FURNITURE

armillaria family

Radice comune

Armillaria é una collezione che "germoglia" dal mondo vegetale.
Un'unica base, forme diverse, per realizzare gli sgabelli e i tavolini di
questa originale famiglia.

atene family

Morbidezza neoclassica

Atene è una famiglia di prodotti dove coesiste il sapore neoclassico e la contemporaneità.

Le importanti gambe cilindriche che la caratterizzano, richiamano una sorta di colonnato da cui deriva la scelta del nome. Nelle poltrone, la plasticità scultorea viene mitigata dalla morbida linea delle sedute che accolgono come in un abbraccio, grazie anche ai cuscini confortevoli.

—

Neoclassical gentleness

Atene (Athens) is a family of products wherein neoclassical and modern styles beautifully blend.

Its characteristic sturdy tubular legs recall a sort of colonnade from which its name is inspired. In the armchairs, the sculptural suppleness is softened by the seats, which snugly embrace, also with their cosy cushions.

POLIETILENE

Evitare gli accumuli di polvere e di sporco sulle superfici. Pulire periodicamente il prodotto con una spugna bagnata con acqua e detergente liquido neutro e risciacquare con una spugna e acqua. Asciugare con un panno. Si raccomanda di evitare l'utilizzo di detersivi o detergenti contenenti solventi e/o alcol etilico. In caso di sporco ostinato richiedere il detergente Euro3plast. Le versioni laccate sono adatte per uso esterno ma più sensibili ai graffi, per questo si consiglia di pulire la superficie dell'articolo delicatamente, con l'utilizzo di pasta tipo "car-polish". Per la pulizia dell'articolo e la rimozione della polvere usare un panno in microfibra bagnato, ripassare poi con un panno morbido ed asciutto. L'esposizione continua e prolungata ai raggi solari può causare l'alterazione del colore e della finitura originale dell'articolo.

POLYETHYLENE

Avoid the build-up of dirt and dust on the surfaces. Periodically clean with a water-damped sponge and mild liquid detergent, and rinse with clean water. Dry with a cloth. Avoid using cleaners or detergents containing solvents and/or ethyl alcohol. For stubborn stains, use the special Euro3plast detergent. Lacquer versions are suitable for external use but more susceptible to scratches. We therefore recommend cleaning gently with a car-polish type of cream. To clean the product and remove the dust, use a damp microfiber cloth. Then dry with a soft dry cloth. Constant lengthy exposure to direct sun can cause alteration of the article's color and original finishing.

LEGNO

I piani e le parti in legno degli articoli sono trattati con vernici protettive a base acqua. Gli agenti atmosferici e la luce solare sono cause naturali dell'alterazione della colorazione del legno, causandone il naturale invecchiamento. La pulizia delle superfici verniciate con prodotti all'acqua deve essere fatta con detergenti neutri (quindi non a base di acidi, ammoniaca o candeggina), non abrasivi e privi di solventi; in particolare evitare l'uso di prodotti contenenti alcol o acetone. Per proteggere il legno e mantenere viva la colorazione uniforme nel tempo e per evitare l'aggressione da parte di insetti xilofagi, pulire e trattare periodicamente il piano con prodotti specifici per legno a base acqua, seguendo le istruzioni riportate sul prodotto protettivo da voi acquistato. Destinato all'utilizzo in ambiente esterno coperto. Non esporre alle intemperie.

WOOD

The wooden surfaces and the parts of the items are treated with water-based protective varnishes/paints. Atmospheric agents and sunlight are natural causes of changes in wood tones, causing them to age naturally. Cleaning the coated surfaces with water-based products must be done using neutral non-abrasive detergents that contain no acids, ammonia, bleach or solvents; in particular, avoid using products containing alcohol or acetone. To protect the wood, keeping its color uniform over time and avoid attacks from wood-boring insects, clean and treat the surface periodically with specific products for wood to base it waters, following the instructions of product you have purchased. Intended for use in covered outdoor environments. Do not expose to the elements.

LAMINATO AD ALTA PRESSIONE (HPL)

I piani in laminato ad alta pressione (HPL) devono essere utilizzati con la stessa cura dedicata alle altre comuni superfici degli arredamenti da interni e esterni. È buona pratica mantenere i piani sempre puliti e rimuovere periodicamente lo sporco/polvere che si deposita sulla superficie. Per la pulizia utilizzare un panno morbido e umido con un detergente non abrasivo per la pulizia delle comuni superfici domestiche diluito in acqua. Non usare assolutamente sostanze abrasive e/o spugne graffianti. Risciacquare con un panno bagnato e asciugare.

HIGH-PRESSURE LAMINATE (HPL)

The surfaces in HPL must be used with the same care dedicated to other common surfaces of internal and external furniture. It is good practice to keep the surfaces always clean and to periodically remove dirt/dust that builds up on them. For the cleaning to use a cloth soft and umido with un Detergent not abrasive for the cleaning of the municipalities surfaces domestic iron in water. Never use abrasive substances and/or sponges that scratch. Rinse with a damp cloth and then dry.

IMBOTTITI

Agli imbottiti in tessuto tecnico, ecopelle e tessuto 100% acrilico Sumbrella® dovrà essere riservata cura e attenzione. Pulire periodicamente la superficie con un panno umido, non abrasivo usando acqua e sapone neutro, risciacquare e lasciare asciugare bene. Non usare solventi, detergenti chimici, pulitrici a vapore. Controllare e rimuovere tempestivamente eventuale sporco quale: foglie, fiori, insetti. Lo sporco vegetale, il polline dei fiori ed il residuo di insetti, combinato all'umidità e all'acqua potrebbe creare delle macchie che penetrano nella struttura del rivestimento in ecopelle e tessuto tecnico, diventando difficili da rimuovere. Per una più agevole pulizia degli imbottiti rivestiti in 100% acrilico Sunbrella, è possibile sfoderare il cuscino. Il lavaggio a macchina delle due parti separate è efficace ad una temperatura massima di 30°, senza prelavaggio e senza centrifuga rapida. L'asciugatura si effettua all'aria aperta.

UPHOLSTERY

Upholstery made of technical fabric, imitation leather and fabric 100% acrylic Sumbrella® requires care and attention. Clean the surface periodically with a damp non-abrasive cloth using neutral soapy water; rinse and allow to fully dry. Do not use solvents, chemical detergents or steam cleaners. Check for, and remove as soon as possible, soiling such as: leaves, flowers, insects. Vegetable soiling, flower pollen and remains of insects combined with moisture and water, they can bring stains that penetrate the imitation leather and technical fabric and prove difficult to remove. For more practical cleaning of upholstery covered in 100% acrylic Sunbrella, you can remove the cushion cover.

Machine-washing of the two separate parts is effective at a maximum temperature of 30 °C, without pre-washing, and with no fast spin-drying. Dry in the open air.

A seconda dello scenario, del contesto, o della particolare suggestione che si vuole creare, si può scegliere il colore della luce più adatto, o semplicemente lasciare che la lampada trasformi il colore lentamente in sequenza, regalando un coinvolgente spettacolo cromatico.

The professional kits, applicable to all PLUST Collection "lights", uses RGB LED technology to save energy, through which you can turn any object into a glowing colorful sculpture. Depending on the scenario, context, or that particular suggestion to be created, you can choose the most suitable light colour, or simply let the lamp turn the color slowly in sequence, giving a fascinating show of colour.
