# Fiam, cultura del vetro

## Fiam, the art of glass

**LEO NARDO**  
Premio Leonardo  
Qualità Italia 2015

Fondata da Vittorio Livi nel 1973, Fiam è nata dalla grande passione di un uomo per il vetro ed è sinonimo di cultura del vetro in Italia e nel mondo. L'azienda, che collabora con designer e architetti di fama internazionale tra i quali Daniel Libeskind, Massimiliano Fuksas, Philippe Starck, Marcel Wanders, Cini Boeri, progetta, sviluppa e produce elementi di arredo in vetro curvato realizzati seguendo processi al contempo artigianali ed industriali, fondendo tradizione e innovazione, lavorazione manuale e design.

È inoltre riconosciuta a livello globale come esempio di eccellenza del Made in Italy, come dimostrano i numerosi riconoscimenti ricevuti nel tempo, tra i quali il Premio Compasso d'Oro alla Carriera ed il Premio Leonardo Qualità Italia, nonché la presenza di diversi prodotti in vari musei internazionali.

GHOST - design Cini Boeri

Founded by Vittorio Livi in 1973, Fiam was born from the passion of a man for glass and is synonymous, in Italy and in the world, of culture of glass. The company, working with designers and internationally renowned architects such as Daniel Libeskind, Massimiliano Fuksas, Philippe Starck, Marcel Wanders and Cini Boeri, designs, develops and produces items of furniture in curved glass made at the same time of craftsmanship and industrial processes, actually merging tradition and innovation, hand-crafting and design. It is also recognized globally as an example of excellence as evidenced by the numerous awards received in the years, including the Compasso d'Oro alla Carriera Award and the Premio Leonardo Qualità Italia, and the presence in various international museums.

## DV Glass®

Nella storia del vetro si è da sempre cercato l'utilizzo di spessori molto alti, purtroppo, per questioni tecniche e dimensionali, questo desiderio non si è mai potuto realizzare. Ora, con il nostro originale prodotto, siamo in grado di produrre vetro di grandi dimensioni, alti spessori e con colorazioni miste. Una tecnica che finalmente ci permette di avere misure e colori variabili e che conferisce al vetro lavorato una forte matericità alla vista ed al tatto.

## DV Glass®

The use of big thickness in glass manufacturing processes has always been a great ambition which, unfortunately, for technical and dimensional matters, has never been reached.

But now, with our original product, we are able to produce glass of great dimensions, big thickness and with mixed finishes.

We came up with a technique that finally allows variations in measures and colors resulting in a strong "perceptible" design appreciable through sight and touch.

## Goffratura ad alta temperatura

Grazie alle potenzialità dei nostri impianti ed all'abilità manuale dei nostri stampisti, siamo riusciti a dare al vetro un aspetto decorativo su lastre lavorate artigianalmente, ottenendo un risultato impensabile per bellezza e qualità. Sino ad oggi infatti sono sempre state prodotte lastre di vetro con goffrature minime come profondità e con produzioni fortemente industriali. Noi oggi siamo riusciti a realizzare delle lastre con decori goffrati a piacere, anche ad alto rilievo, con misure ampiamente customizzabili. Con l'impiego di speciali smalti si riescono ad aggiungere degli effetti di profondità e tridimensionalità a decori sinuosi ed eleganti, che creano un forte impatto emotionale.

## High temperature embossing

Thanks to the potentials of our equipments and the manual ability of our master glassmakers, we have succeeded in giving an ornamental look to the handcrafted glass plates achieving high-quality results. In fact, until now, glass plates have always been produced with minimal embossing and in large quantities for the industrial production. Today, we have succeeded in realizing glass panels with embossed ornaments, also in high relieves, with measures widely customizable. Using specialized glazes we are able to add effects of depth and three-dimensionality to the sinuous and elegant adornments thus creating a strong emotional impact.

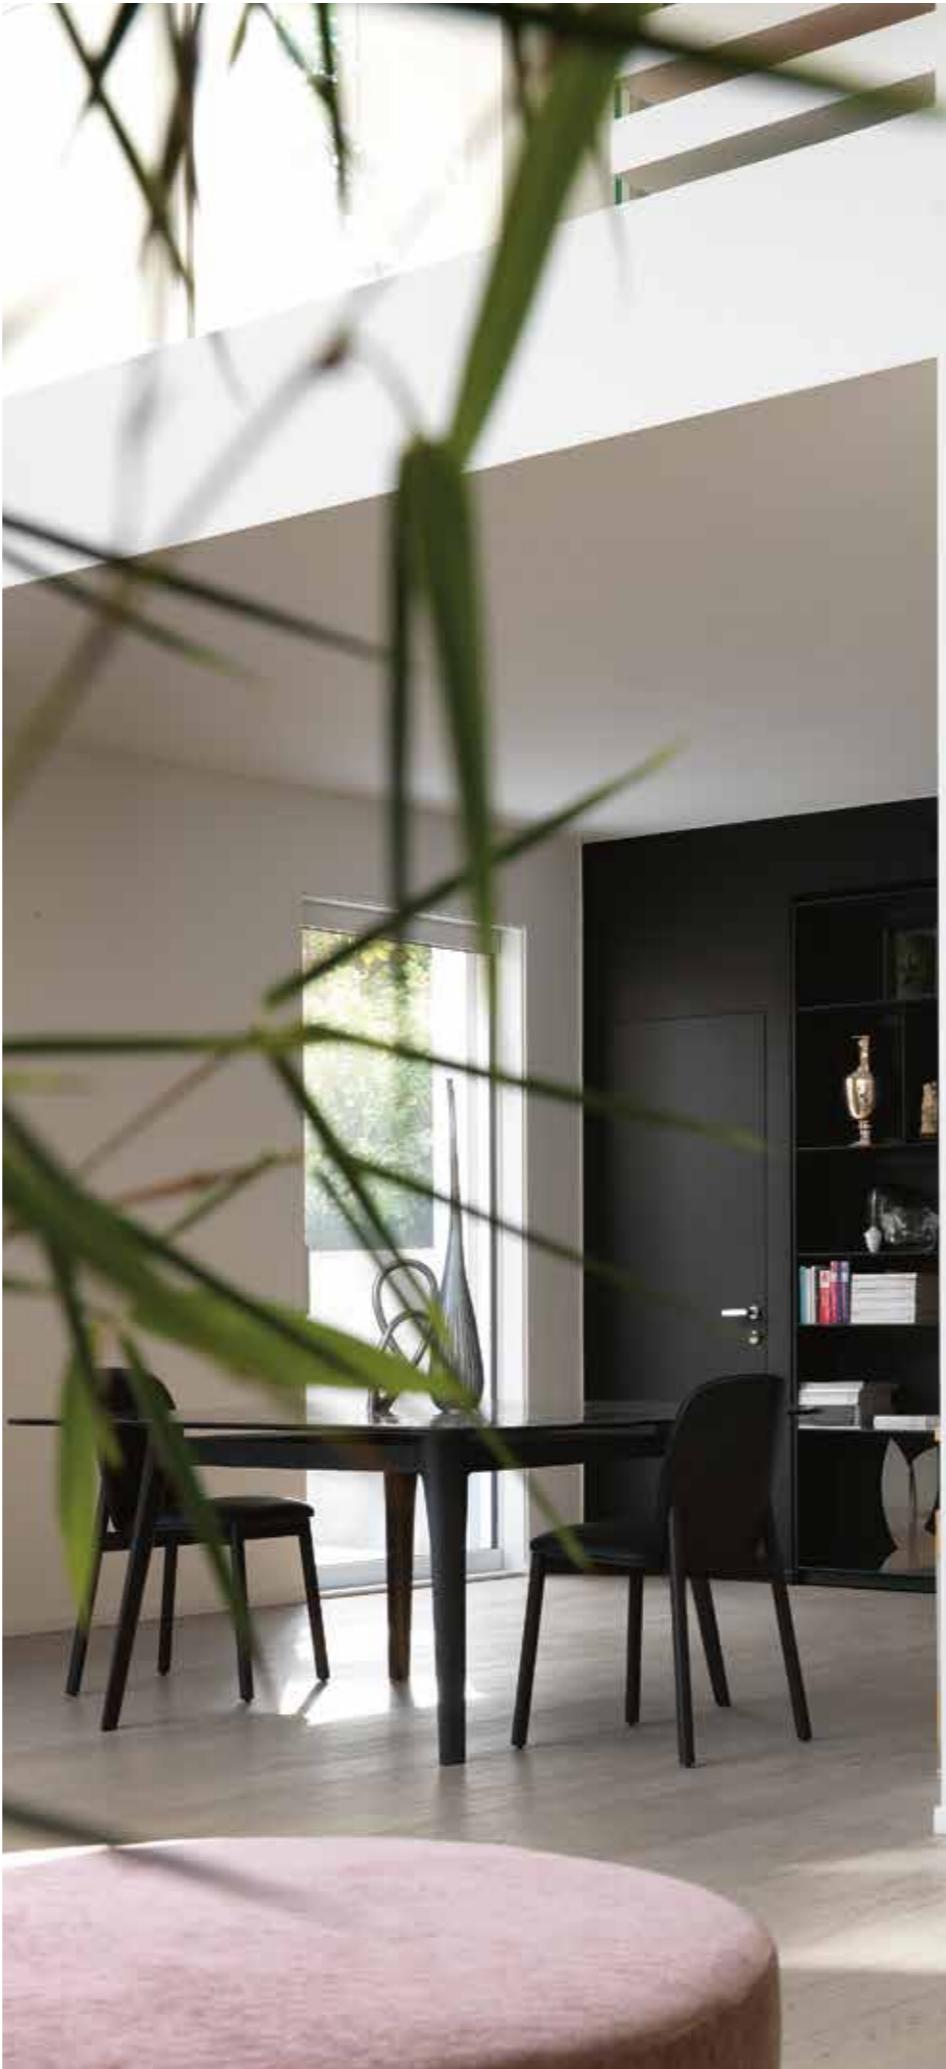

## Il vetro Magma

Il vetro Magma prende ispirazione dall'antica tradizione di colatura del vetro fuso in contenitori metallici e successiva ricottura in apposite fornaci, un processo questo molto lento ed estremamente artigianale. Fiam è riuscita a restituire l'aspetto del vetro colato di forte spessore su lastre di grandi dimensioni, grazie alla tecnologia Magma: il connubio tra una forma sinuosa e la fusione a gran fuoco su speciali refrattari ha la forza di ammorbidente il vetro, per sua natura duro e spigoloso, conferendogli l'aspetto della materia allo stato liquido. Durante la fusione, la superficie irregolare dello stampo forgia la lastra di vetro producendo un effetto grafico molto poetico in quanto casuale e mai perfettamente ripetibile.

## Magma glass

Magma glass takes its inspiration from the ancient tradition of casting molten glass in metal containers and subsequent annealing in appropriate furnaces, a slow and extremely artisanal process. Thanks to the magma skills, Fiam has been able to give a great thickness on big dimensional glass plate: the union between wavy form and the high-temperature melted glass, for its nature hard and edgy, give a liquid aspect to the material. During the fusion, the irregular outside of the mould forges the glass plate producing a random and never the same graphic effect.

# caadre

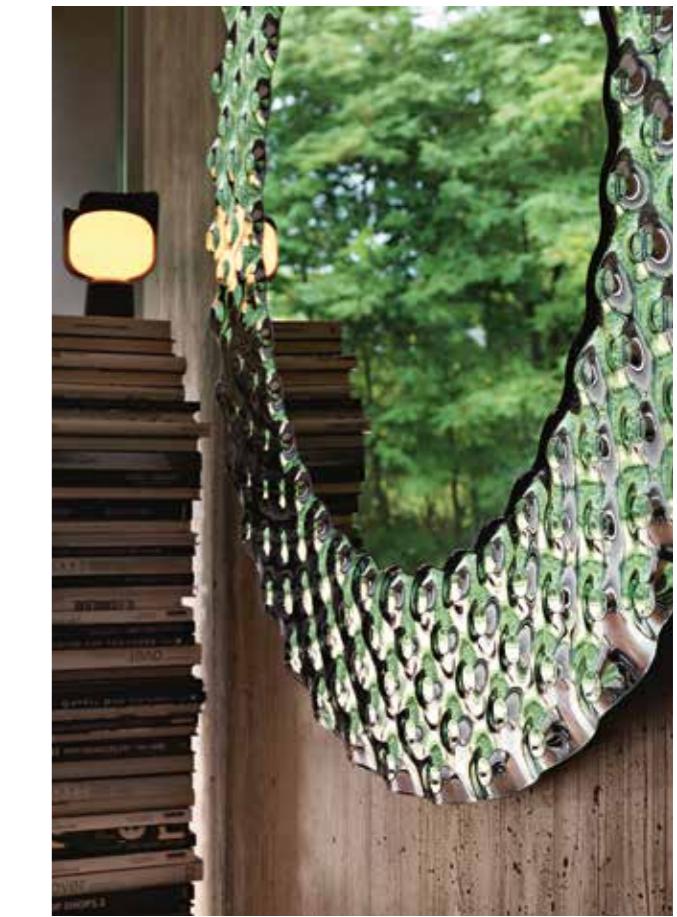

DESIGN PHILIPPE STARCK

Specchio da parete o da terra con cornice formata da quattro elementi singoli in vetro da 6 mm curvato e retroargento. Disponibile in vetro semiriflettente color Titanio o in vetro bronzo retroargento. Possibilità di appendimento in orizzontale o verticale. Disponibile anche su misura e in configurazioni modulari.

Kit di retro-illuminazione a LED, dimmerabile e con regolazione della temperatura (opzionale).

Free-standing mirror or hanging mirror in 6 mm-thick curved glass, made of four separate back-silvered curved elements.

Also available with semi-reflective titanium glass or in back-silvered bronze glass. It can be hung horizontally or vertically. Also available custom-sized and in modular configurations. LED lighting kit with a dimmer switch and temperature regulation (optional).

DESIGN SETSU & SHINOBU ITO

Sistema composto da elementi in vetro o legno modulari. La modularità e versatilità ne permette l'utilizzo come libreria, espositore, contenitore porta tv, sviluppabili sia in situazioni con fissaggio a muro che autoportanti. Tutti i montanti sono liberamente posizionabili tramite sistema di ancoraggio e scorrimento a binario applicato su ogni singolo ripiano. Binario in alluminio anodizzato nero.

Modular book shelves glass or wood system. The versatility and assembly possibilities allow the utilization as a show-case, display-case, TV-unit. Available the free-standing version and wall unit. The uprights are freely adjustable on each shelf through sliding rails and fixing device. Slides in anodized black aluminum.

# palladio

DESIGN VITTORIO LIVI

Vetrina elettrificata in vetro curvato trasparente o extralight da 6 mm con quattro ripiani fissi in vetro da 6 mm e top in vetro da 12 mm. Base disponibile in legno noce canaletto, in vetro extralight da 12 mm acidata retroverniciato bianco o retroargentato o retroverniciato nero. Profili in alluminio finitura brill spazzolato. Anta con serratura. Corpo illuminante (optional) posizionabile anche sotto il top.

Wired showcase in 6 mm-thick curved transparent or extralight glass, with four 6 mm-thick glass shelves. 12 mm thick glass top, door with lock. Base in wood walnut "canaletto", or in 12 mm thick extralight glass: backpainted black, back-silvered or acid-etched backpainted white. Profiles in brushed aluminum glossy finish. The optional lights can also be placed under the top.

# milo day

DESIGN ILARIA MARELLI

Vetrina con struttura in vetro curvato da 8 mm trasparente, anta in vetro trasparente da 6 mm con serratura dotata di 4 ripiani fissi in vetro trasparente da 8 mm con reggipiani in vetro saldati alla struttura. La base in vetro da 12 mm è disponibile in vetro extralight acidato e retro verniciato bianco o in extralight retro argentato o retroverniciato nero. Il top è in vetro trasparente da 12 mm. Profili in alluminio finitura brill spazzolato. La vetrina è predisposta per il kit di illuminazione oppure, solo nella versione trasparente, è disponibile con 2 ripiani dotati di illuminazione a led alimentati da un trasformatore.
