## SOLAR ECLIPSE

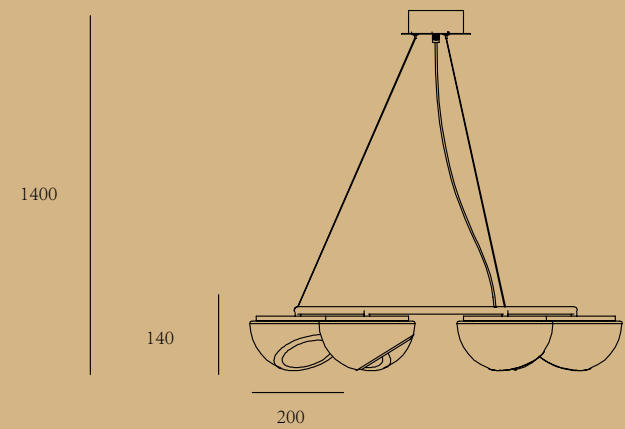

The spectacle of a solar eclipse is rare, and the astronomical beauty is glorious. AURORA Solar Eclipse series combines modern crystal technology and led perfectly to reproduce the natural wonder of the solar eclipse, the appearance integrates a new optical design, the delicate blend of "hand-made crystal glass" and "gradient color processing", blurring the line between clear and hazy, when the light is filtered by gradient crystal, grinding away the harsh edges of the light. Time seemed to slow down.

INTEGRATION

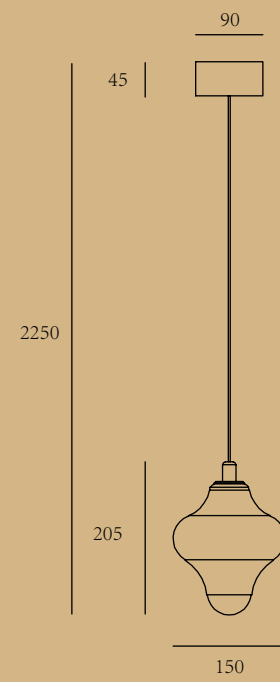

## INTEGRATION

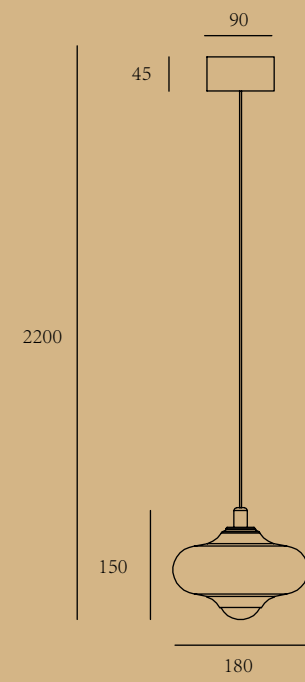

Inspired by the wisdom of fruit growth in nature - the fruits produced by the same plant are similar in shape but each has subtle differences, being both independent and coexisting in harmony. This life philosophy of "originating from the same source and being harmonious yet distinct" has become the core image of the design. When all the variant shapes are superimposed, their outer contours perfectly overlap, forming a unified whole. This visual metaphor not only echoes the essence of fruits having the same root and origin, but also symbolizes the dynamic balance between the individual and the collective.

CANDLE

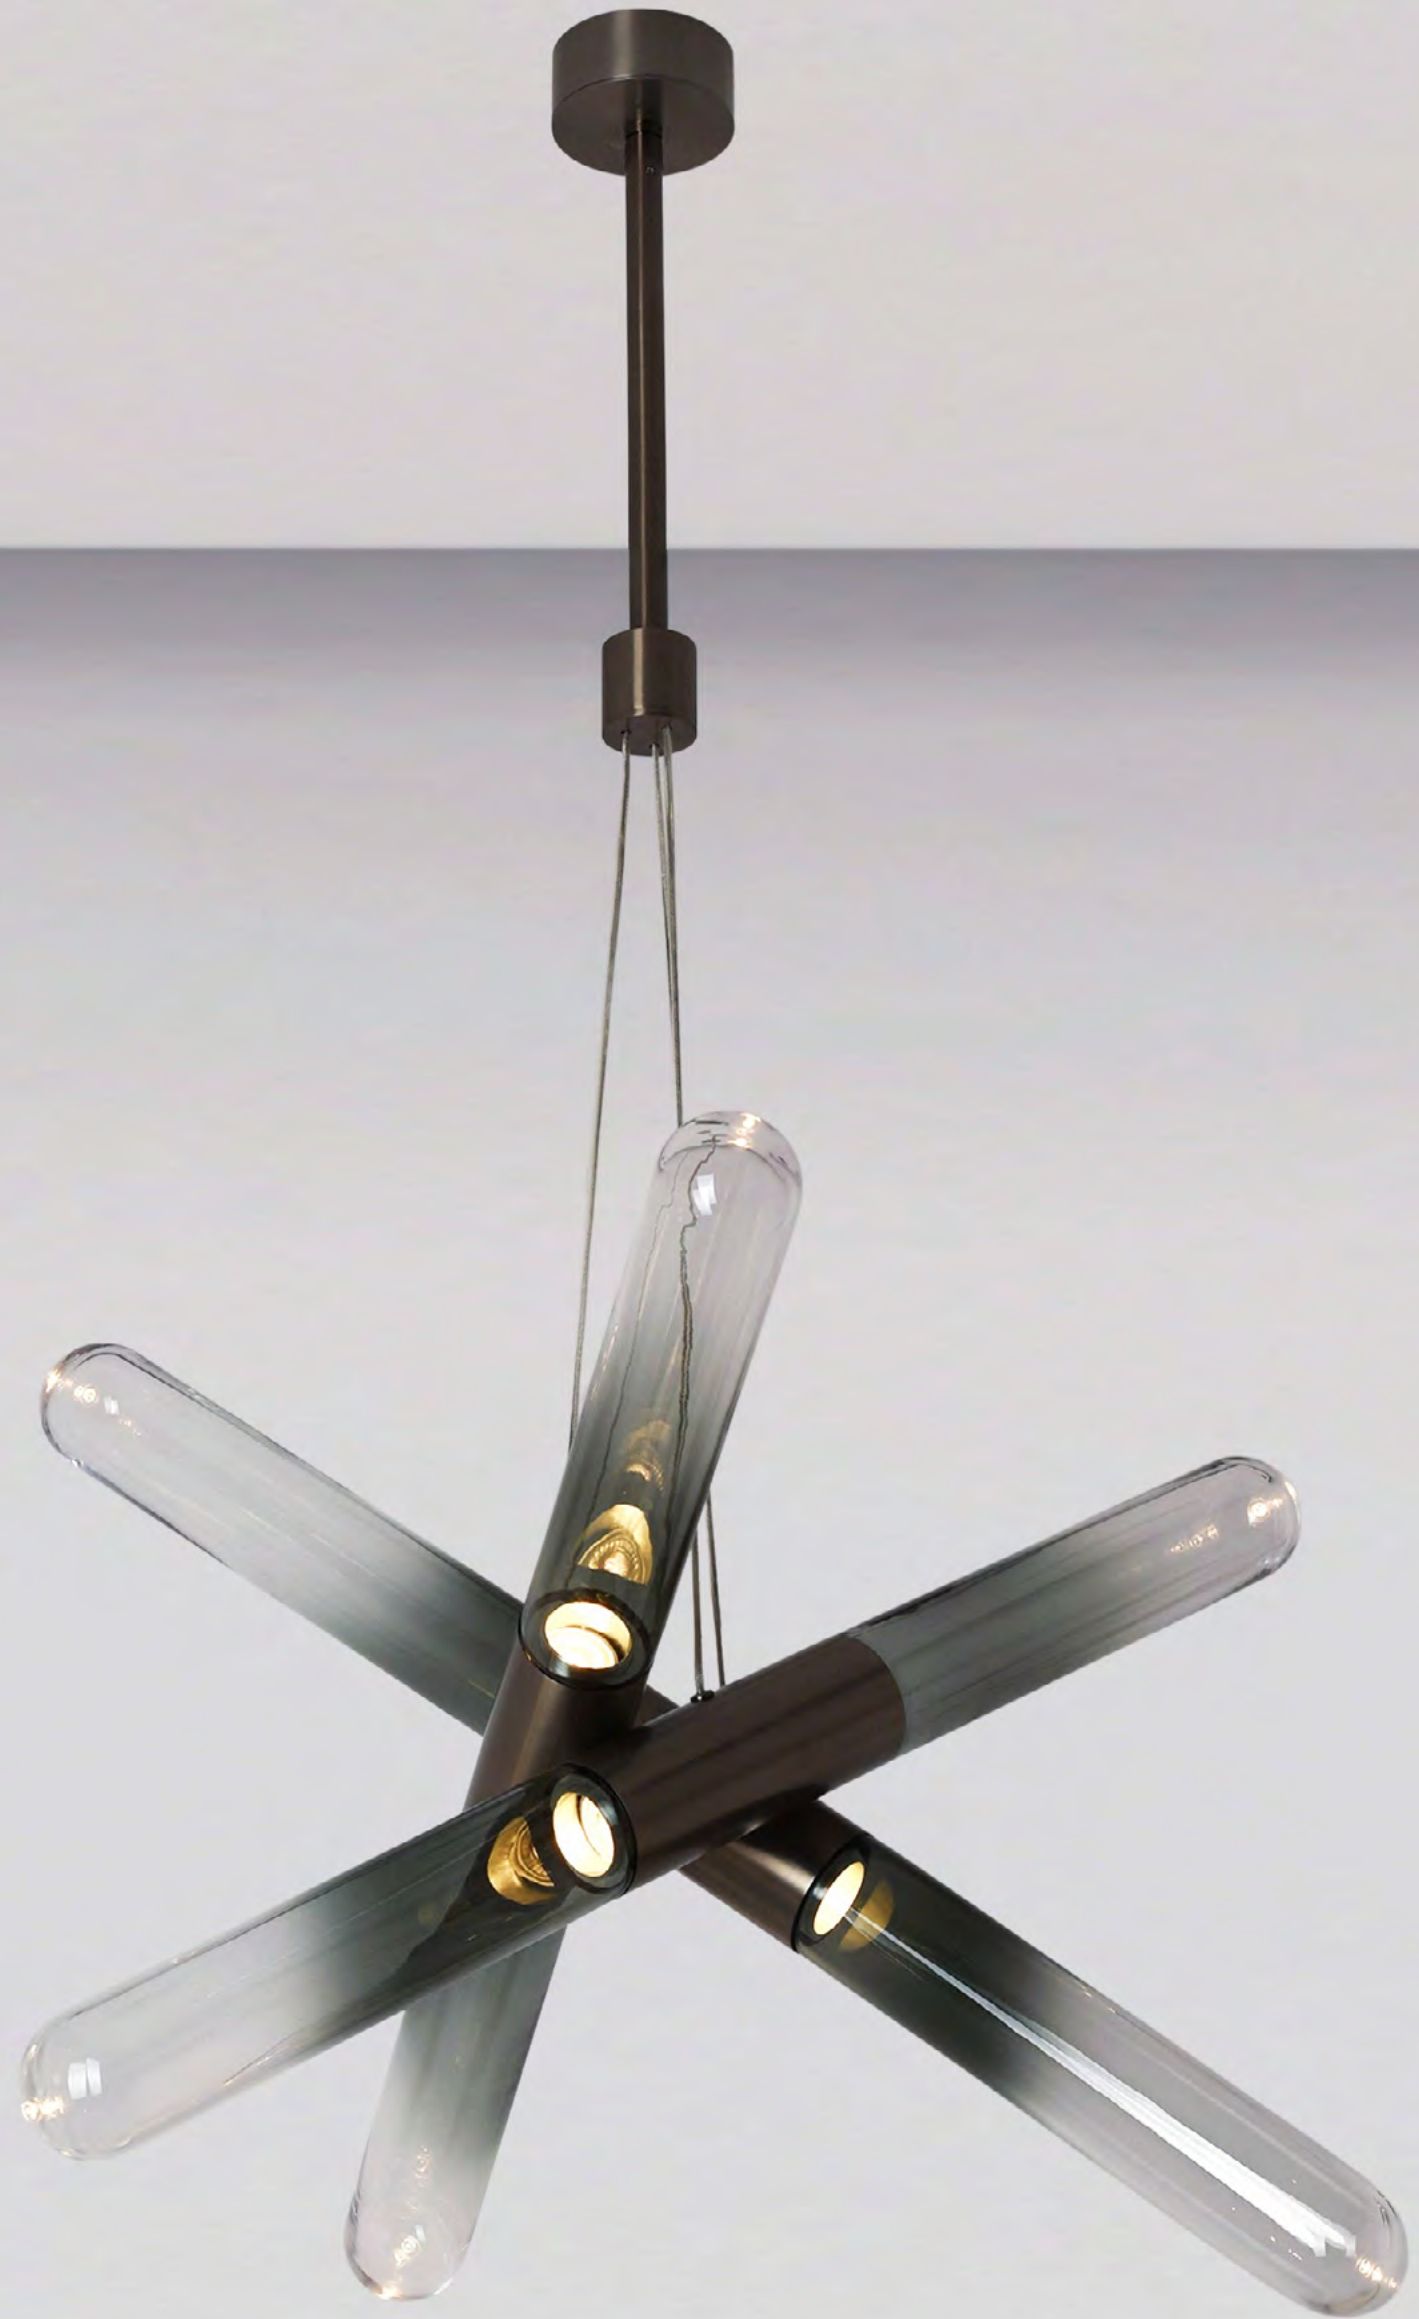

## SOLAR ECLIPSE MINI

Candlelight, is a soft light in the night, it is warm and romantic, instantly let me fall into a dreamlike atmosphere. It is like a small spark that lights up my soul and makes me feel infinite tranquility and warmth. Designers are good at observing the most subtle feelings of things, and bring new design works "candle" with the inspiration of candlelight, which immeres the whole space in warm and pure light and gives the space a clearer imagination.

ICE

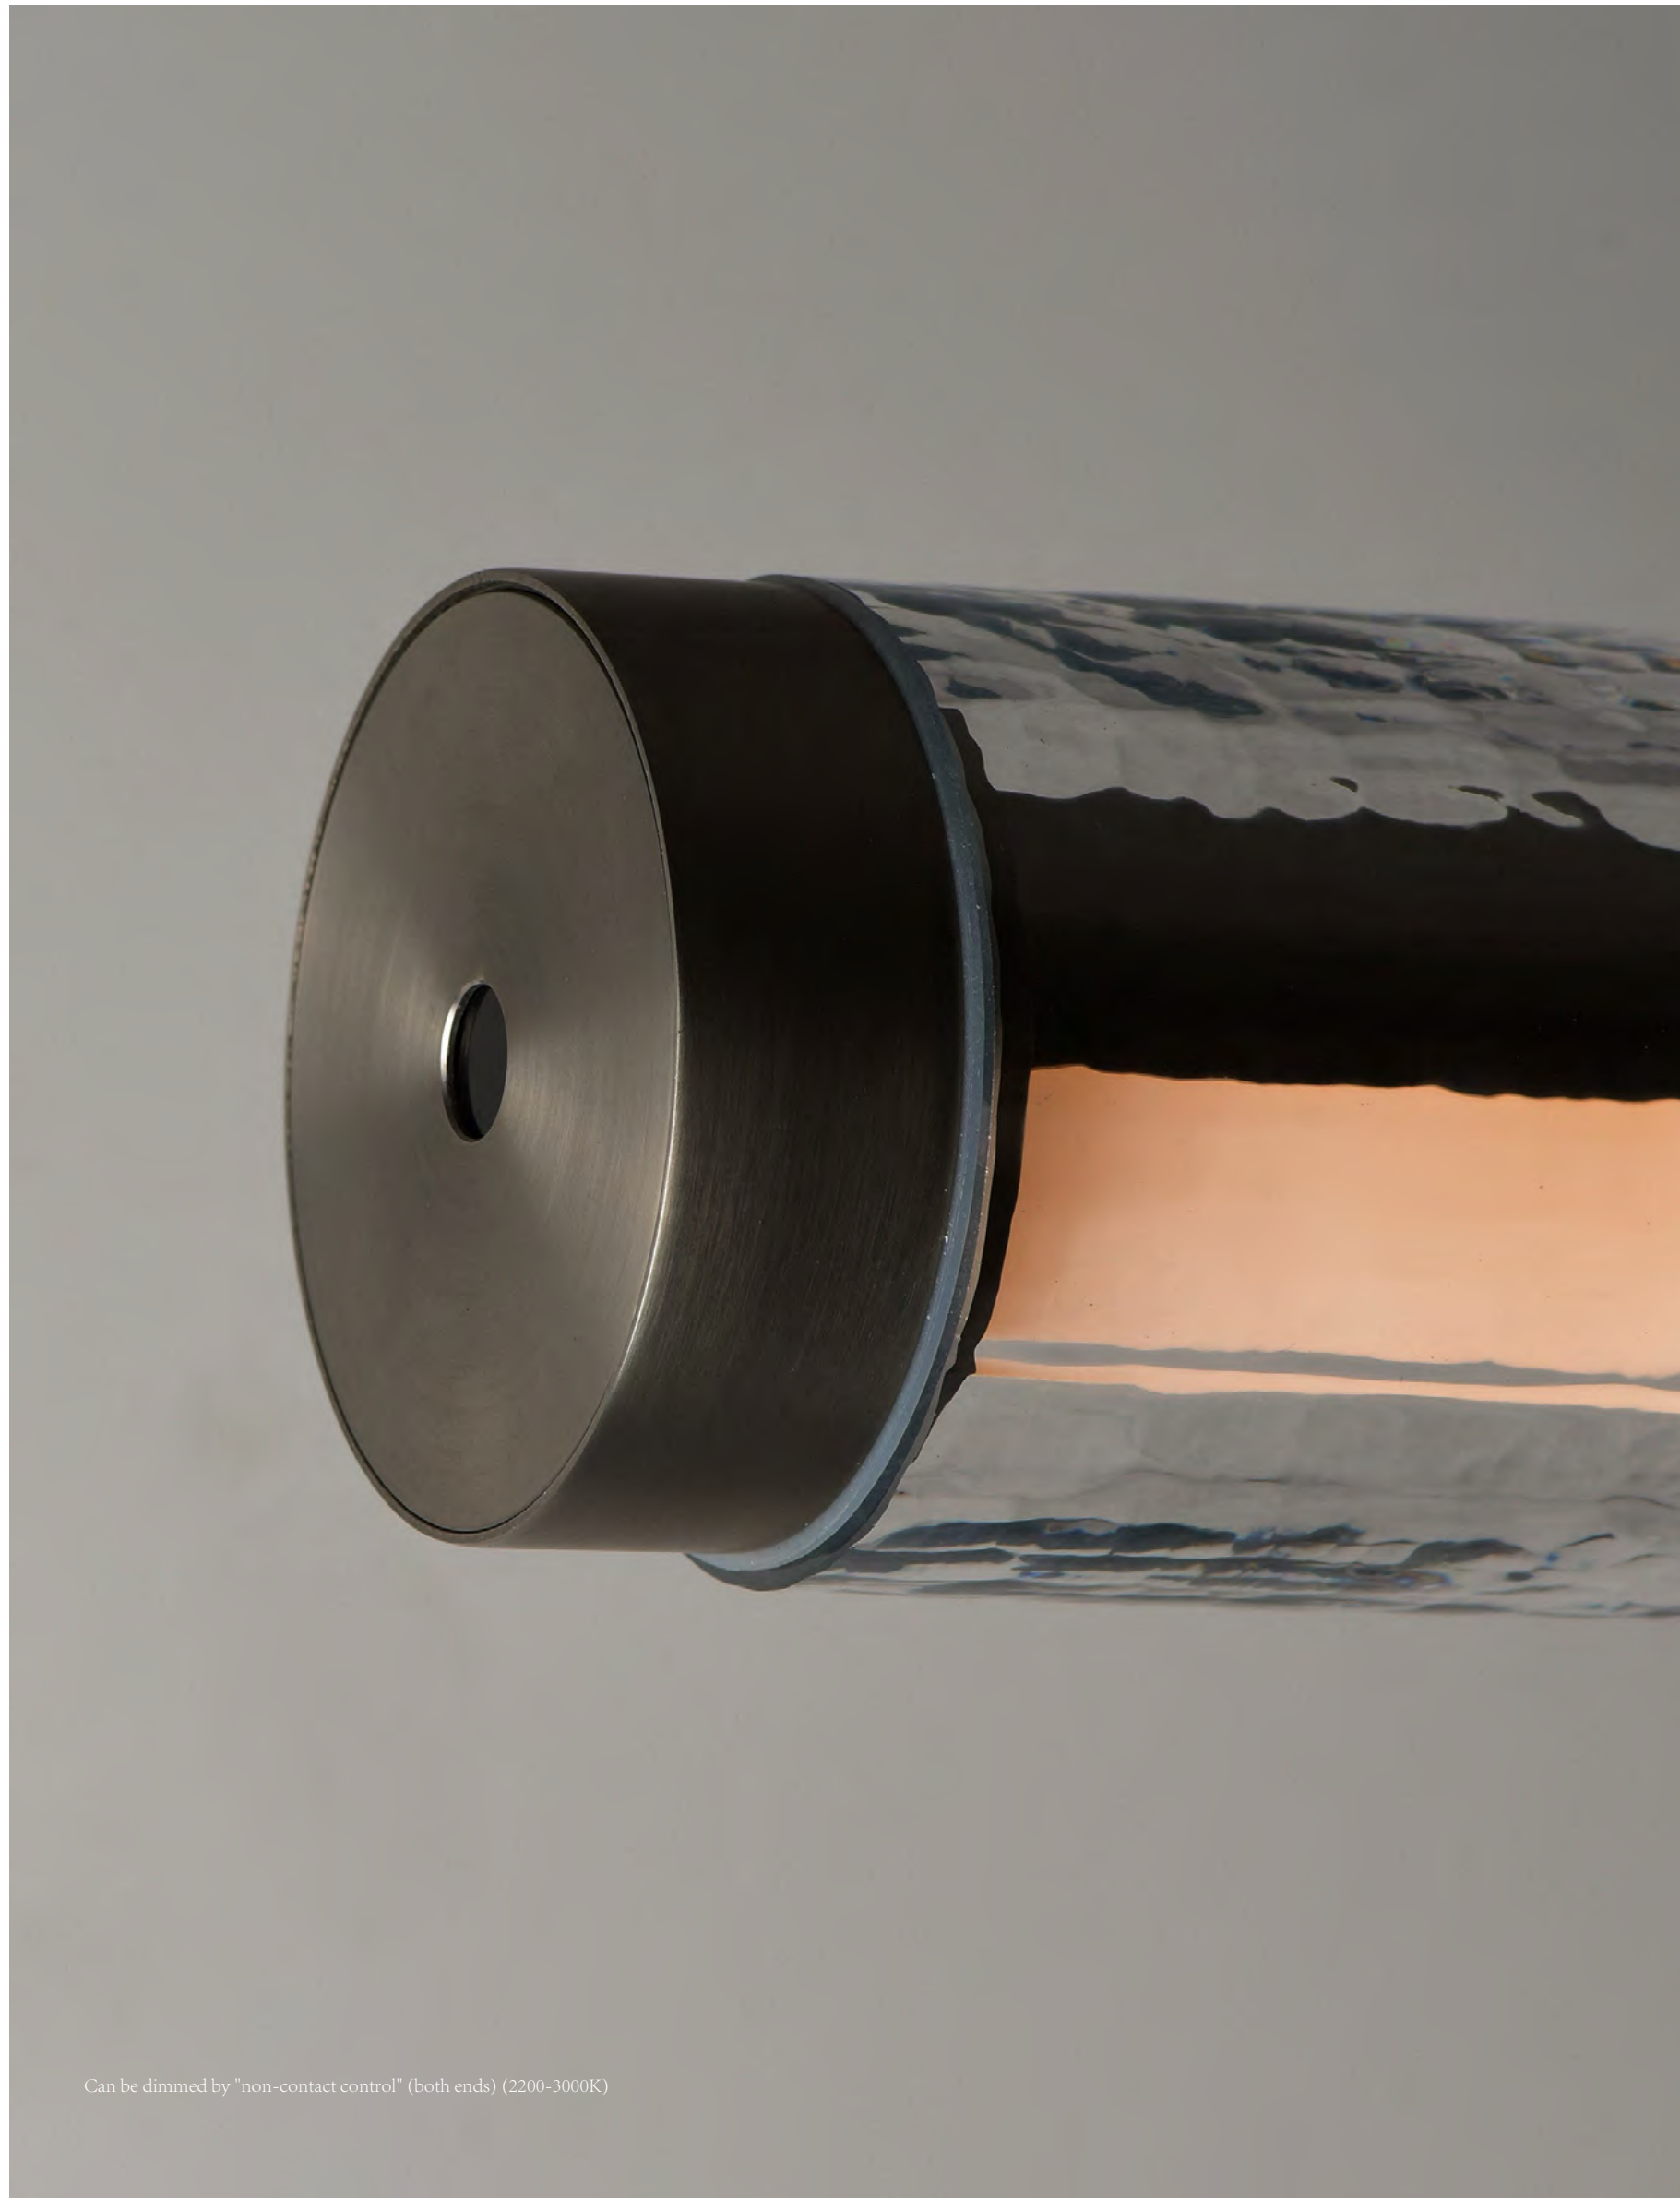

Can be dimmed by "non-contact control" (both ends) (2200-3000K)

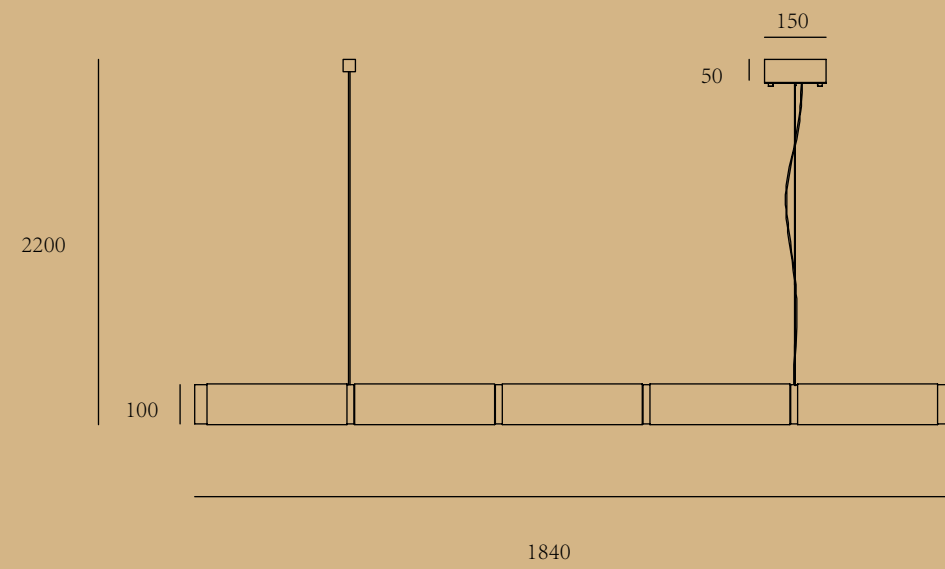

## ICE

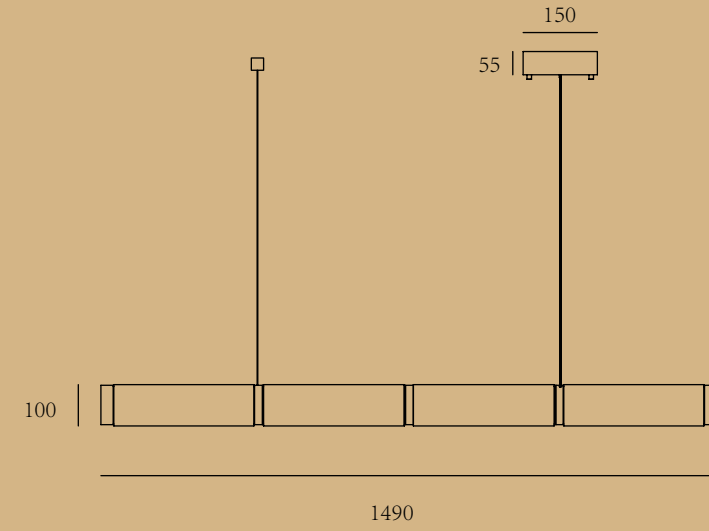

"Ice" is a minimalist, elegant modern light fixture with a modular frame to meet the needs of each project, the collection contains "Ice" and "Ice (MINI)" and "Ice (MINI) Classic" series, which contains chandeliers and floor lamps. The design of "ICE" series is inspired by ice in nature. The designer uses hand-made crystal as a material to present the texture of ice through crystal. With soft lighting, lighting is promoted to an art form.

**ICE MINI**

## ICE MINI

"Ice MINI" series is more suitable for home space, with a slimmer light body and better light control elements, both ends of the light body equipped with infrared sensor light control elements, the overall color temperature range of 2200k-3000k, providing the most suitable lighting environment for the home environment, the overall design style continues the surface texture of "ice" theme. Provide a textured lighting scheme for the space.

# ICE MINI CLASSIC

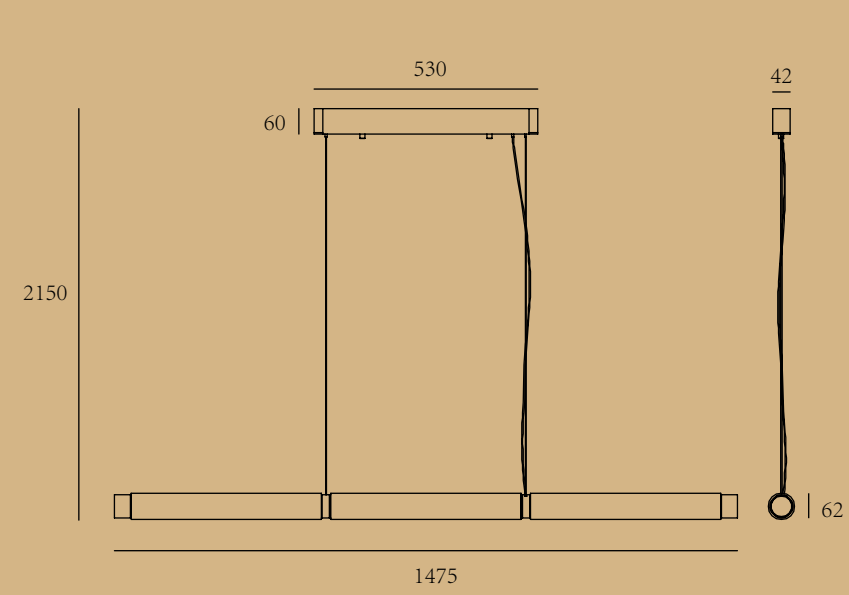

## ICE MINI CLASSIC

---

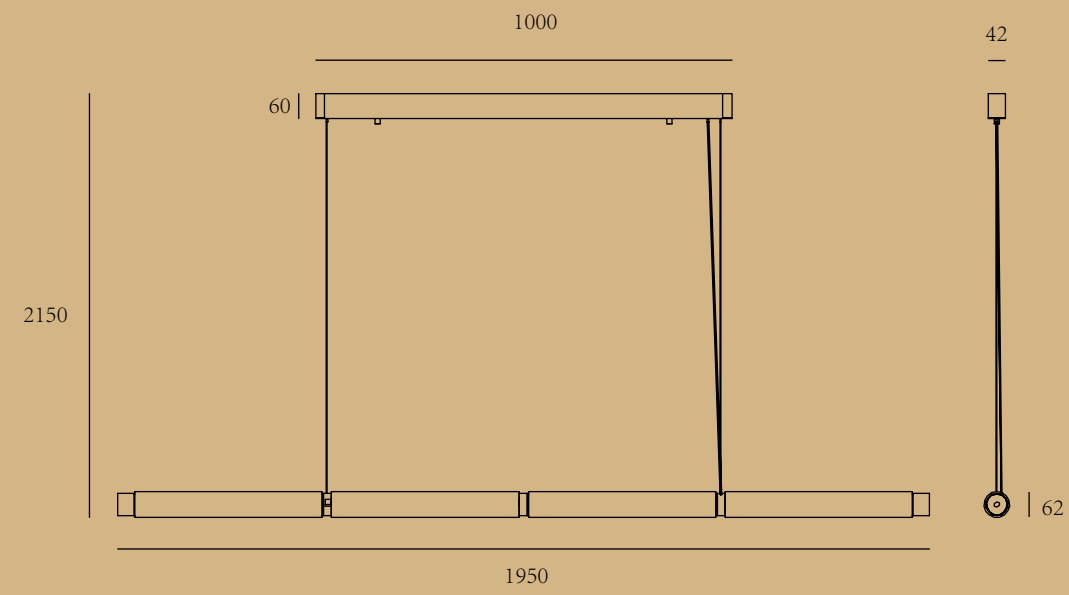

"Ice (MINI) Classic" mainly launched the chandelier series, on the basis of "ice (MINI)" increased the manual carting process, so that the original single surface effect of the lamp increased the different surface effect contrast, this regular and orderly surface texture for the original natural grain feeling increased a little rational detail, so that the whole series again presented a different effect. The series offers two different size effects, which can be paired with your own "Ice (MINI) Classic" according to your space.

ETERNITY

Can be dimmed by "non-contact control" 3000K

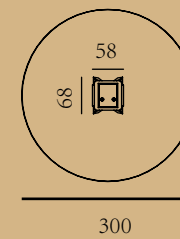

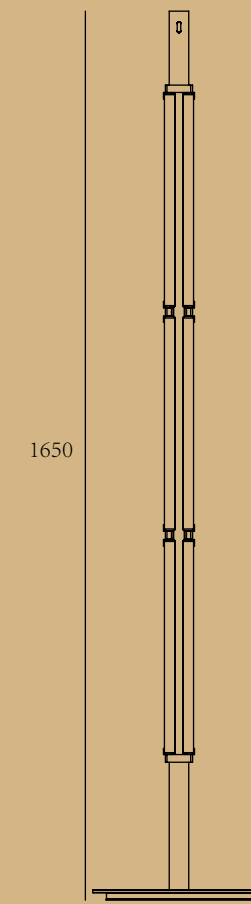

## ETERNITY

Constant "crisp appearance contains the micro requirements for light control. The square crystal extends down from the two wings to form an anti-glare mask, and the specially customized optical lens on the inside controls the refraction of light just right. Induction dimming, set on the side of the lamp body, can be directly controlled by gesture induction, to provide the most subtle light demand for daily life.

## LU

The designers of AURORA are good at capturing the beauty of nature, the beautiful starry sky, which is attractive. The vast sky solidified in a small crystal, like a shining diamond, dazzling people's eyes, so that your eyes lost in her woven star network, like a child's clear eyes, with a little purity and playfulness.
