

L'ARTE  LUCE®

2023

# odo

Odo è una lampada a sospensione che richiama la forma archetipica del cerchio, simbolo di armonia e movimento. È costituita da due elementi concentrici affiancati, in alluminio e vetro ed è sorretta da una corda annodata alle due scocche che permette di direzionare la luce ruotando la fonte luminosa.

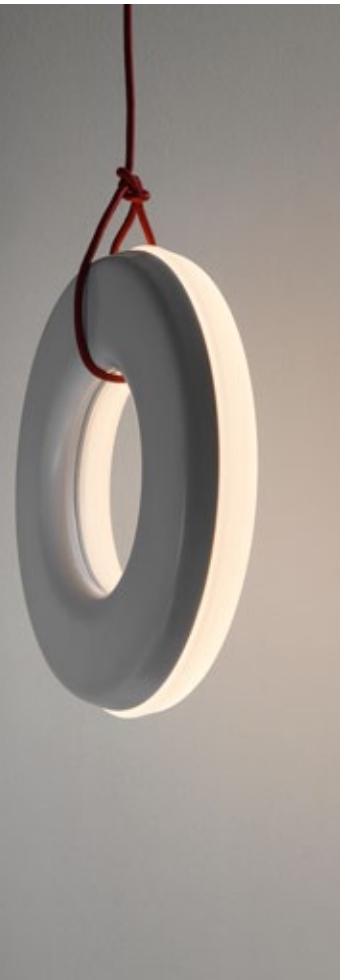

Odo is a pendant light which recalls the archetypal shape of the circle, the symbol of harmony and movement. It consists of two concentric elements, in aluminium and glass, placed side by side and suspended by a cord knotted around them, which allows the light to be oriented by turning the light source.

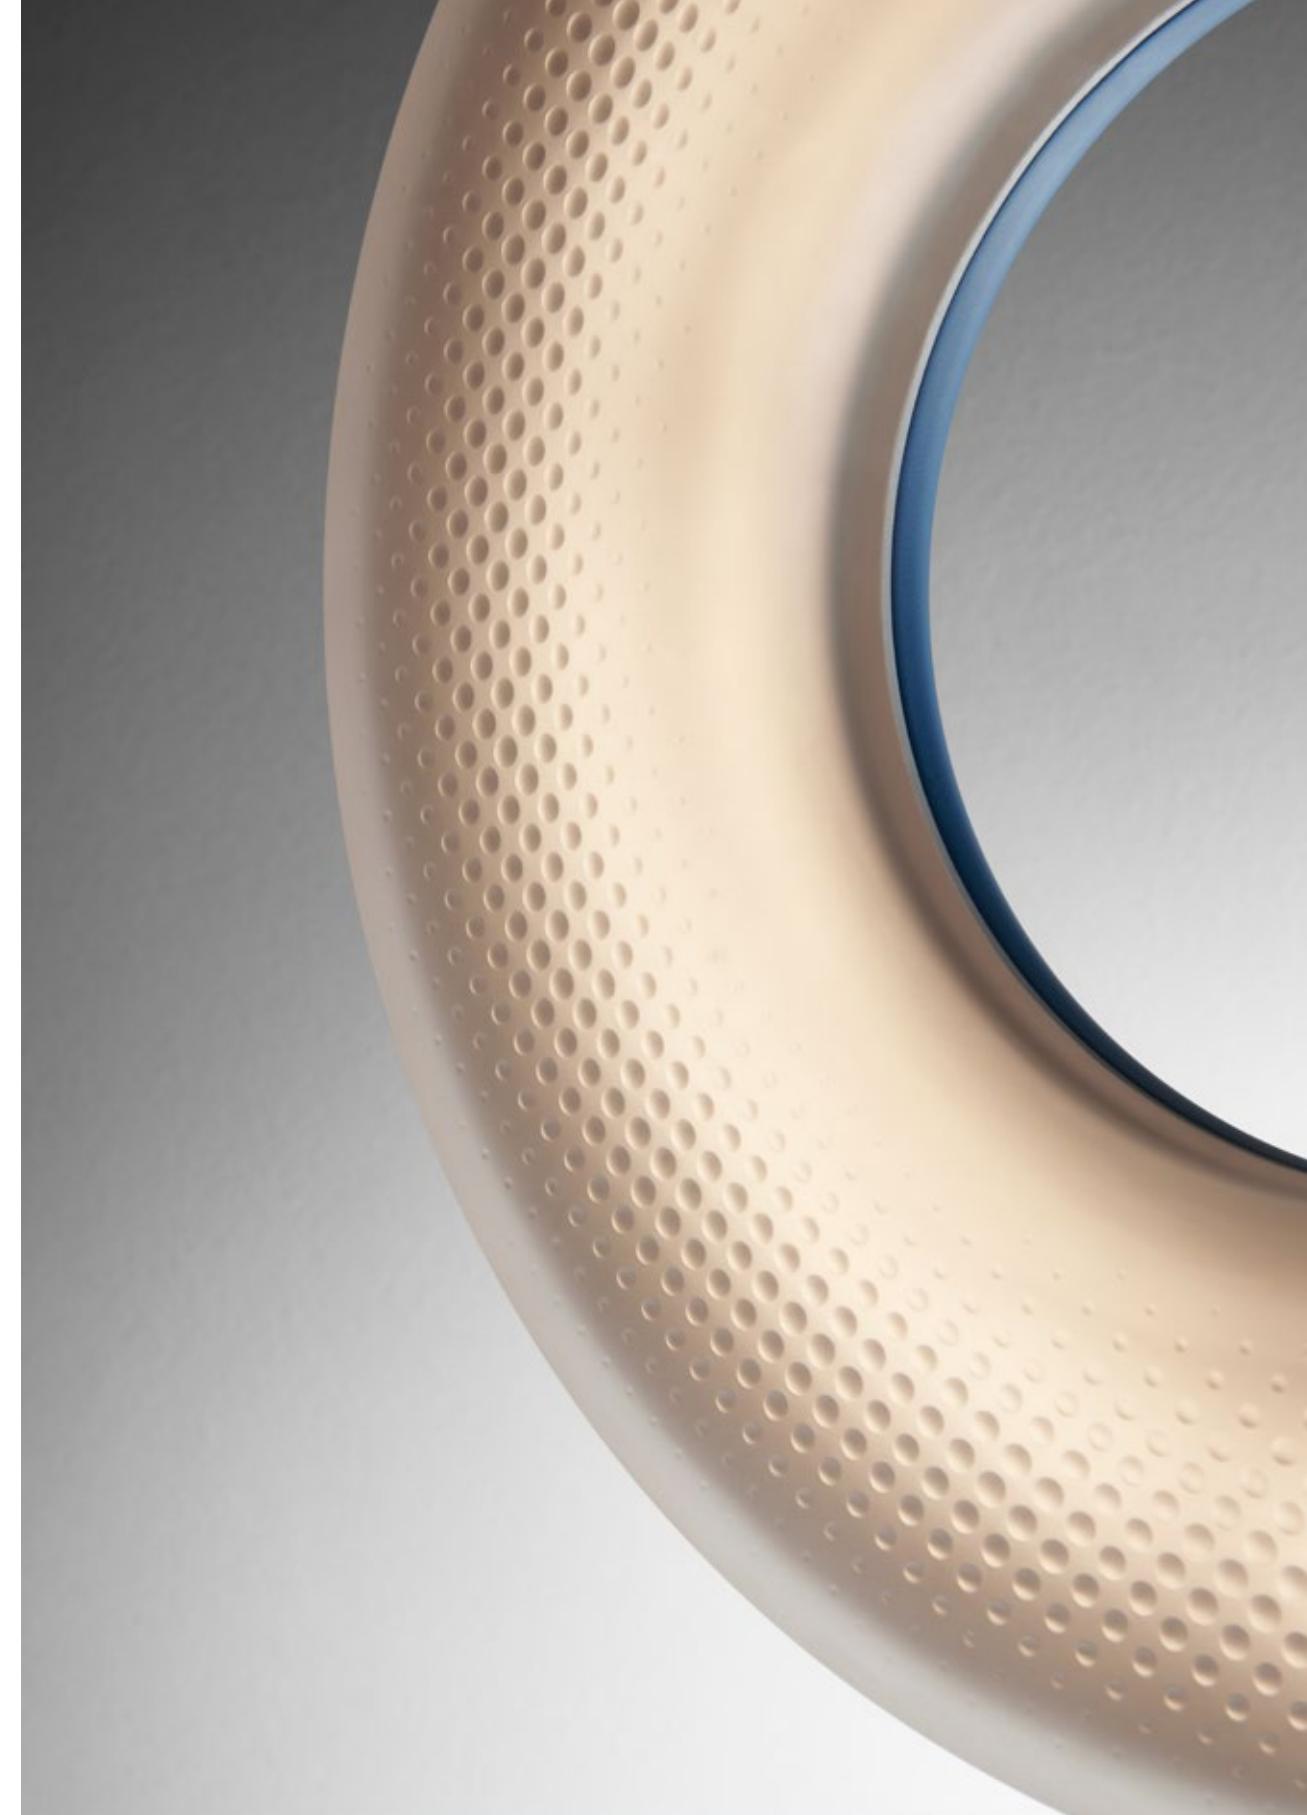

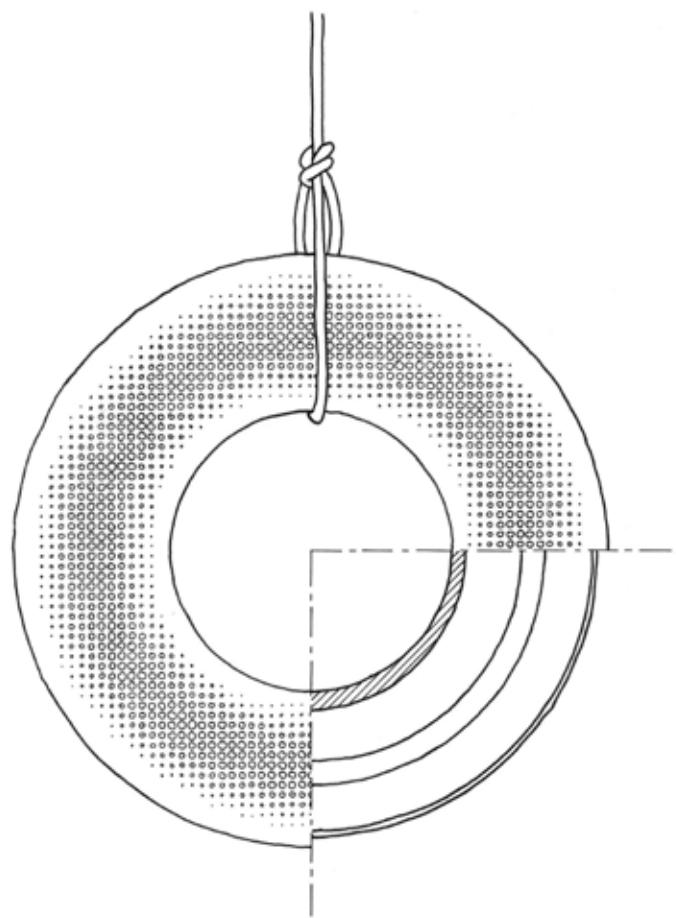

odo

odo

odo

## odo

Odo è progettata per fornire due intensità di luce per due diversi utilizzi. Una diretta e forte è conferita dalla texture del vetro satinato stampato e ottenuta attraverso l'utilizzo di un algoritmo parametrico sviluppato in fase di progettazione. Le sfere presenti sulla superficie cambiano così di grandezza per fornire una migliore diffusione della luce: sono maggiormente presenti nella sezione di vetro che copre la fonte di illuminazione e si diradano verso i lati.

L'illuminazione indiretta e soffusa è ottenuta dalla sporgenza della scocca di vetro satinato oltre la circonferenza esterna di quella in alluminio. La finitura del vetro permette alla luce di essere trasportata e di creare un segno grafico attorno alla lampada.

Odo is designed to emanate two intensities of light for two different uses. One is direct and strong, produced by the printed texture on satin-finish glass and obtained by using a parametric algorithm developed during the design phase. The circular pattern featured on the surface, therefore, changes in size to diffuse the light more effectively.

The pattern is denser on the section of glass which covers the light source and more spaced out towards the sides. The indirect, soft lighting is achieved by the satin-finish glass circle which extends beyond the outer edge of the aluminium circle. The glass finish allows the light to be projected outwards, creating a striking halo of light around the light shade.

# ida

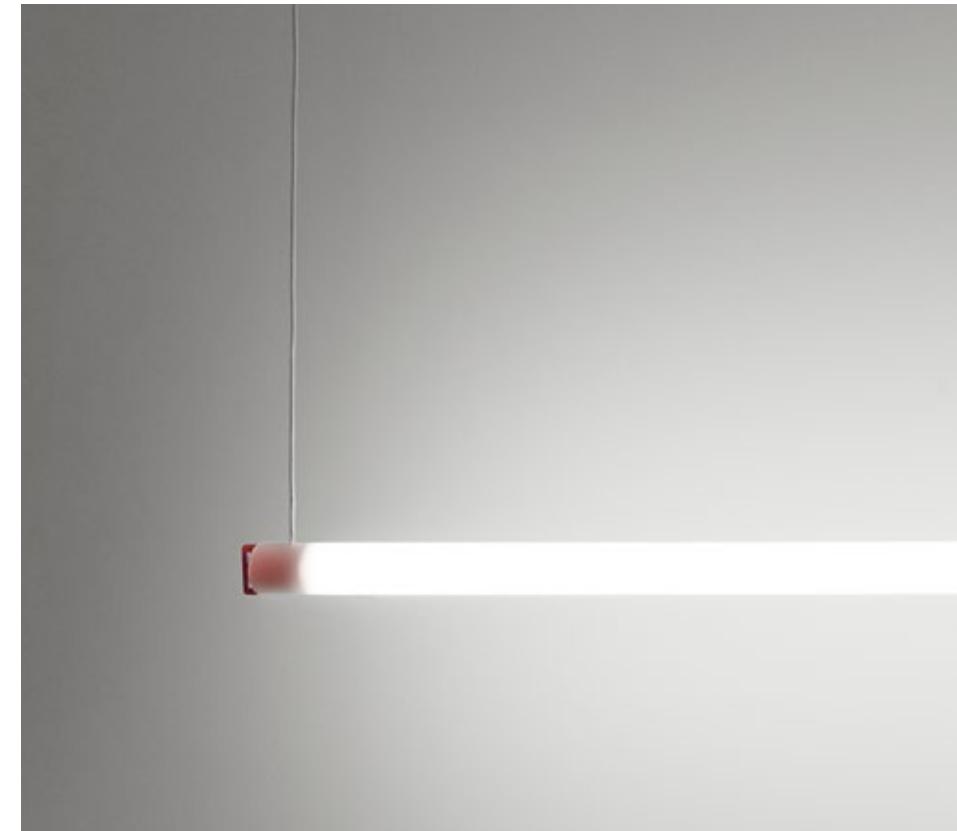

**Linee stilizzate e leggere sono i tratti distintivi di Ida. La lampada a sospensione è costituita da un cilindro in vetro estruso e satinato, con due inserti in metallo colorato alle estremità che sostengono il led al suo interno e creano un effetto di offuscamento del colore ai lati.**

Stylized and minimalist lines are Ida's distinctive features. The suspension lamp comprises an extruded and satin-finished glass cylinder, with two coloured metal inserts at the ends, which support the LED inside and create colour-blur effects on the sides.

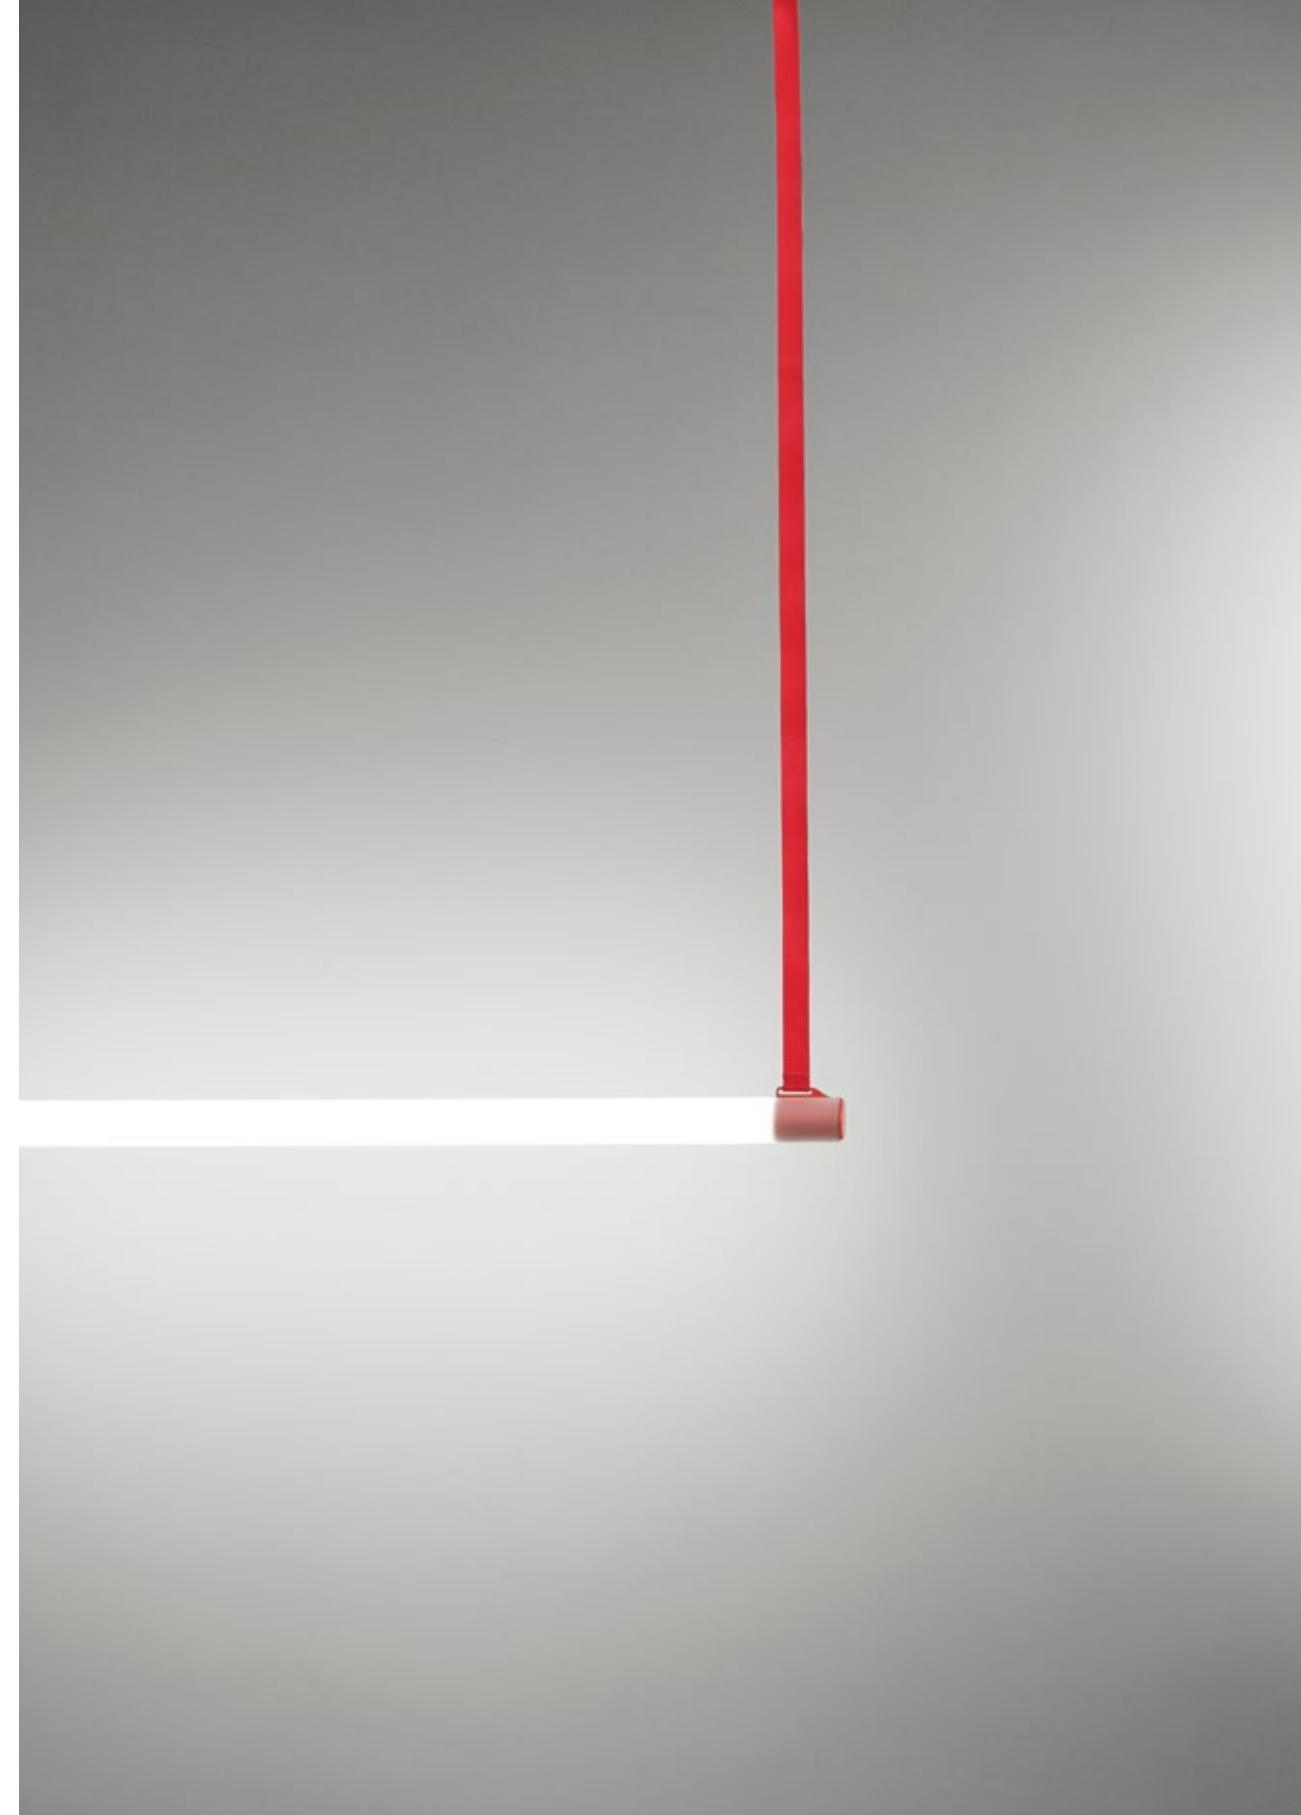

ida

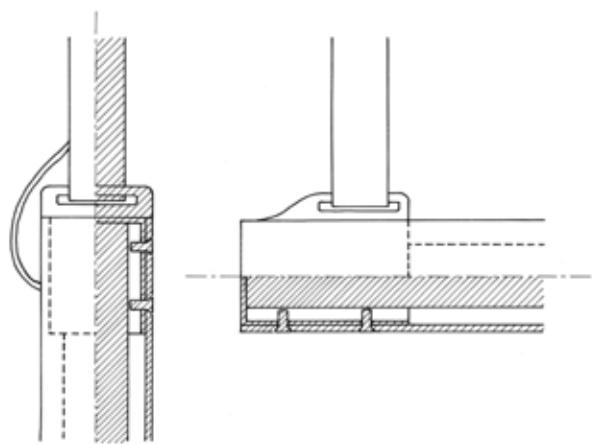

La versatilità del prodotto è data dalla possibilità di direzionare in orizzontale o verticale l'illuminazione grazie a un'apposita fettuccia in nylon che sorregge la lampada tramite un'asola. Il segno grafico che viene prodotto dai due orientamenti illumina lo spazio in modo dinamico e diffuso adattandosi ad ambientazioni differenti.

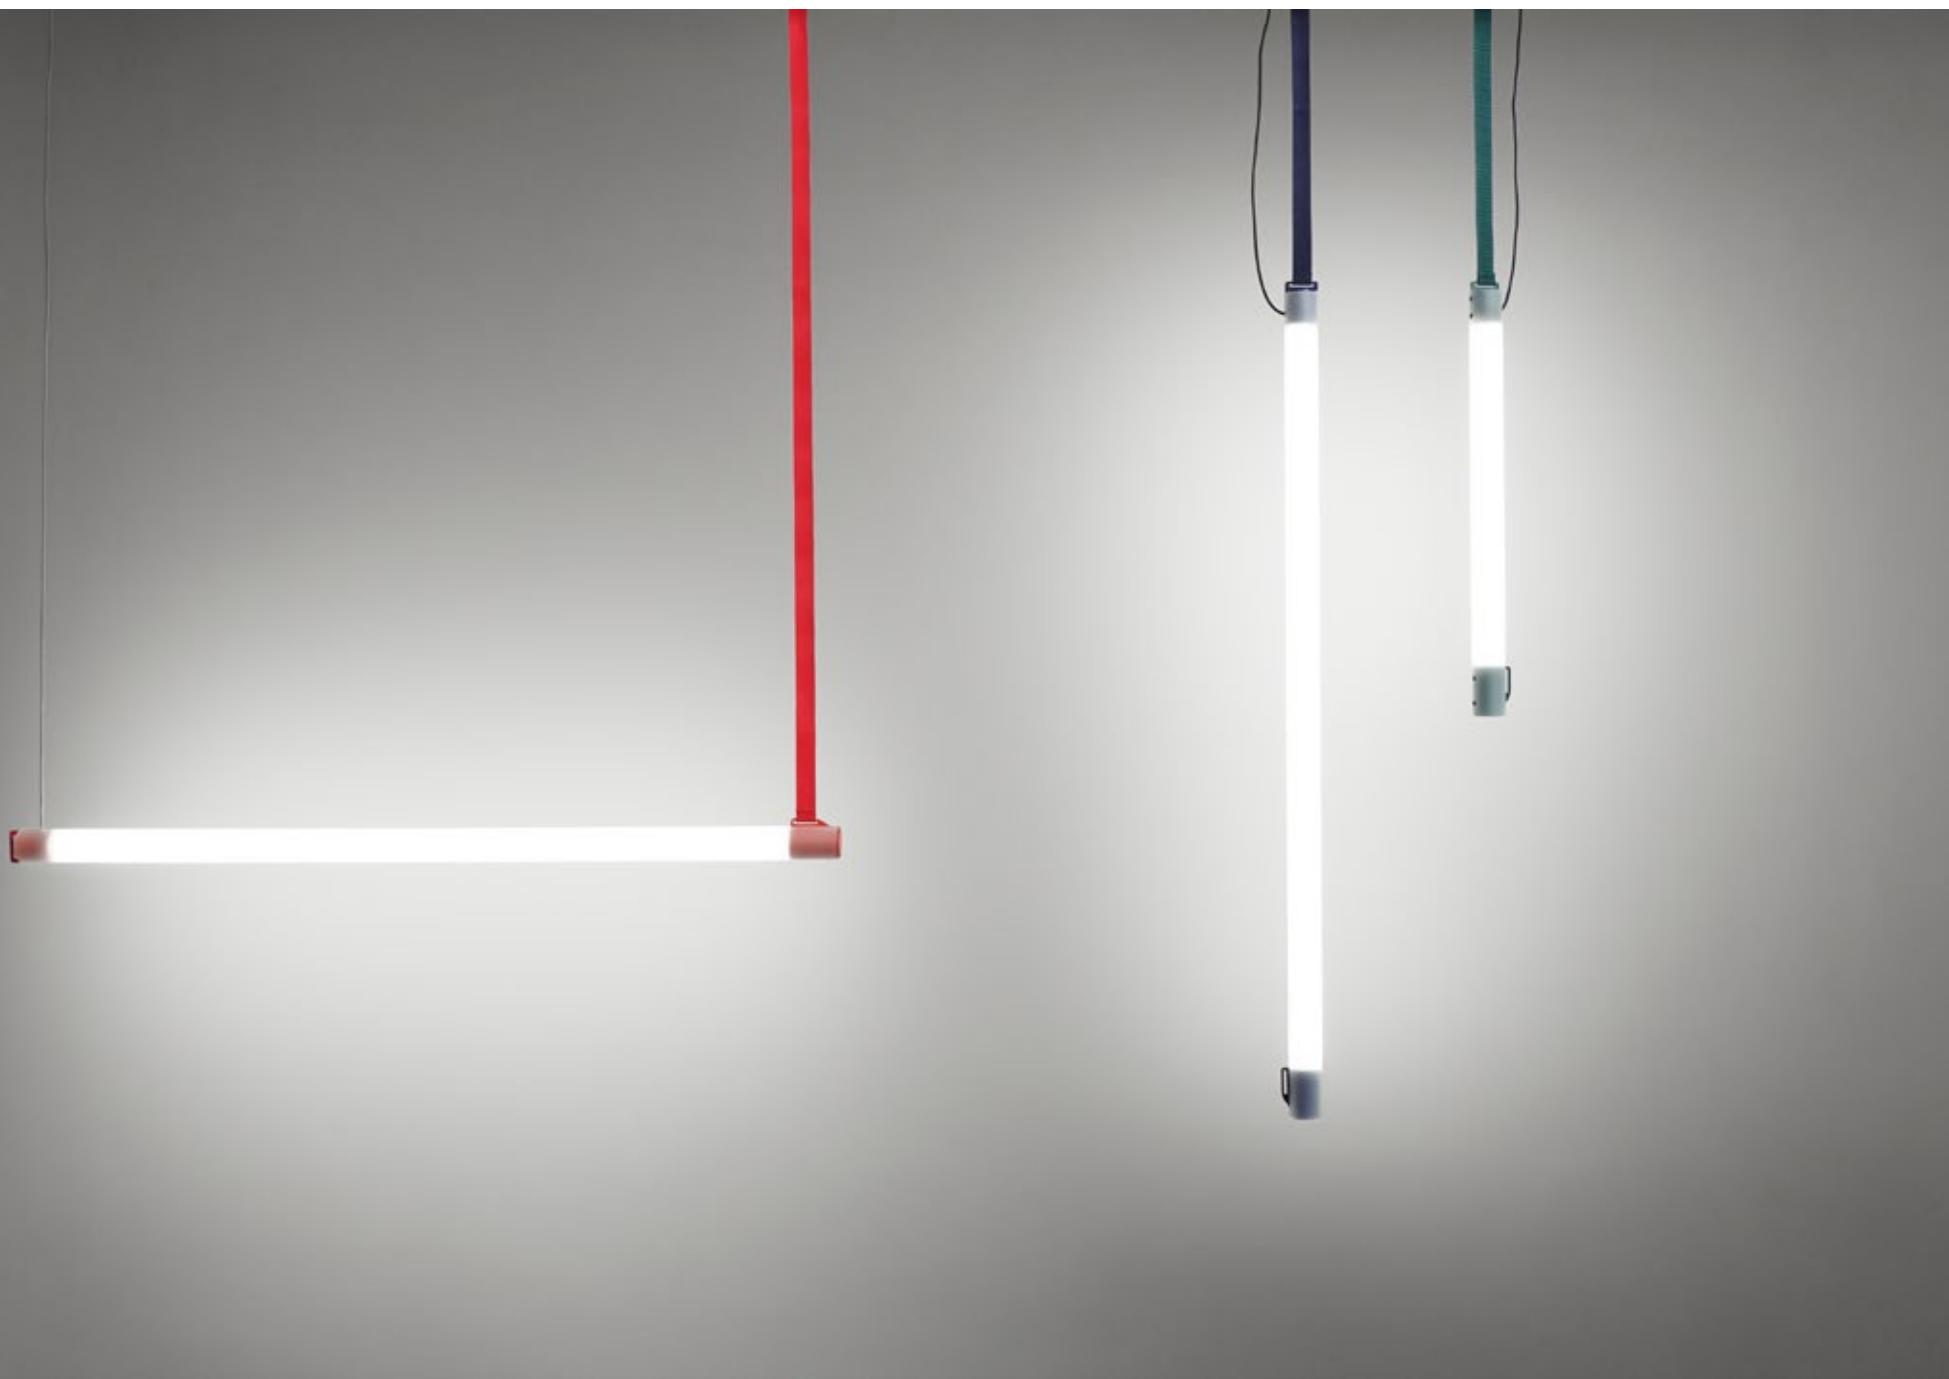

The special nylon webbing that supports the lamp through an eyelet makes this piece particularly versatile, since the light can be made to beam horizontally or vertically. The outline produced by the two orientations broadly and dynamically illuminates a space, adapting to different environments.

# nino

Nino è una lampada a sospensione costituita da un paralume in metallo verniciato e da una lente concava in vetro pressato. La forma generosa, dalle linee essenziali, si adatta agli ambienti casalinghi e contract e la paletta di colori richiama le tonalità del mare, della pietra e della nebbia.

Nino is a pendant lamp comprising a painted metal shade and a concave pressed-glass lens. Its generous yet minimalist shape adapts to both residential and commercial settings, and its colour palette brings to mind the hues of sea, stone and fog.

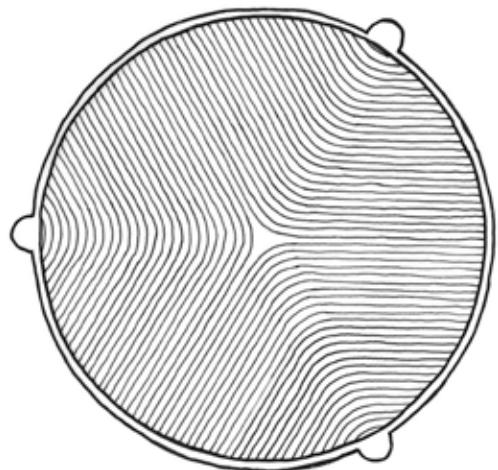

nino

nino

Il diffusore in vetro concavo si innesta  
a pressione nel paralume, da cui sporge  
leggermente, creando un effetto lente  
che incrementa la diffusione della luce  
nello spazio richiamando l'illuminazione dei fari.  
La texture interna nasconde la lampadina  
e all'esterno rimane liscia al tatto.

The concave glass diffuser snaps  
into the lampshade, from which  
it slightly protrudes, creating a lens-  
effect that increases light diffusion,  
evoking headlight beams. The lamp's  
internal texture conceals the bulb;  
its exterior feels smooth to the touch.

# ulla

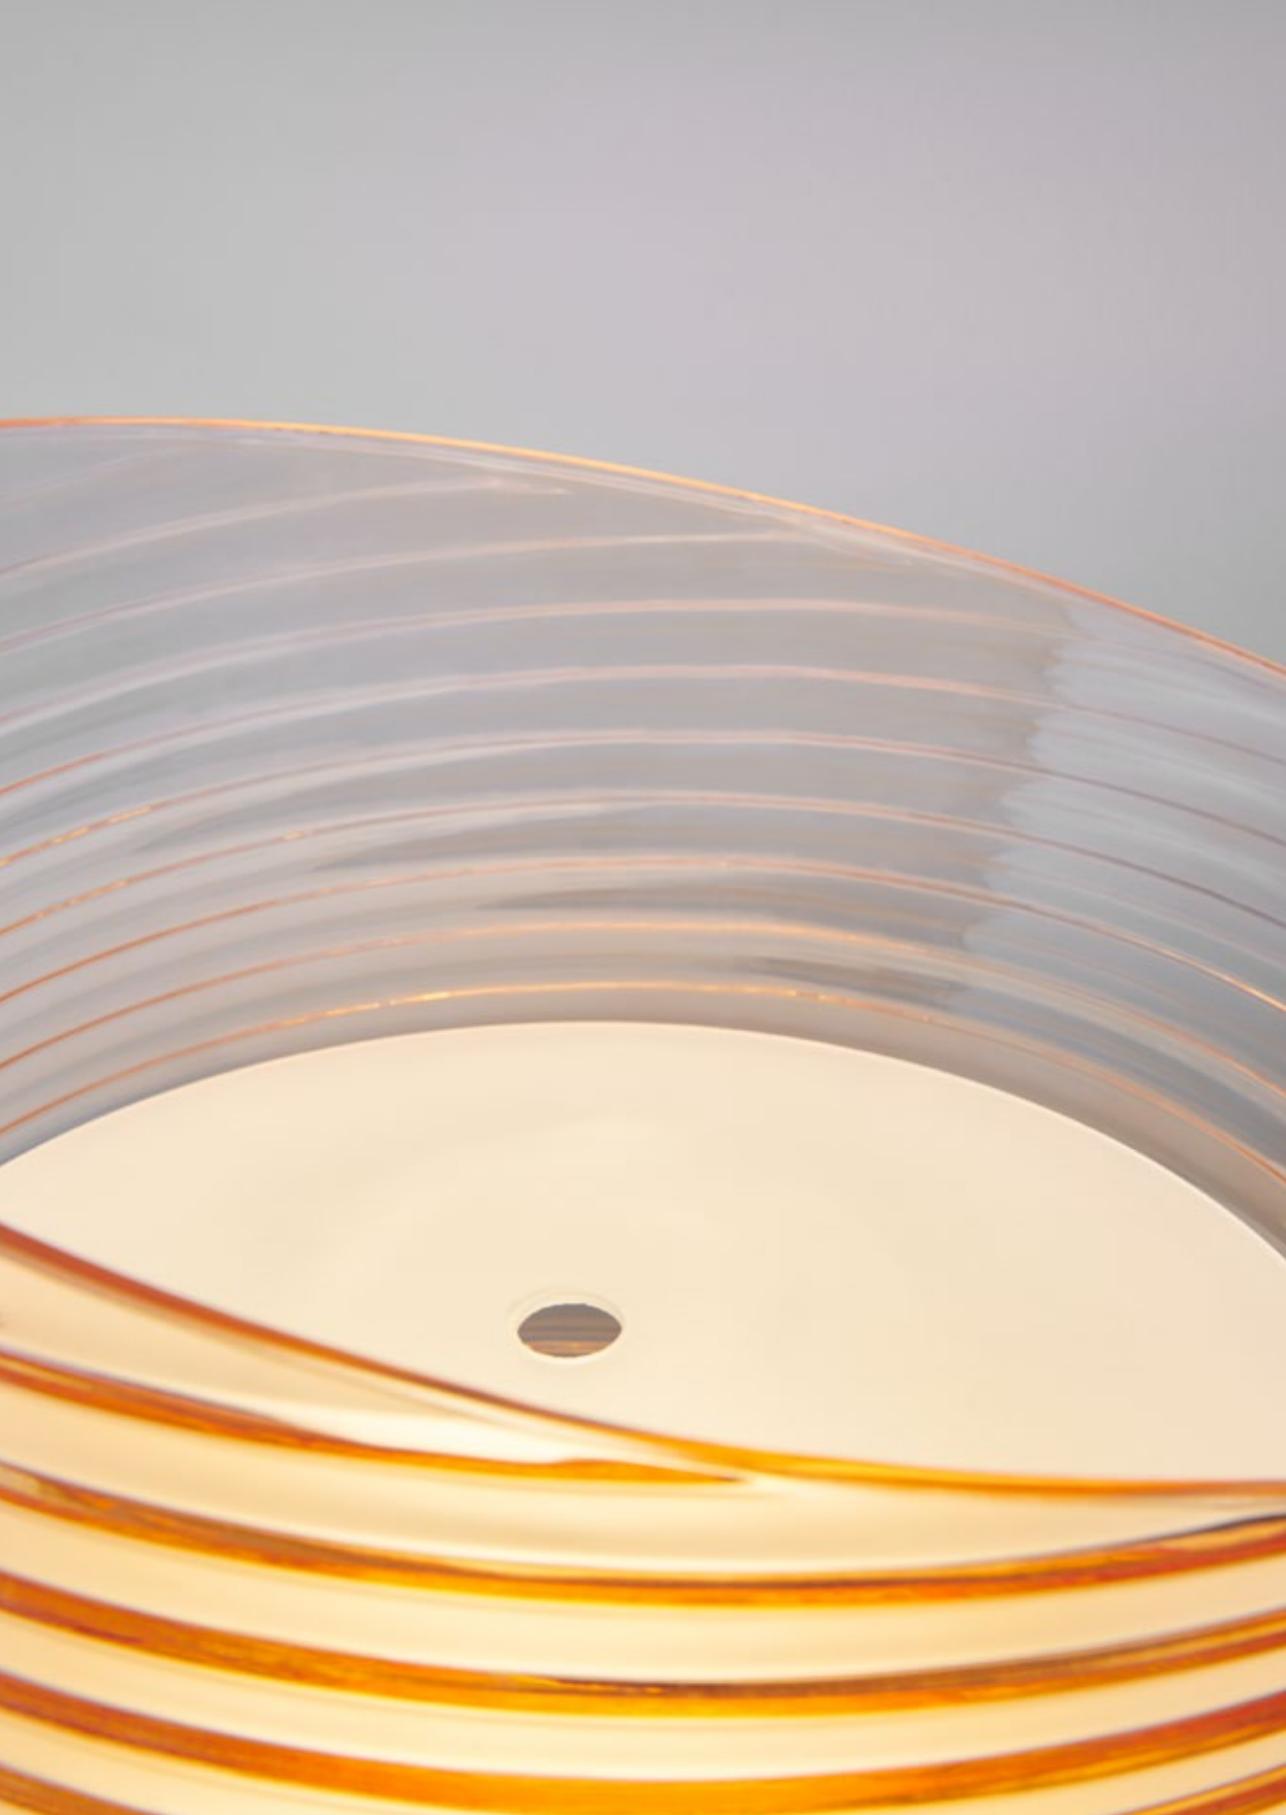

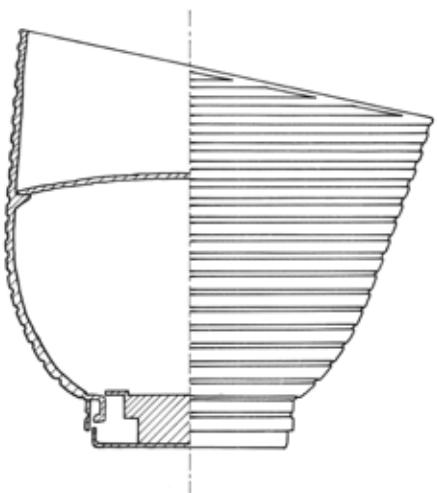

**Ulla è una lampada dalla forma avvolgente, da terra e da tavolo, realizzata in vetro con la base in metallo. La trasparenza del prodotto enfatizza la texture, composta da righe orizzontali in rilievo che si diradano verso l'alto secondo un algoritmo parametrico che ricrea il propagarsi delle onde nel mare.**

Ulla is a lamp with an enveloping shape, made of glass with a metal base. It is available for floor and table installation. Its transparency emphasizes the texture, comprising horizontal lines in relief that thin out upwards, reflecting a parametric algorithm that recreates the propagation of waves in the sea.

L'effetto luminoso è enfatizzato dal disco in vetro satinato sospeso al centro che si illumina in modo omogeneo diffondendo la luce emessa dalla base. L'inclinazione del volume della lampada e l'orizzontalità della base e delle linee della texture richiamano il movimento del liquido all'interno di un bicchiere inclinato, conferendo all'ambiente un'atmosfera magica e dai toni soffusi.

The luminous effect is emphasized by the frosted glass disc suspended in the centre that lights up evenly, beaming the light emitted by the base. The inclination of the lamp, its horizontal base and texture lines evoke the motion of liquid inside a tilted glass, giving the room a magical flair and soft tones.
