Only a few materials, such as the metal, has impressed and are impressing nowadays the human civilization.

At present day, along with new forms of communication, new sources of energy and new means of transport, the metals remain central in our technology.

They assume new shapes and new functions; it is in Florence, in this contest, that the poetry of the cold iron, subdued with hammer, anvil, fire and water, transform itself in artistic chandeliers of incredible beauty.

It is a magical situation that, every days starting from the years '70th , it is repeating itself in the "Mechini smithy".

The firm has growing during the years specializing its activity in the creation of wrought iron items of high quality in the lighting field.

Thanks to the knowing hands of experienced persons in the firm Mechini, we can admire the passion for work, the professionals attitude but, above all, the marvellous emotions that the lights give.

It seems it comes directly from the wrought iron.

You can feel in our articles the richness of colours, the elegance and the distinction of the refined Florentine period.

All these elements make the Mechini chandeliers unique and inimitable in its creations.

For our 40 anniversary we have designed a chandelier that tells our whole tradition, originality, personality, creativity and experience to our creations. We made it in 4 different colors one for each decade of our history. While preserving the tradition and quality of materials (iron, Bohemian crystal, porcelain and Bohemian crystal) harmonized with precious decoration techniques and workmanship, the emotion that we hope to convey you is the passion and love that has enabled to create this chandelier.
