String Music

Light is silent music, it can fill the space like music, and it can make people happy. In the string series, the shape of the string and the bow becomes the most concise design language, and the collision of the lines outlines the scene where the bow and string meet. This simple design concept gives the lighting more artistic atmosphere.

Pure Geometry

Returning the design to the purest geometric charm, square and circle are the two extremes of geometric art, and the extreme rational order, the circle is the absolute sensual romance. The extremely simple and delicate geometric charm of the Fangyuan series relies on the familiarity of light effects, and this difficulty has become its highlight.

Jazz

Jazz pays attention to the expression of self-emotion and originality or improvisation, which coincides with our design philosophy. The enthusiasm of the jazz instruments gives us inspiration, using the shape of the instrument to present, the minimalist shape combined with the modern surface treatment process to reflect the texture.

Morning Glory

Inspired by morning glory it outlines the shape of flower with extremely simple lines. It presents romance in a rational way. It is also a work suitable for DIY. It builds different artistic conception to the space in a haphazard fashion through different arrangement and combination. Simplicity can give a person more imagination space. A flower is called self-appreciation while a mass of flowers is called a sea of flowers

Small Boat

Design is an expression of art. Like painting, it conveys a concept or a charm. It is inspired by the design of the cultural image of the oriental boat. It is a more harmonious and stable design through the conceptual reorganization of the boat and paddle. The shape, taken from the curved shape of the boat shape, also provides a better representation of the lighting effect, which also brings the poetry of the East to life.

Star Trails

The orbit of celestial bodies in the universe is the product of macro mechanics, following the most stable structure of nature and pure physical beauty.

The star orbit series takes the planet orbit as the design inspiration, and the coexistence of the planet and the orbit forms a stable and full of tension art picture and carrier. The secondary light source structure which can be adjusted separately gives another more human-oriented display form to optics,
