

BARJ BUZZONI

ART FOR LUXURY

habito

BARJ BUZZONI

ART *FOR* LUXURY

b arj buzzoni, leader in the field of Classic and Contemporary Art since 1955, welcomes a new concept of Art making.

habito is an original fully hand-made set of wall-to-wall art pieces.
habito tributes the owner and his hosts with Art and emphasises the beauty of the luxury estate.

Our artists are able to handle the different materials, colours, finishings, and frame dimensions to encounter customer specific needs and preferences in terms of shape, size, frame, colour, finish and surface coating.

In order to confidently understand customer tastes and have a full understanding of the project requirements, we will secure the customer dedicated attention thanks to our project department.

habito

Humans have always been able to identify several means for uncovering the truth of Nature. Architecture, painting and language are notable examples.

As Art is the means through which artists uncover Nature mysterious bonds and give real understanding of beings, with the collection 'habito' our artists bring back from the past and welcome the **forgotten sense of living the home**.

habito comes from latin **hābito** which conventionally means "living in a house". The real understanding of "living the home" is different from "staying in a place" as making an art-work is different from the mere act of representing a subject.

The original act of "living the home" refers to the act of "undressing".
It allows men to undress from their "social suits", making it the place of intimacy, the place in which measurable things are forgotten to **embrace what is human and real**.

It is the place where true **relationships are built and strengthened**.
It is the place where humans can be what they really are.
It is the place in which **Art can finally be free** and donate sense to reality.

habito wants to tribute the owner and their hosts
with the **very sense of living**:
"alleviate from the measurable
to jointly live the immeasurable."
