DOOR HANDLE

groël

handle design

Desde 1998 producimos manillas siguiendo criterios de excelencia en todas las fases de producción, utilizando la creatividad, produciendo diseños que desafían al tiempo.
Ideas claras, visión positiva, afán de superación, es lo que atesora nuestro equipo de profesionales jóvenes y activos, coherentes con la realidad pero siempre mirando al futuro.
Solo con esta sinergia conseguimos hacer recordar que la manilla no es un objeto banal sino la forma armónica con la que contacta nuestra mano con el hogar.

Since 1998, we've been producing handles following strict production criteria of excellence in all production phases, emphasizing creativity to produce designs that challenge the pass of time.
Bright concept, clear foresight and a constant desire to better ourselves are some of the factors that add value to our line of products and distinguish our young team of creative professionals.
It is through our clear vision and keeping with our philosophy of excellence and innovation that we emphasize that a door handle is not a mere object but a significant part of our daily lives, its shape and harmony connect us with our home through our hand.

Daniel Torregrosa + Carlos Torregrosa

Las pequeñas cosas
marcan la diferencia. Esos muchos
y pequeños momentos, detalles y
emociones son los que nos hacen día a día
superarnos. Gracias

Small things that make a difference.
Those many and small moments, details and
emotions are what challenge us to go to the
next level. Thank you!

Utilizamos latón por sus características de metal noble. Consideramos vital reducir el consumo de materias primas contaminantes, estableciendo pautas que permitan de forma progresiva reemplazarlas por completo.

- Barra latón para decoletage según norma **TN UNI EN 12164 CW 614N M**
- Barra latón para estampación según norma **UNI EN CW617N**

All our handles are made using the finest raw materials sourced from known manufacturers and keeping with strict alloy control.

We use solid brass due to its fine metal characteristics, fine detail retention and longevity.

The reduction of contaminating raw materials is essential. Groël is constantly implementing and executing replacement programs to progressively phase out old alloy raw materials and introducing newer more sophisticated and environmental friendly alloys.

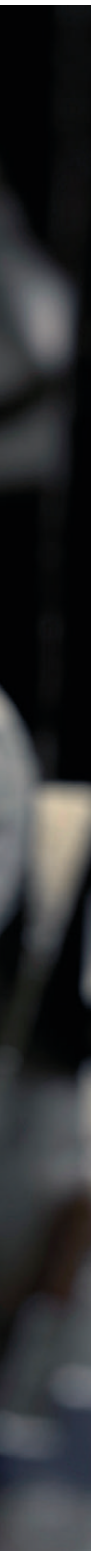

- *Extrudded machinable brass bar as per norm* ***TN UNI EN 12164 CW 614N M***
- *Annealed Forged brass stamping bar as per norm* ***UNI EN CW617N***

EL FORJADO / THE FORGING **GROËL**

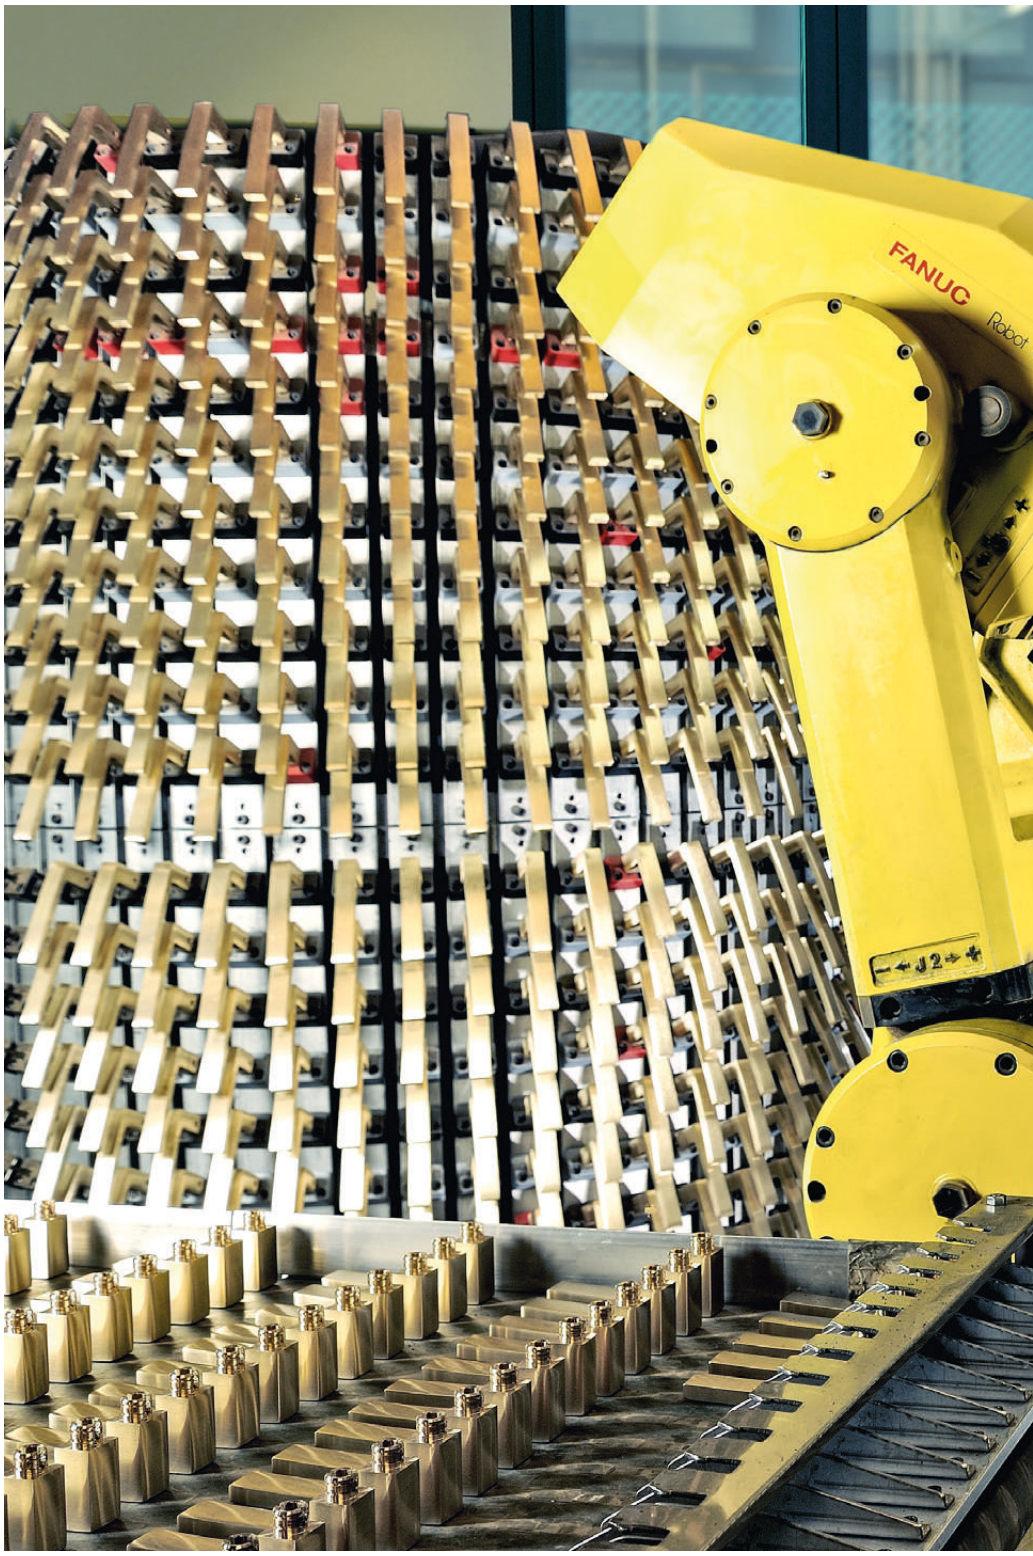

Fabricamos todas nuestras manillas en estampación para poder obtener la máxima calidad.

To obtain the maximum level of quality all our handles are forged.

Todos nuestros productos se pulen antes de cualquier elaboración mediante robot con el fin de mantener nuestros estándares de calidad.

All our products are polished using robotic arms prior to any process to keep up with our strict quality standards.

S-700
groël
www.groel.es

La importancia de un recubrimiento de excelencia, para un resultado duradero, radica en su espesor.

The importance of the excellence for a long lasting finish lays in its thickness.

groël

groël

eco
metode

Groël aplica estrictas políticas de calidad de respeto medioambiental a todos sus productos, involucrando a proveedores, colaboradores y trabajadores en un marco que entendemos común y que pretende posicionarnos como una empresa socialmente responsable que cumple escrupulosamente la legislación y normativas medioambientales apostando por un modelo de gestión basado en la economía sostenible.

Con ese objetivo, el departamento de I+D+I de Groël ha puesto en marcha un procedimiento que ha denominado "**ECOMETODE**", que permite tanto la identificación de los aspectos medioambientales asociados a las operaciones del proceso productivo como la aplicación de medidas que produzcan mejoras medioambientales continuas en las mismas. **ECOMETODE** es un proyecto que nos permitirá, en breve, poseer un sistema de drenaje "cero".

Packaging sostenible
Utilizamos papel certificado por el FSC® (Forest Stewardship Council) en todos nuestros embalajes y materiales impresos; cajas, catálogos, manuales de instrucciones y proyectos editoriales se imprimen teniendo en cuenta el medioambiente.

Tratamiento de residuos
• Disminución de emisiones de CO2: la utilización en nuestras instalaciones de energía alternativas ha hecho posible una importante disminución de emisiones de CO2 en determinados procesos de nuestra producción.
• Desengrase de las piezas mediante lavado al agua y detergentes biodegradables.

Groël follows a strict quality control policy in keeping with our respect for the environment adhering and enforcing local and worldwide environmental rules and regulations. All our suppliers, machine shops and finishing shops share our concerns to find solutions and alternatives for a cleaner environment based on a sustainable economy model.

*In keeping with our mentality, Groël's R&D department has put into effect a procedure named "**ECOMETODE**" that allows not only for the identification of key environmental factors involved in production processes but also the implementation of the necessary steps and measures that will contribute to a cleaner and safer environment.*
*As a result of our **ECOMETODE** strategy, Groël will shortly be able to have a "zero" drainage system spearheading the respect for our mother nature.*

Sustainable packaging
For all our packaging and printed material, we use FSC® (Forest Stewardship Council) paper; boxes, catalogues, instruction manuals, editorials and press releases all are printed keeping in mind the environment.

Waste treatment
• Implementing our reduction of CO2 emissions control plan, many of our processes have benefited from our alternative energy plants making it possible to achieve an important reduction in CO2 emissions and a reduction of grid supplied energy usage contributing further to a cleaner environment.
• All cleaning processes use 100% biodegradable detergents ensuring minimal environmental impact. Our polishing systems use the most natural products available reducing further raw wastage.

INOX TECH es un acabado que cumple los tests de la norma UNI ISO 9227 que otorga a nuestros productos una excelente resistencia en exteriores y ambientes cercanos al mar.

Con una dureza superficial ISO 14577>1500 HV, las pruebas realizadas en laboratorio garantizan su resistencia a los siguientes agentes químicos: ácido clorhídrico, ácido sulfúrico, ácido nítrico, ácido oxálico, ácido acético, ácido cítrico, bicarbonato y potasio cáustico, cianuro y desengrasantes alcalinos.

En el afán por conseguir la excelencia, hemos sido reconocidos por CATAS acerca de nuestros procesos.

NSS UNI EN ISO 9227:2006

Garantía de por vida frente a la corrosión. (Inox Tech)

15 Años de garantía en cromo brillo y cromo satinado frente a la corrosión.

10 Años de garantía en acabado blanco y negro frente a la corrosión.

INOX - TECH by Groël is a finish that fully complies with the UNI ISO 9227 standard, ensuring an excellent resistance to harsh and high salinity outdoor environments.

With a surface hardness according to ISO 14577>1500 HV, lab tests guarantee resistance to the following chemical agents: hydrochloric acid, sulfuric acid, nitric acid, oxalic acid, acetic acid, citric acid, bicarbonate and caustic potassium, cyanide as well as alkaline degreasing agents.

As a sign of excellence, all our processes have received the coveted CATAS certifications placing Groël at the leading edge of finishing technology playing a key role in the industry.
