

VISION ON

NEWS
2024

La bellezza del legno pregiato, fonte inesauribile di ispirazione.

La creatività è innanzitutto capacità di meravigliarsi – della bellezza della natura, delle ispirazioni che ogni forma e materiale sanno darci. Se poi l'ispirazione viene dalle migliori essenze di legno, Noce e Rovere, dalla conoscenza delle loro caratteristiche maturata negli anni e nei decenni, la ricerca estetica non può che tradursi in soluzioni di design ogni volta differenti e originali. È questo il percorso che caratterizza Foglie d'Oro sin dalla sua nascita. È questo il percorso che ha portato alla creazione dei nuovi pavimenti e rivestimenti verticali raccolti in questo catalogo News 2024.

La rivisitazione creativa di forme iconiche incontra le ultime tendenze nell'interior design.

Insieme alla bellezza naturale del Noce e del Rovere, è l'attenta lettura delle ultime tendenze dell'interior design a fare da ispirazione per pavimenti che giocano con le forme più iconiche e mettono in dialogo il legno con altri materiali pregiati, come marmo e ottone. Pensiamo al pavimento a spina decostruito e rivisitato in Pop e in Soul, ma anche a soluzioni modulari come Frato e Twist, che già dal suono immediato e fresco dei loro nomi suggeriscono un design versatile e moderno, capace di dare personalità ad ogni ambiente adattandosi alle sue caratteristiche. Le nuove versioni del sistema Matita vanno in questa stessa direzione. A completare le novità, l'evoluzione nella personalizzazione di pavimenti molto amati come Azalea, Jazz e Tricot e la nuova boiserie modulare Shade 3D.

The beauty of fine wood, an inexhaustible source of inspiration.

Creativity is first and foremost the ability to marvel – at the beauty of nature, the inspirations that every shape and material can give us. If then, the inspiration comes from the best wood essences, Walnut and Oak, from the deep knowledge of their characteristics matured over the years and decades, the aesthetic research can only be translated into design solutions every time different and original. This is the path that characterizes Foglie d'Oro since its birth. This is the path that led to the creation of the new floorings and vertical coverings collected in this catalogue News 2024.

When the creative reinterpretation of iconic shapes meets the latest interior design trends.

Together with the natural beauty of walnut and oak, it's the careful analysis of the latest interior design trends to inspire floors that play with the most iconic shapes and relate wood with other precious materials, such as marble and brass. Let's think of the deconstructed chevron floor revisited in the special chevron Pop, but also of the modular solutions such as Frato and Twist, that already from the intuitive sound of their names, suggest a versatile and modern design, able to give personality to any environment, fitting its characteristics. The new versions of Matita collection go in this direction. Among the latest innovations, a further evolution in the customization of popular floorings such as Azalea, Jazz and Tricot, and the new modular wall paneling Shade 3D.

Twist

Modulo Design *Design Panel*

L'apparente semplicità di un elemento capace, in realtà, di generare disegni molto differenti a seconda di come viene installato:

Twist è un pavimento modulare sinonimo di libertà e versatilità, unite a uno stile squisitamente contemporaneo.

The simple appearance of an element capable, in reality, of creating different designs according to its installation: Twist is a modular floor, as a synonymous of freedom and versatility, combined with an exquisitely contemporary style.

Collezione RELEVO

Boiserie 3D

Boiserie 3D

Il design del nuovo modulo della collezione di boiserie 3D Relevo nasce da una precisa progressione della fresatura che dall'effetto tridimensionale della parte superiore degrada ad una superficie liscia. La possibilità di accostare tre moduli differenti – il modulo Code 3D, il modulo Shade 3D e il pannello liscio – dona alla parete un aspetto unico.

The design of the new module in the 3D Relevo of the wall panelling collection is based on a precise progression of the milling process, which degrades from an upper 3D effect to a smooth surface. The possibility to combine three different modules - the Code 3D module, the Shade 3D module and the smooth panel - gives the wall a unique look.

Matita Stilo

Modulo Design *Design Panel*

Il modulo Matita nasce libero, nella sua sintesi di regolarità modulare ed elevata personalizzazione: l'inserimento di un elemento decorativo in ottone che ricorda la forma della penna stilografica rappresenta quel dettaglio che impreziosisce e rende unico il pavimento.

The design panel Matita is born free, merging modular regularity and high customization: the addition of a decorative brass element that resembles the shape of the fountain pen, represents that detail that embellishes and makes the floor unique.

Matita Round

Modulo Design

Design Panel

In questo nuovo design, un elemento rotondo va a creare una piacevole dissonanza all'interno dello schema geometrico di Matita, fatto essenzialmente di linee rette. Le decorazioni possono essere utilizzate in modo ricorsivo o "casuale".

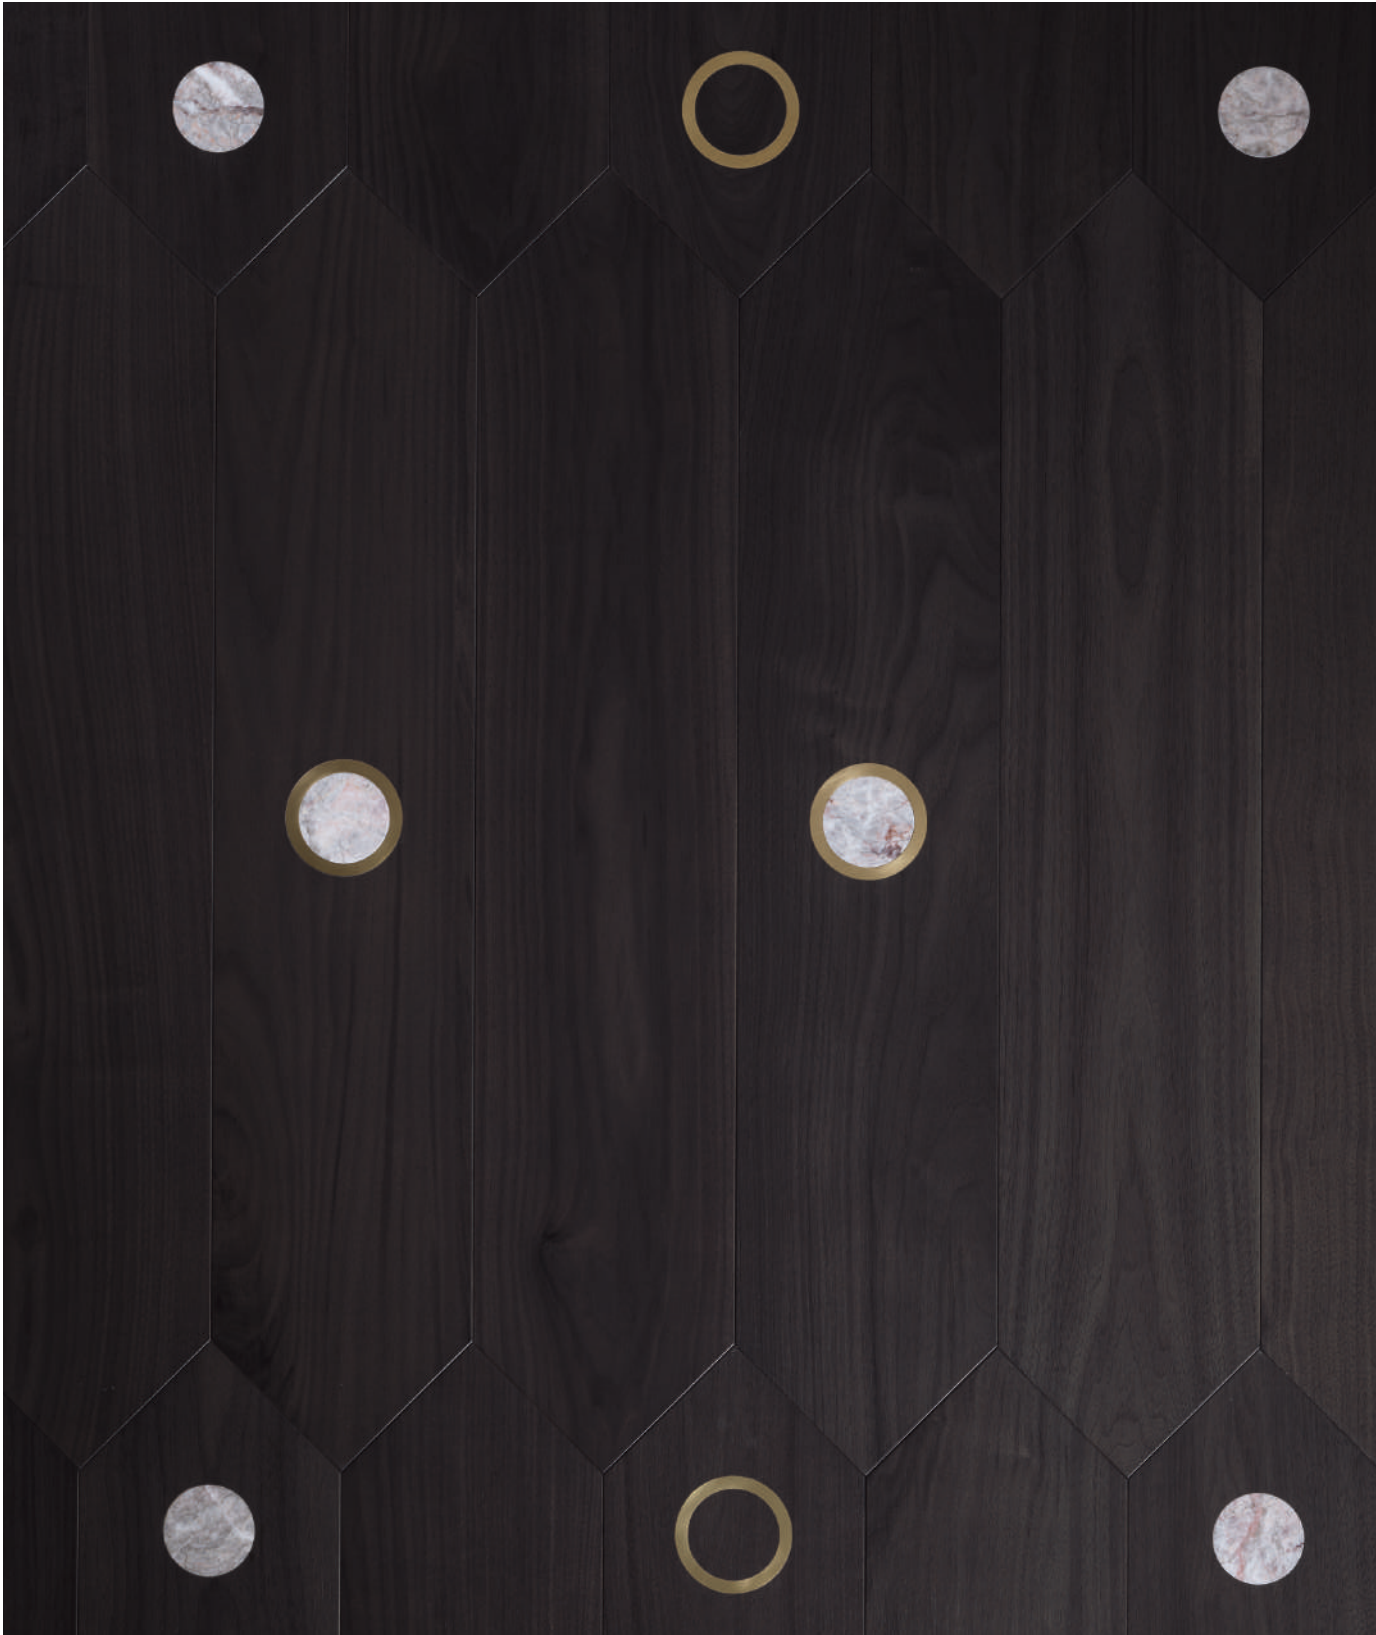

This new design features a round element that creates a pleasant contrast within the geometric pattern of Matita, which is mostly made of straight lines. Decorations can be used recursively or "randomly".
