safety precautions consisting of double reinforced insulation without conductive parts to a safety conductor (earth)*

Classe III: Lampada la cui protezione contro la scarica elettrica si basa su un sistema a bassissima tensione, che non viene mai superata. Una lampada di Classe III non deve mai essere fornita con la messa a terra · *Class III: Luminaire in which protection against electrical shocks is based on the very low safety supply voltage and no voltages are produced higher than this. A Class III luminaire must never be provided with earthing*

Omologazioni · *Homologations*

Tutte le lampade prodotte e presentate in questo programma sono state realizzate in conformità con la Norma Europea EN 60 598 e sono pertanto conformi ai requisiti definiti nella Direttiva CEE 73/23 (Direttiva di Bassa Tensione). La loro realizzazione garantisce anche la conformità alla Direttiva 89/336 per quanto concerne la Compatibilità Elettromagnetica. Tutti i prodotti rientranti nel campo di applicazione delle suddette Direttive riportano la marcatura CE, che ne attesta la conformità ai relativi requisiti · *All lamps manufactured and illustrated in this catalog comply with European Standard EN 60 598 and consequently meet the requirements set forth in Directive 73/23 EEC (Low Voltage Directive). They also comply with Directive 89/336 covering electromagnetic compatibility. All products falling under the scope of the above-mentioned Directives bear the CE mark as proof of their compliance with the respective requirements*

La presenza del marchio ENEC sul prodotto conferma l'adempimento della Normativa Europea e garantisce l'affidabilità del sistema organizzativo e produttivo responsabile della fabbricazione del prodotto, attraverso un ente di certificazione accreditato. Il marchio ENEC conferma il nostro impegno ed è la migliore garanzia in tema di sicurezza e qualità di tutti i nostri prodotti · *The ENEC mark on the product stands for the compliance of European Standard as well as a trustworthy organisation and product system and is guaranteed by an accredited certification body. This agreed mark stands for our engagement and represents the best guarantee in security and quality matter of our products*

L'Associazione Spagnola di Normalizzazione e Certificazione AENOR certifica che il Sistema di garanzia di qualità adottato dalla Antares Iluminación S. A. soddisfa i requisiti della Norma Europea EN ISO 9001: Sistema di Qualità.· *The Spanish Association for Standards and Certification AENOR, certifies that quality assurance system adopted by Antares Iluminación, S.A. complies with the requirements of the standard UNE-EN ISO-9001 Quality Systems.*

GRADO DI PROTEZIONE · DEGREE OF PROTECTION

IP
20

Indice di protezione contro la penetrazione di corpi solidi e di liquidi · *Protection degree offered by the fixture to the ingress of solids and liquids*

IP
20

1a cifra, protezionecontro la penetrazione dei corpi solidi: 0 Nessuna protezione - 1 Protezione contro i corpi solidi di dimensioni superiori a 50mm - 2 Protezione contro i corpi solidi di dimensioni superiori a 12mm - 3 Protezione contro i corpi solidi di dimensioni superiori a 2,5mm - 4 Protezione contro i corpi solidi di dimensioni superiori a 1mm - 5 Protezione contro la polvere - 6 Totalmente protetto contro la polvere · *1st figure, protection against penetration by solid bodies: 0 No protection - 1 Protected against solid bodies over 50 mm in diameter - 2 Protected against solid bodies over 12 mm in diameter - 3 Protected against solid bodies over 2,5 mm in diameter - 4 Protected against solid bodies over 1 mm in diameter - 5 Protected against dust - 6 Fully protected against dust*

IP
2**0**

2a cifra, protezione contro l'infiltrazione di acqua: 0 Nessuna protezione - 1 Protezione contro la caduta in verticale di gocce d'acqua - 2 Protezione contro la caduta in verticale di gocce d'acqua con angolo di inclinazione max di 15° - 3 Protezione contro la caduta in verticale di gocce d'acqua con angolo di inclinazione max di 60° - 4 Protezione contro gli spruzzi d'acqua - 5 Protezione contro i getti d'acqua - 6 Protezione contro le ondate d'acqua - 7 Protezione contro l'immersione - 8 Protezione contro l'immersione prolungata · *2nd figure, protection against penetration by water: 0 No protection - 1 Protected against drops of water falting vertically - 2 Protected against drops of water at a max. inclination of 15 degrees - 3 Protected against drops of water at a max. inclination of 60 degrees - 4 Protected against splashed of water - 5 Protected against jets of water - 6 Protected against waves - 7 Protected against immersión - 8 Protected against long term immersión*

Simbologia · *Pictography*

Apparecchio idoneo per essere installato su superfci normalmente infiammabili · *Luminaire with builtin power packs or transformers, suitable for mounting directy onto normally inflammable surfaces*

0,1 m

Distanza minima dagli oggetti illuminati · *Minimum distance from illuminated objects*

In conformità con quanto previsto dal Regolamento 874/2012/EU, integrazione della Direttiva 2010/30/UE e relativo all'etichettatura indicante il consumo d'energia delle lampade elettriche e la compatibilità degli apparecchi di illuminazione con le diverse fonti luminose (integrate o con questi compatibili), Flos S.p.A. ha inserito le etichette richieste, in formato elettronico, sul proprio sito (www.flos.com) nell'area relativa ai prodotti. Le modalità per scaricare le etichette, nelle diverse lingue previste a livello comunitario, sono le seguenti: • Selezionare la collezione/il prodotto di interesse (per esempio http://www.flos.com/decorative/en/products/floor/Arco) • Cliccare "Vedi scheda tecnica" • Cliccare "Print Energy Label" • Selezionare la lingua e stampare l'etichetta · *In accordance with the provisions of Regulation 874/2012/EU and integration of the Directive 2010/30/EU concerning labeling indicating the energy consumption of electric lamps and the compatibility of lighting appliances with different light sources (integrated or compatible with these), Flos SpA has inserted the required labels, in electronic form, on its website (www.flos.com) in the area relating to products. The methods to download the labels in different languages envisaged at Community level are as follows: • Choose the collection/product you are interested in (for ex: http://www.flos.com/decorative/en/products/floor/Arco) • Click on "see specs sheet" • Click on "Print Energy Label" • Select the language and print the label*
