CONCEPT

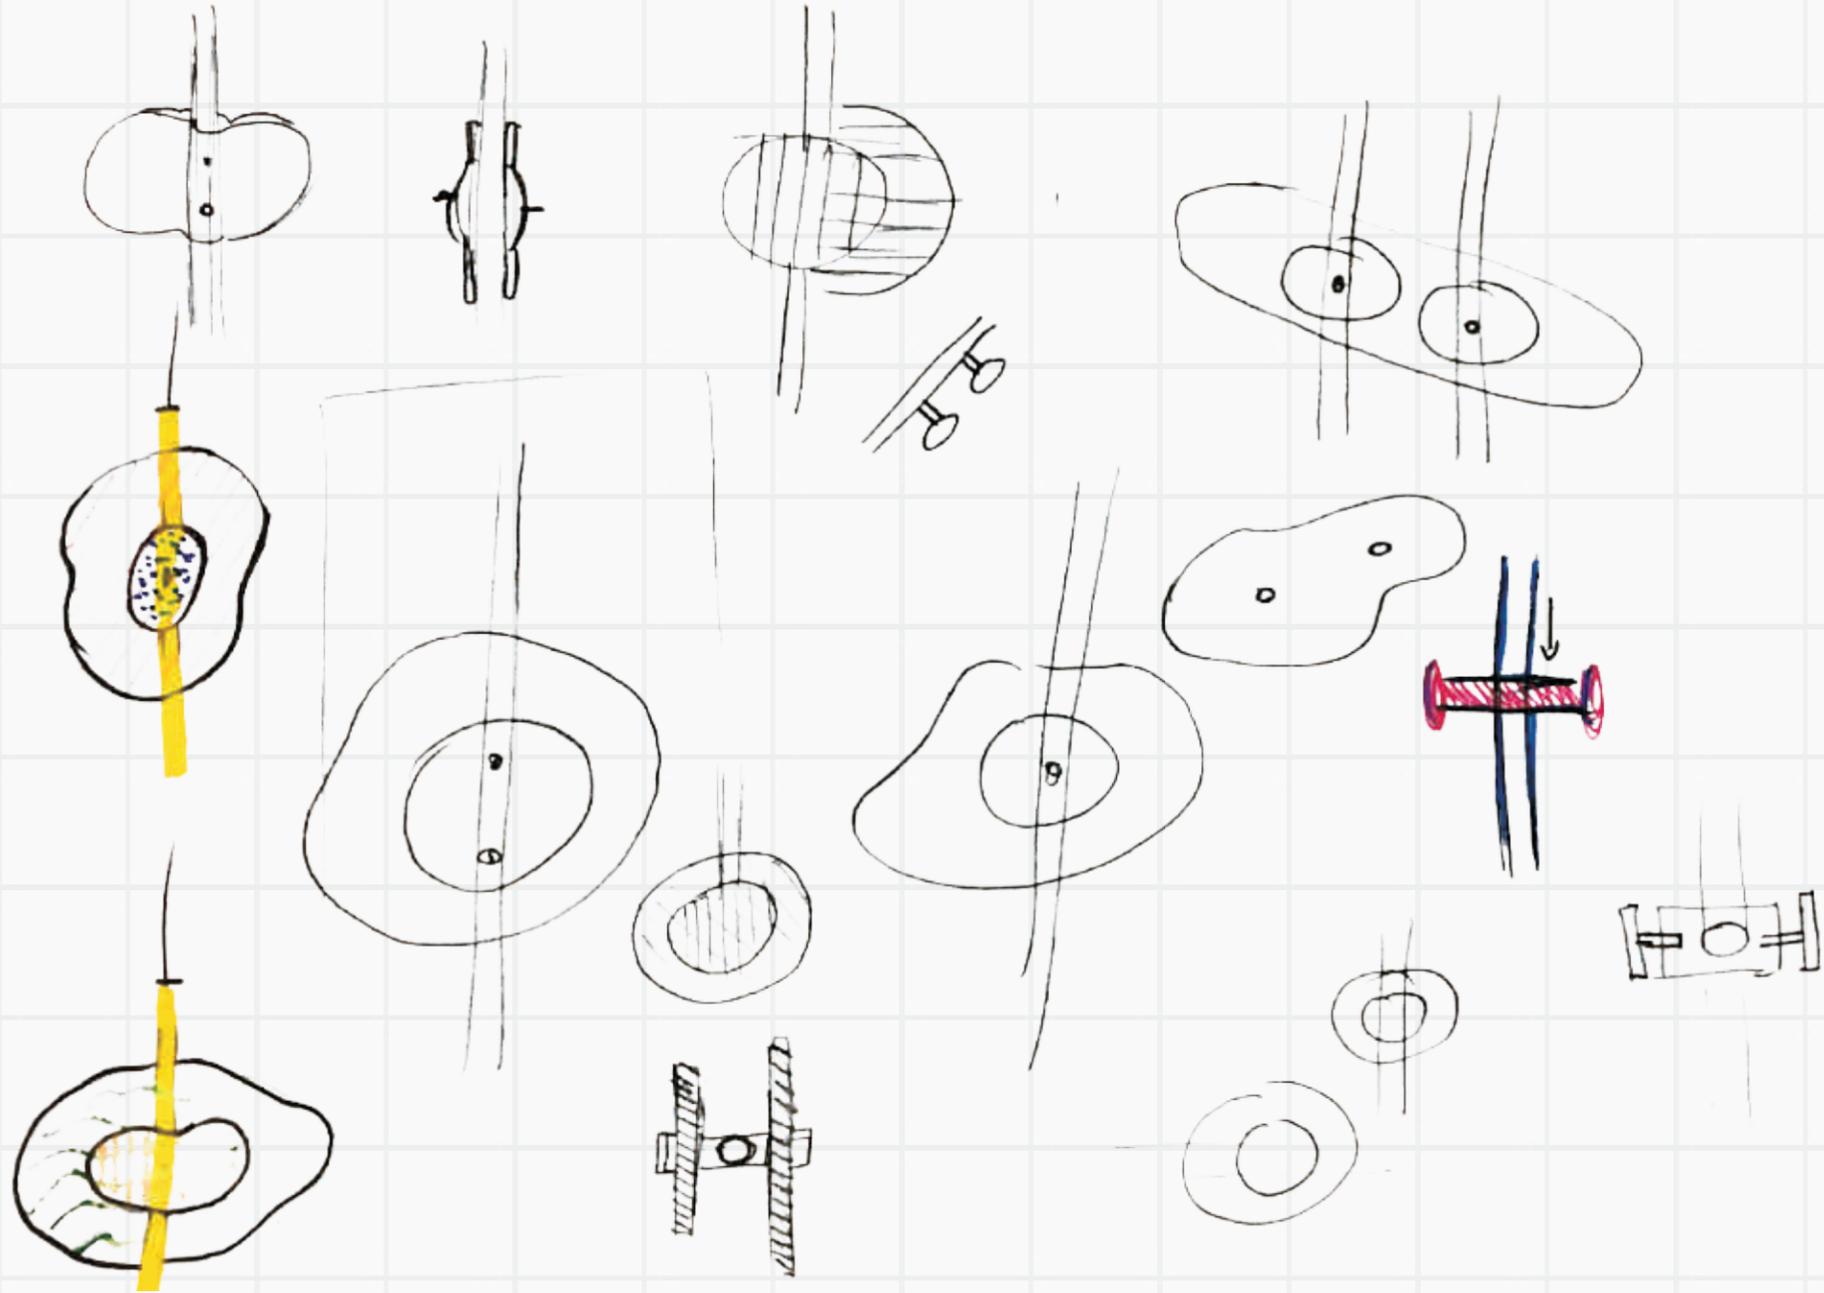

Il progetto nasce dall'idea di creare una forma che possa dare leggerezza al vetro partendo dal concetto di un semplice foglio che si declina in diverse forme, caratterizzate da colori e texture dinamiche.

Ispirazione

Our inspiration comes from the image of the muse of the art goddess in western mythology. The piano in her hand brings a happy and elegant atmosphere to people.

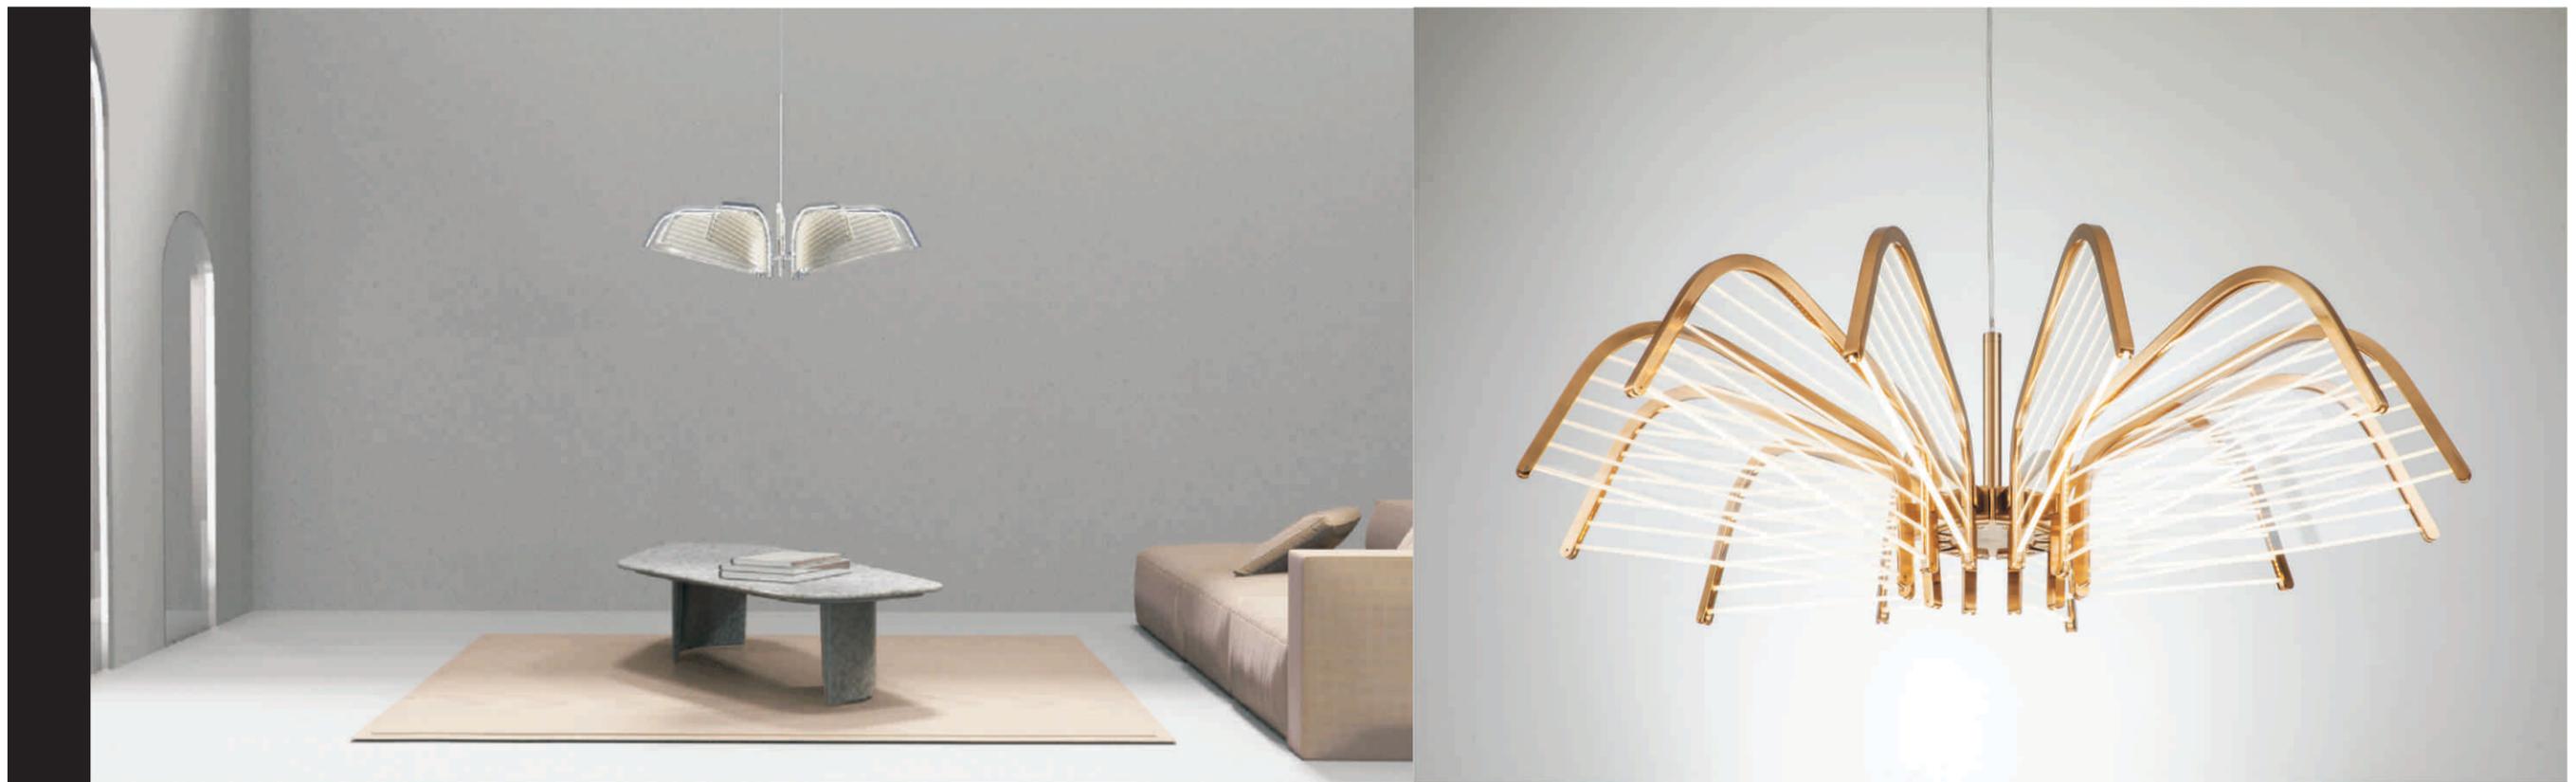

Fuochi d'artificio

Ritorno al passato

Perché non prendere ispirazione da quel quadro unico per creare un prodotto di design? La perfezione, l'armonia, il classicismo è *FLUXUS*, un lampadario a sospensione la cui forma si ispira alla *Gorgiera*, un tipo particolare di colletto pieghettato che fece parte dell'abbigliamento nel XVI secolo raffigurato in numerosi dipinti. In passato infatti, questo dettaglio stilistico divenne un simbolo tanto importante da contraddistinguere persino l'appartenenza ad un ceto sociale molto abbiente.

AUGUSTO

Augusto è un titolo che si attribuiva agli imperatori romani. La parola deriva dal verbo augeo, che ha in latino il significato di accrescere: sono coloro che diffondono il benessere, la ricchezza e la floridezza, grazie al potere che rivestono.

La nostra lampada vuole farsi portatrice di questi valori, le sue forme hanno rimandi ad un'architettura antica e possente, che da tempo rappresenta il gusto del classico.

Augustus is a name that was given to the Roman emperors. The word derives from the verb augeo, which in Latin has the meaning of increasing: they are those who spread well-being, wealth and prosperity, thanks to their power. Our lamp is the representation of these values, its shapes refer to a powerful architecture.

Il gioco di sovrapposizione che si viene a creare riporta ad uno sguardo al passato. Più vengono sovrapposte le costruzioni, più si perde il loro ricordo nel tempo. La luce che filtra dai vari strati, si carica di valori e fa riecheggiare nelle case la forza di un antico popolo.

The overlay that is created allows us to take a look at the past. The more buildings overlap, the more their memory is lost over time. The light that is filtered through the different layers of glass is loaded with values and resonates the strength of an ancient people in homes.

La texture è stata studiata per mascherare la zona di contatto dell'estruso e mettere in relazione i vari elementi. La sua intensità tende a diminuire verso i bordi esterni, fino ad azzerarsi.

Esprime la forza racchiusa al suo interno che diminuisce man mano che ci si allontana dalla struttura centrale.

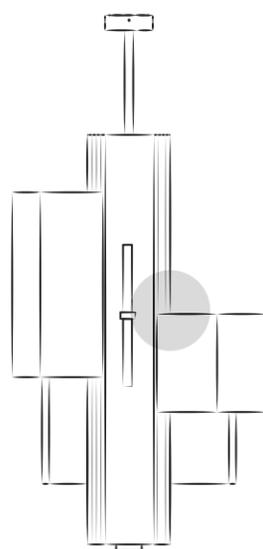

The texture has been designed to mask the contact area of the extrudate glass and relate the various elements. The intensity of the light tends to decrease towards the outer edges. It expresses the strength enclosed within it which decreases as you move away from the central structure

L'elemento luminoso è realizzato per estrusione con una finitura opalina. E' stato progettato per allungare la luce ed i riflessi all'interno della composizione. La sua lunghezza permette di farla risaltare attraverso i diversi strati.

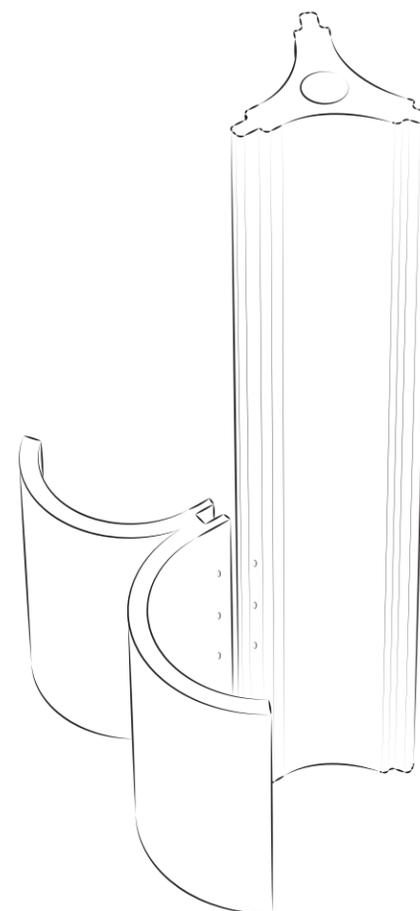

The luminous element is made by extrusion with an opal finish. It was designed to extend the light and reflections within the composition. Its length allows it to stand out through the different layers.

Gli elementi laterali vengono fissati al supporto centrale tramite dei grani posti lungo la zona di contatto.

The side elements are fixed to the central support by means of dowels placed along the contact area.
The side elements are fixed to the central support by means of dowels placed along the contact area.

Armonia

Harmony

Fiori e umani hanno molte più qualità in comune di quanto si possa pensare. Entrambi necessitano di vivere l'uno vicino all'altro, loro per potersi scambiare il polline e generare nuove vite, per noi invece, è indispensabile condividere i nostri pensieri, i nostri sentimenti e passioni. Riunendoci diventiamo forza generatrice di vita, e la forza dell'incontro è tale da generare luce.

Flowers and humans have many qualities in common than you might think. Both of them need to live close by to the other, them to be able to exchange the pollen and generate new lives, for us instead, it is essential to share our thoughts, our feelings and passions. By uniting we become life-generating force, and strength of the encounter is such as to generate light.

La lampada è costituita da un tubolare metallico curvato sul quale sono fissati i "petali" stampati in vetro. L'illuminazione proviene da tre estrusi racchiusi dalla forma del tubolare.

The lamp is made up of a curved metal tube on which the glass molded "petals" are fixed. The lighting comes from three extrusions enclosed by the shape of the tubular.

Il petalo è realizzato tramite vetro stampato sul quale è presente una texture superficiale opacizzante abbinata a delle striature in rilievo.

Le venature mettono in relazione la forma del petalo con la curvatura del tubolare, andando ad enfatizzare la loro danza.

The petal is made of printed glass on which there is an opaque surface texture combined with raised streaks. The veins relate the shape of the petal to the curvature of the tubular, emphasizing the movement.
