# Individual products

## FOR YOUR BATHROOM

Customised bathrooms and challenging installation situations generally need more than just standard solutions. Our wide range of products therefore allows you to plan and create all kinds of bathrooms that are perfectly adapted to your personal needs. Our mirror cabinets and bathroom furniture are available not only in many standard dimensions but also precisely made-to-measure, giving you plenty of design freedom.

All SPRINZ products are stand-alone units made of aluminium and glass. Each collection of mirror cabinets, flat mirrors and bathroom furniture has a corresponding type structure. The different models in the collections harmonise in terms of height, depth and colour, and the colour schemes of the collections offer countless possibilities. Apart from the two aluminium designs – aluminium matt and aluminium gloss – we offer three colours of glass – white, black and mirrored – which can be interchangeably combined.

A particular strength of our mirror cabinets is the fact that they can be individually flush-mounted. The special installation boxes combined with the cover frames ensure not only the highest design standards but also easy assembly.

You can bring out features with integrated lights or top panel lights, which turn light into a primary design element in the bathroom.

Take advantage of the wide range of possibilities and inject new zest into your bathroom plan. With our made-to-measure philosophy, we offer you the peace of mind that even if the plan changes, the basic design approach can still be applied.

# Flat mirrors

Touchless operation with an invisible motion sensor

## CENTRAL ELEMENTS IN THE MODERN BATHROOM

The SPRINZ Smart-Line flat mirror is a great solution with a lot of options to choose from for customers who are not planning any storage space above their washbasin but still want plenty of functionality and benefits. A unique feature is the corona effect: the light shines not just forwards but also up, down and sideways for additional ambiance. The flat mirror is available with white light adaptation and shines glare-free through the sandblasted lighting strips. The light of the Smart-Line mirror is activated with touch-free operation via a movement sensor located behind the mirror on the bottom side.

It covers all requirements with a height of 700 mm and widths ranging from 600 to 2,000 mm. A super-flat design with a thickness of just 26 mm guarantees an elegant appearance. Custom designs are available on request. The 6 mm thick mirror has two sandblasted sections (60 x 580 mm) on the side, under which the light panel is installed. It is also available with a central lighting unit in sizes of 1,000 mm and upwards.

FLAT MIRRORS

# Smart-Line

Ambiance effect with sandblasted lighting strips

## LIGHT WITHOUT A BEGINNING AND WITHOUT AN END

The Smart-Line 4.0 model with its smooth corona is another of our bright ideas. Its light has no beginning or end. The light shines not just forwards but also all around for additional ambiance. The light is available in neutral white and shines glare-free through the sandblasted mirror surface with 10 mm LED lighting. The Smart-Line 4.0 model is available in two different versions: round or rectangular, each with 25 mm total depth.

## MIRROR CABINETS

### CENTRAL ELEMENTS IN THE MODERN BATHROOM

Mirror cabinets and flat mirrors are the central elements above the washbasin. They are a focal feature of the room and therefore shape the architecture of the modern bathroom.

With all SPRINZ mirror cabinets, the models can be custom assembled. You can include asymmetrical doors or have the mirror cabinets made to measure.

We offer an exceptionally wide variety of combinations and colour options. All the cabinets can also be fitted with extensive lighting. From rear panel lighting, interior lighting and washbasin lighting to one of the various top panel lights – everything can be combined with everything else.

## BENEFITS

### AT A GLANCE

- Can be surface-mounted, flush-mounted or partially recessed
- Choice between symmetrical and asymmetrical doors
- Precisely adjustable hinges with attenuation and pre-fitted handles included
- Installation boxes optionally available for flush mounting and partially recessed installation
- Various installation cover frames optionally available with and without LED lighting
- Different design options for items such as body, rear panel and exterior finish, depending on the model
- Illuminated rear panels available as an option
- Interior and washbasin lighting available as an option
- Rear panel lighting available as an option for surface-mounted variant
- Use of top panel lights and pendant luminaires possible
- Including white light adaptation and dimming
- Standard electrical panel with two double rocker switches and two sockets behind right exterior door (additional panel with two sockets behind left exterior door available as an option)

Lots of model variants offer even more design freedom

## STRIPPED BACK TO THE ESSENTIALS

The SPRINZ Classical-Line mirror cabinet collection is characterised by clean, straight lines. Stripped back to the essentials, it's our personal "classic" which adds that special touch to your bathroom.

In addition to the custom widths and heights available for all the mirror cabinet series, it is now also possible to order the Classical-Line Vario mirror cabinet collections with made-to-measure depths.

Cabinets can now be manufactured with depths ranging from 142 mm to 296 mm, including the 7 mm double mirror door. The interior is always 38 mm narrower than the desired cabinet depth, and the shelves are 45 mm narrower.

## A REAL EYE CATCHER FOR YOUR BATHROOM

The SPRINZ Modern-Line mirror cabinet collection adds flair to your bathroom with its exterior colour scheme of white or black glass panels. Mirrors can be used as a stylish and contemporary subtle design element.

## PERFECTION IN FORM AND LIGHT

The vertical lighting with LED technology including white light adaptation and dimming as well as a detachable plastic screen is emblematic of the design of the SPRINZ Elegant-Line mirror cabinet collection. The Elegant-Line mirror cabinet is available with an aluminium matt or aluminium gloss exterior.

MIRROR CABINET

# Elegant-Line

# External lighting for mirror cabinets

## TOP PANEL LIGHT IN FRAME FORM (GLSR)

The LED top panel lighting in GLSR frame form is 10 mm high, 180 mm deep, and the light projects by 140 mm. It is available in three lengths: 600 mm, 900 mm, 1,200 mm. The front three light bars shine warm to cold white-coloured light downwards and onto the body as well as towards the ceiling. The top panel light has a separate switch from other illumination units inside the mirror cabinet.

## EXTERNAL LIGHTING FOR MIRROR CABINETS

Light means life – add a vital element to your bathroom to create your own oasis of well-being with external lighting for mirror cabinets. The light ensures the best shaving and make-up experience.

We only use LEDs in our SPRINZ products. These are included as standard with white light adaptation and dimming. This white adaptation means the lights can be adjusted between warm white (3,000 Kelvin) and cold white (6,000 Kelvin) to suit your individual needs. All lighting is classed as energy efficiency category A+.

## TOP PANEL LIGHT IN FRAME FORM (GLSU)

With the LED top panel lighting in GLSU frame form, three lengths are available (600 mm, 900 mm, 1,200 mm). It is 10 mm high, 180 mm deep, and the light projects by 140 mm. The front light bar shines warm to cold white light downwards, parallel to the mirror surface. The light has a separate switch from other illumination units inside the mirror cabinet.

## PANEL TOP PANEL LIGHT

The Panel LED top panel lighting consists of an aluminium frame with light-conducting material. It is available in three lengths: 600 mm, 900 mm and 1,200 mm with a height of 20 mm and a depth of 180 mm. The light projects by 140 mm. The top panel light has a separate switch from other illumination units. The warm to cold white light shines mainly downward and can be dimmed.

White adaptation  
and dimming

## PENDANT LUMINAIRE

Our LED pendant luminaire can be installed in the bathroom independently of the mirror cabinet. We recommend combining it with flush-mounted mirror cabinets for optimum bathroom design. The pendant luminaire can be switched on and off via the room switch and is available in three lengths: 600 mm, 900 mm, 1,200 mm. The warm white light shines downwards.

# Bathroom furniture

at [www.sprinz.eu](http://www.sprinz.eu)

## BATHROOM FURNITURE

### A BRIGHT & BEAUTIFUL COLLECTION

SPRINZ bathroom furniture consists of stand-alone units developed to complement the SPRINZ mirror cabinets and flat mirrors. All furniture is available in the classic wall-mounted version. This flexibility can breathe new life into modern bathroom planning – a field of design in which there is ever-growing scope for individuality. Contemporary surface finishes and functional furniture are in demand. We therefore focus on the possibility of planning across room boundaries as well as offering the peace of mind that plans can also be changed.

When it comes to bathroom furniture, we also have a standard range. In addition, we offer custom sizes, provided they are technically feasible. The two bathroom furniture collections SPRINZ Classical-Unit and SPRINZ Modern-Unit are available as tall cabinets in two depths (155 mm and 296 mm) and three widths (350 mm, 400 mm, 450 mm).

## OVERVIEW OF MODELS

Dimensions in mm (W x H x D). All models available in three widths (350, 400, 450), one height (1,800) and two depths (155, 296), with or without an open storage compartment in two heights (200, 400).

## THE CLASSIC LINE

# CLASSICAL-UNIT

Spoilt for choice: the aluminium exterior finish is a stylish highlight. The doors come in black glazing or mirror glass. The range consists of three 1,800 mm tall cabinet models.

Storage compartments of various heights, removable shelves and two different depths for all models (155 mm, 296 mm) guarantee optimum divisions and user convenience.

Additional items and accessories meet every possible individual, aesthetic and design need.

## ORIGINAL DESIGN OPTIONS

### MODERN-UNIT

The exterior finishes are available in black, white or mirror glass. The doors come in your choice of black glazing or mirror glass. These are more than just surfaces – they give the bathroom a sophisticated, contemporary feel. Three models in two depths (155 mm, 296 mm) and three widths (350 mm, 400 mm, 450 mm) satisfy individual design preferences and can be effortlessly adapted to suit all room requirements. Variable, additional shelves accommodate more than just your wishes. Additional items and accessories meet individual and design needs.

FOR INDIVIDUAL DESIGN

# Modern-Unit

# Individualisation

## SURFACE-MOUNTED, PARTIALLY RECESSED OR FLUSH-MOUNTED?

In addition to the classic surface-mounted variant, where the mirror cabinet or item of furniture is mounted directly on the wall, SPRINZ also offers a special style highlight: the flush-mounted version. SPRINZ is the only manufacturer to offer the option of flush mounting cabinets within the wall. Our special installation boxes with cover frames guarantee both the highest design standards and very easy installation. Each cabinet is suspended individually on its own suspension rail, with the installation box mounted on the upper traverse.

Or you can play around with the three-dimensional look – the mirror cabinets can also be partially recessed into the wall for a refreshingly different room design.

## INSTALLATION BOX FOR MIRROR CABINETS

The SPRINZ installation box compels with easy installation of flush-mounted mirror cabinets. Once the box has been levelled, it is screwed to the brickwork. The mirror cabinets can then be fitted into the designated suspension rails. Another advantage of the installation box is the standardised connection of the cover frame to the front and body. This makes servicing or removal considerably easier. It is very easy to determine the niche dimensions for our products: nominal width and height plus 40 mm. The depth of the niche must be at least 157 mm!

For the mirror cabinets, there are two different installation boxes: one for flush mounting (157 mm) and the other for partially recessed mounting (107 mm).

Available for all flush- and surface-mounted versions  
of mirror cabinets

Available for surface-mounted versions  
of mirror cabinets and bathroom furniture

Cover frame aluminium matt

Cover frame LL with LED lighting

Cover frame Taly with LED lighting

## COVER FRAME

You can set the mirror cabinet off perfectly with one of our three cover frames. Available either as an additional design element or for covering the installation joints of mirror cabinets, it guarantees the perfect surround for your individual needs.

There are two attractive designs to choose from:

The bevelled version, which guarantees a soft join with the wall, is available in aluminium matt, aluminium gloss or including LED light technology. The rectangular shape with a purer look is only available with dimmable LED technology. The lit frame has a separate switch.

## REAR PANEL LIGHTING

A subtle detail: the integrated LED lighting on the rear of the mirror cabinets or bathroom furniture provides ambient light that adds an extra dimension. A warm to cold white light shines to the left, right and downwards and can be controlled separately from other illumination units. The rear panel lighting is available for all surface-mounted models. The 14 mm light increases the cabinet depth from 155 mm to 169 mm or from 296 mm to 310 mm.

## INTERIOR LIGHTING

The LED lighting integrated in the top of the aluminium profile is ideal for finding things fast and keeping the mirror cabinet tidy. The dimmable warm to cold white light shines downwards and can be controlled separately from other illumination units in the cabinet.

## LED REAR PANEL INTERIOR LIGHTING

The rear panel interior LED lighting is a real highlight and can be ordered as an optional extra. The light-conducting material on the inside of the rear panel shines with a daylight colour. The lighting lets you find things fast and keep the mirror cabinet tidy as well as being a visual highlight.

## WASHBASIN LIGHTING

This LED lighting integrated into the bottom of the aluminium profile provides optimum and/or additional lighting above the washbasin. It is fully integrated and flush-mounted. The dimmable warm white to cold white light shines downwards and can be controlled separately from other illumination units in the mirror cabinet. The washbasin lighting is only available for surface-mounted models.

White adaptation  
and dimming

## VERTICAL INTERIOR LIGHTING

This integrated vertical LED lighting installed on the inside is available for the Elegant-Line. It lets you find things fast and keep the mirror cabinet tidy. The lighting is fully integrated and flush, the dimmable warm white to cold white light shines sideways towards the inside.

# Special solutions

## SLOPING ROOFS AND CUSTOM SOLUTIONS FOR YOUR BATHROOM

Customised bathrooms and challenging installation situations generally need more than just standard solutions. This is why SPRINZ creates tailor-made flat mirrors and mirror cabinets to fit perfectly into your bathroom. Whether it is a protruding wall or sloping roof – SPRINZ can offer the right product for every situation.

With different special finishes, lighting options, cover frames, other accessories or special finishes for handles, the mirror cabinets are adapted to your personal preferences. Simply contact us and together we will work out a customised solution.

The measuring service collects all necessary data, then the measurements are checked and applied at the SPRINZ factory.

# Accessories

## SHAVING AND COSMETIC MIRROR

Chrome version, 4.5x magnification. Can be installed on body side, rear panel or door. Mount with double mirror adhesive tape on the rear.

Dimensions: Ø 125 mm

## COTTON WOOL PAD DISPENSER

Chrome-plated plastic. Can be installed on body side, rear panel or door. Mount with double mirror adhesive tape on the rear.

Dimensions: Ø 55 mm, height 165 mm

## MAGNETIC RAIL

Chrome version. Mount with double mirror adhesive tape on the rear. Can be installed on body side, rear panel or door.

Dimensions: 84 mm long, 10 mm thick

## HAIR DRYER HOLDER

Chrome version, including wall bracket and two fixing screws. The screws fit the holes drilled into the shelf supports on the body sides. Cannot be mounted on the rear panel.

Internal diameter: 80 mm

## ELECTRICAL PANEL WITH 2 SOCKETS

Additional electrical panel can be supplied at extra cost.

Dimensions: 150 mm wide, distance between the centres of the sockets is 60 mm

## GLASS SHELF

8 mm float glass, polished edges, including shelf supports

Dimensions: 250–500 mm wide, 110 mm deep

## RUBBER SEAL

Durable elastic rubber seals in the body narrow sides protect against dust and moisture and give a soft closing noise.

## CAN BE FREELY COMBINED WITH ALL SPRINZ MIRROR CABINETS & BATHROOM FURNITURE

The best way of keeping things tidy – our accessories keep the interior of high-quality mirror cabinets and bathroom furniture perfectly organised. They let you see things more clearly and fit with all the collections. The Interio-Line accessories are particularly versatile. These multi-tasking, well thought-out organisation helpers are mounted so that they cannot tilt. They offer clever solutions for storing long and small items. Everything has its place and is ready to hand. The elements with a white aluminium finish can be custom-combined and are easy to suspend under the adjustable glass shelves. A practical cosmetic pad dispenser rounds off the system.

# Interio-Line

TIERED HOLDER, REAR PANEL INCLUDING 4 BOXES

Tiered holder for rear panel including 4 boxes (2 boxes: 250 x 35 x 70 mm, 1 box: 140 x 35 x 70 mm, 1 box: 110 x 35 x 70 mm), for suspending at the rear under the shelf, white aluminium finish  
Dimensions: 260 x 195 x 72 mm

TIERED HOLDER, REAR PANEL WITHOUT BOXES

Tiered holder for rear panel without boxes, for suspending at the rear under the shelf, white aluminium finish  
Dimensions: 260 x 195 x 72 mm

TIERED HOLDER, SIDE INCLUDING 3 BOXES

Cosmetic brush holder for rear panel, with 7 glass tubes for cosmetic brushes, suspension-mounted, white aluminium finish  
Dimensions: 50 x 195 x 45 mm

BOX

Box, white aluminium finish with felt bottom for soft placement  
Dimensions: 70 x 35 x 70 mm

BOX

Box, white aluminium finish with felt bottom for soft placement  
Dimensions: 250 x 35 x 70 mm

LIPSTICK AND NAIL VARNISH COMPARTMENT

Lipstick and nail varnish compartment, white aluminium finish  
Dimensions: 260 x 55 x 70 mm

BOX

Box, white aluminium finish with felt bottom for soft placement  
Dimensions: 110 x 35 x 70 mm

# The proper care

## OF YOUR WORLD OF BATHROOMS PRODUCTS

Our mirror cabinets, flat mirrors and bathroom furniture are made of a variety of different materials. Both the design and the choice of material are primarily a matter of functionality and therefore use. Once the product has left our plant, it's up to you to ensure it receives the right care, so that you can enjoy it for as long as possible. Please read the listed care instructions. We are sure that if you follow the care recommendations, your SPRINZ products will give you many years of enjoyment:

- Clean without water with a soft, clean cloth (ideally microfibre or chamois leather).
- For more severe soiling, wet a clean cloth or sponge with clear water and rub dry.
- Edges and borders of mirrors as well as acrylic covers and lighting should be dried completely, as water residue may cause not only marks but also damage on edges and borders.
- Do not use a razor blade, a ceramic cooktop scraper, steel wool, an abrasive scouring sponge or scouring cream or powder.
- Avoid scouring agents, steel wool, cleaning products with abrasive additives and products containing vinegar, citric acid or any other chemicals, as they may damage surfaces.
- Aggressive products like nail varnish remover or drain cleaner must never be placed on the furniture without a top! The escaping fumes can damage mirror doors, handles, the body and other materials used in the mirror cabinet.

NEW

## SOFTSHINER

Anti-fog

### SOFTSHINER® ANTI-FOG

No more fogged surfaces: the anti-fog effect of SoftShiner spray provides a clear view and is multi-functional. Highly concentrated bioalcohol guarantees effortless and streak-free cleanliness. The long-lasting bead-off effect gives durable protection from dirt and limescale, making cleaning significantly easier.

Applications: mirrors, real glass showers, windows, roof windows. Also for car windows inside and out, glass optical lenses, sun rooms and much more.

# OVERVIEW OF MIRROR CABINETS

## MOUNTING VARIANTS

## ELECTRICAL PANELS

Electrical panel, standard, 2-switch sockets on the right.

Optional extra double-socket panel on the left.

## HANDLE TYPES

## MODELS WITH VARIABLE HEIGHTS AND WIDTHS

All models can also be ordered with custom heights and widths.

## EXPLANATION OF ELECTRICAL CONNECTION

Four-wire mirror cabinet cable is connected to four-wire wall cable.

Four-wire mirror cabinet cable is connected to three-wire wall cable. Two lines must be laid to one wall connection.

All SPRINZ mirror cabinets have a four-wire cable. If there is only a three-wire cable for connecting above the washing area, two lines must be laid to one wall connection. Connections must be installed by a qualified electrician.
